ROYAL MARRIAGE ACT, 12 GEO. III. c. 11, was passed in 1772, in consequence of the marriage of the duke of Gloucester, the king's brother, with the widow of the earl Waldegrave, and of the duke of Cumberland with the widow of colonel Horton and daughter of lord Ingham. [By this act, none of the descendants of George II., unless of foreign birth, can marry under the age of 25, without the consent of the king; at and after that age, after twelve months' notice given to the privy council, they may contract such marriage, which shall be good unless both houses of parliament disapprove. The marriage of the duke of Sussex with the lady Augusta Murray, solemnised in 1793, was pronounced illegal, 1794, and the claims of their son, sir Augustus d'Este, declared invalid, by the house of lords, 9 July, 1844. He married lady Cecilia Underwood (afterwards duchess of Inverness), 1831.

H. R. H. the princess Louise was married to the marquis of Lorne by the queen's consent, 21 March, 1871.

HALF MARRIAGE. *Semi-Matrimonium*. Among the Romans concubinage was a legitimate union, not merely tolerated but authorised. The concubine had the name of *seui-confux*. Men might have either a wife or a concubine, provided they had not both together. Constantine the Great checked concubinage, but did not abolish it. This ancient custom of the Romans was preserved, not only among the Lombards, but by the French when they held dominion in that country. Cujas assures us that the Gascons and other people bordering on the Pyrenean mountains had not relinquished this custom in his time, 1500. The women bore the name of "wives of the second order." *Hænavult*. See *Morganatic Marriages*.

DOUBLE MARRIAGES. There are some instances of a *hus* band and two wives (but they are very rare) in countries where polygamy was interdicted by the state. The first Lacedæmonian who had two wives was Anaxandrides, the son of Leon, about 510 B.C. Dionysius of Syracuse married two wives, viz. : Doris, the daughter of Xenetus, and Aristomache, sister of Dion, 398 B.C. It is said that the count Gleichen, a German nobleman, was permitted, under peculiar circumstances, by Gregory IX., in A.D. 1237, to marry and live with two wives. The Mormons practise and encourage polygamy.

FORCED MARRIAGES. The stat. 3 Henry VII. (1487) made the principal and abettors in marriages with heiresses, &c., contrary to their will, equally guilty as felons. By 39 Eliz. (1596) such felons were denied the benefit of clergy. This offence was made punishable by transportation, 1 Geo. IV. (1820). The remarkable case of Miss Wharton, heiress of the house of Wharton, whom captain Campbell married by force, occurred in William III.'s reign. Sir John Johnston was hanged for seizing the young lady, and the marriage was annulled by parliament, 1690.—Edward Gibbon Wakefield was tried at Lancaster, and

tion of Miss Turner, 24 March, 1827; and his marriage with her was immediately dissolved by act of parliament.

**MARRIAGES BY SALE.** Among the Babylonians, at a certain time every year, the marriageable females were assembled, and disposed of to the best bidder. This custom is said to have originated with Atossa, daughter of Belochos, about 1433 B.C.

**FLEET MARRIAGES.** See *Fleet*.

**MATRONS OF HONOUR.** The American custom of "Matrons of Honour" (married ladies) accompanying the bridesmaids at weddings, introduced for the first time in England at St. Paul's Church, Knightsbridge, London, on the occasion of the marriage of Miss D. Milvain, daughter of the judge-advocate-general, with Mr. J. J. Pawson, of the 12th Lancers, and well-known gentleman rider. "Matrons of Honour": the countess of Guildford, Mrs. H. Pawson, Mrs. C. Pawson, and Mrs. P. Hardwick, 31 Oct. 1905.

**MARRIED WOMEN,** see *Wives*.

**MARRS MURDERS,** see *Ratcliffe Highway*.

**MAR'S INSURRECTION.** John, earl of Mar, proclaimed James III. at Braemar, Aberdeenshire, 6 September, 1715. He was defeated at Sheriffmuir, 13 Nov., and escaped from Montrose with the Pretender, 4 Feb. 1716.

**MARS,** a planet, next to the earth in order of distance from the sun; the spots on its surface were first observed by Fontana, in 1636. Two satellites named Phobos and Deimos, were discovered by professor Asaph Hall, at Washington, U.S., 11 Aug. 1877.

M. Dubois of Paris suggests that these satellites may be planetoids attracted by Mars, Aethra and another of these bodies having disappeared about the time of the discovery.

M. Schiaparelli, of Milan, describes configurations like canals, 1882, and M. Perrotin since has mapped them and asserts that Mars has an atmosphere and clouds (1887).

"They have likewise discovered two lesser stars or satellites which revolve about Mars."—*Swift*, *Gulliver's Travels*—Voyage to Laputa, about 1726.

Lowell (of Flagstaff observatory, Arizona) and others of late years have given great attention to Mars, the former succeeding in photographing some of the markings called "canals," 1905.

**MARSAGLIA** (Piedmont, N. Italy). Here the imperialists under prince Eugene and the duke of Savoy were defeated by the French under Catinat, 4 Oct. 1693.

**MARSEILLAISE HYMN.** The words and music are ascribed to Rouget de Lisle, or L'Isle, a French engineer officer, who, it is said, composed it by request, 1792, to cheer the conscripts at Strasburg. It derived its name from a body of troops from Marseilles marching into Paris in 1792 playing the tune. This account is doubted by some (1879). The author was pensioned by Louis Philippe, 1830, and died in 1836.

**MARSEILLES.** The ancient *Massilia* (S. France), a maritime city, founded by the Phœceans about 600 B.C.; an ally of Rome, 218 B.C. Cicero styled it the Athens of Gaul, on account of its excellent schools. Population, 1881, 360,099; 1891, 375,378; 1901, 422,378.

Clarke, duc de Feltre (died 28 Oct. 1818), and Andoche Junot, duc d'Abrantes (suicide 29 July, 1813), were only titular marshals, and that G. Christophe Michel Duroc (killed at the battle of Mackerdorf, 23 April, 1813), was only marshal of the palace.

François Canrobert, the last surviving marshal, died 28 Jan. 1895.

**MARSHALSEA COURT**, having jurisdiction in the royal palace, was very ancient, of high dignity, and coeval with the common law. Since the decision of the case of the Marshalsea (see *lord Coke's 10 Rep. 68*) no business has been done in this court; but it was regularly opened and adjourned at the same time with the Palace court, the judges and other officers being the same. These courts were removed from Southwark to Scotland-yard in 1801, were abolished by parliament, and discontinued 31 Dec. 1849; see *Prisons*.

**MARSI**, a brave people of Southern Italy, who, after several contests, yielded to the Romans, about 301 B.C. During the civil wars they and their allies rebelled, having demanded and been refused the rights of Roman citizenship, 91 B.C. After many successes and reverses, they sued for and obtained peace and the rights they required, 87 B.C. The Marsi being *Socii* of the Romans, this was called the *Social war*.

**MARSTON-MOOR** (near York). The Scots and parliamentary army were besieging York, when prince Rupert, joined by the marquis of Newcastle, determined to raise the siege. Both sides drew up on Marston-moor, on 2 July, 1644, and the contest was long undecided. Rupert, commanding the right wing of the royalists, was opposed by Oliver Cromwell, at the head of troops disciplined by himself. Cromwell was victorious; he drove his opponents off the field, followed the vanquished, returned to a second engagement and a second victory. The prince's artillery was taken, and the royalists never recovered the blow.

**MARTELLO TOWERS**, said to have been erected by Charles V. on the coasts of Italy. Similar circular buildings were erected in the beginning of the last century, on the southern coast of England, and other parts of the empire, as defences against invasion. The towers were said by some to be named from Cape Martello, or Mortella in Corsica. Many have been destroyed as obsolete.

**MARTINESTI**, see *Rinnik*.

**MARTINIQUE** (French West Indies), discovered in 1493 or 1502; settled by France, 1635.

This and the adjacent isles of St. Lucia and St. Vincent, and the Grenadines, were taken by the British from the French in Feb. 1762. They were restored to France at the peace of the following year. They were again taken, 16 March, 1794; restored at the peace of Amiens in 1802; again captured 23 Feb. 1809. A revolution in this island in favour of Napoleon was finally suppressed by the British, 1 June, 1815, and Martinique reverted to its French masters. Severe earthquakes occurred here in 1766 and 1839; at other times; 200 shocks in 1843.

Great destruction of life and property was caused by a cyclone and earthquake about 18 Aug. 1891; estimated deaths 378, besides losses by shipwrecks. Estimated loss 2,000,000*l*.

Mont Pelee, a volcano 4,428 ft. high, about 4½ miles behind the town, caused some loss of life and property in 1760 and 1851, and began again to show signs of activity at the end of April, 1902; masses of steam were thrown out, and St. Pierre was covered with ashes, 3, 4 May; a stream of lava (20 ft. high) swept everything away before it to the sea, the Guérin factory and over 150 lives destroyed; the sea receded 300 ft., and, returning, flooded St. Pierre, 5 May; reassuring reports were issued by the government, 6 May, but the eruptions increased in force, and finally, a little before 8 a.m., "with a terrific roar a huge column of white-hot sand, burning cinders and stones was shot up, and poured down a terrible volcanic torrent (spreading out for miles round even as far as Fort de France), and within ten minutes St. Pierre became a city of the dead," and the whole (about 50 sq. m.) district a desolation, 8 May; *Times* . . . 24 May, "

The *Grappler*, a cable ship, with a line set of engineers and men, and about 18 other vessels were totally lost; the *Suchet*, French gun-boat, picked up in the afternoon eight men belonging to the British s.s. *Roraima*, and 10 others drifting about on wreckage; the British s.s. *Kodiam* was saved by the pluck and fortitude of capt. Ed. Wm. Freeman, who, though burnt in the face and disabled, managed to steer it to a place of safety; but out of 44 on board only 18 survived, and most of these were injured; many reports issued; estimated damage, 200,000,000*l*., reported, "

Special American, British and French expeditions were sent to Martinique and St. Vincent to investigate the volcanic conditions of the West Indies, May; one sent by the royal society returned about . . . 2 Aug. "

Fresh outbreaks, June, and 9, 12 July; again, 15 Aug. *et seq.*; two of great violence, 25 and 28 Aug.; finally a terrible outburst destroyed Morne Rouge and Ajoupa Bouillon, Morne Boudon and three villages; 800 killed and about 200 hopelessly injured (a wave swept Carbet and about 200 were drowned). On the east, a portion of land over a mile long sunk into the sea, and the interior of the island laid waste; about 1,500 killed and more injured . . . 30, 31 Aug. "

**MARTINMAS**, 11 Nov., the feast of St. Martin, bishop of Tours, in the 4th century, is quarter day in parts of the north of England and in Scotland. The high sheriffs of England and Wales are nominated on the morrow of St. Martin, 12 Nov.

**MARTIN'S HALL**, ST. (Long Acre, London), was opened as a concert-room for Mr. John Hullah, on 11 Feb. 1850; burnt down 26 Aug. 1860; rebuilt, 1861; opened as the New Queen's theatre, by Mr. Alfred Wigan, 24 Oct. 1867. See *Westminster*, 1890.

**MARTYRS**. Stephen, the first Christian martyr, was stoned, 33. The festivals of the martyrs, of very ancient date, took their rise about the time of Polycarp, who suffered martyrdom about 169. St. Alban is the English protomartyr, 286; see *Persecutions, Protestants, and Diocletian Era*. The Martyrs' Memorial, Smithfield, erected by the Protestant Alliance, was inaugurated 11 March, 1870. The Martyrs' memorial church, St John's-street, Clerkenwell, was consecrated 2 June, 1871.

**MARY-ANNE**. Secret republican associations, especially in France. The name was given to the republic of 1792, to the guillotine, and to little statuettes of Liberty.

**MARYLAND**, named after queen Henrietta Maria, one of the first thirteen United States of North America, was granted in 1632 to lord Baltimore, and settled by a company of English Romanists in 1634. It contains the district of Columbia, in which Washington is situate. It continued in the Union when the other slave states seceded in 1860 and 1861. The confederate army, under general Lee, after their victory at Bull Run, 30 Aug. 1862, crossed the Potomac and entered Maryland. They were followed by the federal army under McClellan. Severe conflicts ensued, especially on 17 Sept., at Antietam Creek, with great loss on both sides, each claiming the victory. The confederates retired into Virginia in good order, and it is said with much booty. Capital, Annapolis; population, 1880, 934,943; 1890, 1,042,390; 1900, 1,188,044.

**MARY-LE-BONE**, a large parish, N.-W. London. The name is corrupted from St. Mary at the Bourne, or brook,—Tyebourne. It was chiefly pasture land in 1760. The manor was acquired by the duke of Portland in 1813. The hunting-grounds now form Regent's park (*which see*). The parishes of Marylebone, St. Pancras, and Paddington were made a parliamentary borough in 1832. By act of 1885 Marylebone alone returns two M.P.'s. Constituted a municipal borough by act of 1899 (10 aldermen, 60 councillors). St. Marylebone Churches Bill passed, 1898. Population, 1881, 154,910; 1891, 142,381; 1901, 133,301.

*Mary-le-bone gardens*—attached to the "Rose of Normandy"—a place of public entertainment, opened in the middle of the 17th century; mentioned by Pepys; closed 23 Sept. 1776; a music hall erected here, 1855. *The Marylebone Murder*.—Miss Lucy Clark, dressmaker, aged 49, living at George-st., Portman-sq., found murdered 23 Jan. 1888.

New higher grade and technical schools presented by ladies Howard de Walden and Ossington opened 30 July, 1890.

**MASS**, in the Roman church, is the office or prayers used at the celebration of the Eucharist, in memory of the passion of Christ, and to this every part of the service alludes. Mass was first celebrated in Latin about 394; it was introduced into England in the 7th century. Prostration was enjoined at the elevation of the host in 1201. Dr. Daniel Rock, in "The Church of our Fathers" (1849), describes an ancient MS. of "The Service of the Mass, called the Rite of Salisbury," compiled for that cathedral, by St. Osmund and others, during the 12th century. Sophus Lie (born 12 Dec. 1842, died, 18 Feb. 1899), were eminent mathematicians. Mary Somerville, born 1790, author of the "Mechanism of the Heavens," died 1873.

The London Mathematical Society was founded, 16 Jan. 1865.

John Thomas Crossley, author of the popular "Intellectual Calculator," died 29 April, 1889, aged 89. Mathematical congress at Zurich, mid. Aug. 1897, one at Paris in 1900.

**MATHURINS**, see under *Trinity*.

**MATINS**. The service or prayers first performed in the morning or beginning of the day in the Roman Catholic church. The *French Matins* were the massacre of St. Bartholomew, 24 Aug. 1572. The *Matins of Moscow* were the massacre of prince Demetrius, and the Poles his adherents, in the morning of 27 May, 1606.

**MATRIMONIAL CAUSES ACT**, passed 1859. By the act passed 27 May, 1878, a magistrate may grant judicial separation with maintenance to a wife suffering from a husband's violent usage. The act was amended in 1884.

**MATTER** is held to exist in three states: gaseous, liquid, and solid. Mr. William Crookes (knt. 1897), considers that there is a fourth state, "radiant matter," subtler than any of these, 1879-80. See *Light*.

**MATTERHORN**, a part of the main ridge of the Alps, about 14,836 feet high, S. Switzerland. After various fruitless attempts by professor Tyndall and other eminent climbers, in 1860, the summit was reached on 14 July, 1865, by Mr. Edward Whymper and others. During their descent, four of the party were killed. Mr. Hadow fell; the connecting rope broke, and he himself, lord Francis Douglas, the rev. Mr. Hudson, and Michael Crox, a guide, slipped down, and fell from a precipice nearly 4000 feet high. Miss Walker, with her father, ascended the Matterhorn, 22 July, 1871. Three gentlemen ascended without a guide, 21 July, 1876. Dr. W. O. Moseley, an American, was killed here, 14 Aug. 1879. Three persons attempting the ascent perished 12 Sept. 1890; Dr. Black and a Miss Bell killed here, 23 July, 1901.

**MAUNDY-THURSDAY** (derived by Spelman from *mande*, a hand-basket, in which the king was accustomed to give alms to the poor; by others from *dies mandati*, the day on which Christ gave his grand mandate, that we should love one another), the Thursday before Good Friday. *Wheatly*. On this day it was the custom of our sovereigns or their almoners to give alms, food, and clothing to as

many poor persons as they were years old. It was begun in England by Edward III., when he was fifty years of age, 1363, and is still continued. There is a picturesque ceremony every year on the Thursday before Good Friday in Westminster abbey. Money is now given in lieu of clothing and provisions. For the former, 1*l.* 15*s.* to each woman; 2*l.* 5*s.* to each man; and for the latter, 1*l.* 10*s.* to each. In addition there is the Maundy money, 1*l.*, and as many pence as the sovereign is years of age, in silver pieces—one penny, twopenny, threepence, and fourpence.

**MAUR, ST.**, see *Benedictions*.

**MAURITANIA** (N. Africa), with Numidia, became a Roman province, 33 B.C. Augustus created (30 B.C.) a kingdom formed of Mauritania and part of Getulia, for Juba II., a descendant of the ancient African princes. Suetonius Paulinus suppressed a revolt here, A.D. 42, when it was made a province, divided into parts. The country was subjugated by the Vandals, 429, and Greeks, 533, and fell into the hands of the Arabs, about 680. See *Morocco*, and *Moors*.

**MAURITIUS, or ISLE OF FRANCE** (in the Indian Ocean), was discovered by the Portuguese, 1505; but the Dutch were the first settlers in 1598. They called it after prince Maurice, their stadholder, but on the acquisition of the Cape of Good Hope, they deserted it; and it continued unsettled until the French landed, and gave it the name of one of the finest provinces in France, 1715. This island was taken by the British, 2 Dec. 1810, and confirmed to them by the treaty of Paris in 1814. The bishopric was founded 1854. Sir Henry Barkly, governor, in 1863, succeeded by sir Arthur H. Gordon, 1870; sir Arthur Purves Phayre, 1874; sir George F. Bowen, 1879; sir J. Pope Hennessy, Dec. 1882; sir Charles C. Lees, Sept. 1889; Sir Herbert E. H. Jerroldham, April, 1893; sir C. Bruce, Jan. 1897; sir C. Boyle, 1904. Population in 1861, 313,462; in 1890, 377,986; in 1901, 380,040. Capital, Port Louis; population, 1901, 53,978. Revenue, 1903, Rs. 9,221,600; expenditure, 1903, Rs. 9,575,182; debt, 1903, 1,379,784. Railways commenced 1866, 105 miles open 1901. **MAUSOLEUM.** Artemisia married her own brother, Mausolus, king of Caria, Asia Minor, 377 B.C. At his death, 353, it is said she drank in liquor his ashes after his body had been burned, and erected to his memory at Halicarnassus a monument, one of the seven wonders of the world (350 B.C.), termed *Mausoleum*. She invited all the literary men of her age, and proposed rewards to him who composed the best elegiac panegyric upon her husband. The prize was adjudged to Theopompus, 357 B.C. She died 352 B.C. The statue of Mausolus is among the antiquities brought from Halicarnassus by Mr. (aft. sir) C. T. Newton in 1857, and placed in the British Museum. A mausoleum for the royal family of England was founded by queen Victoria at Frogmore, 15 March, 1862. Queen Victoria and her Prince Consort buried there.

**MAUVE** (French for *malea*, mallow), a dye produced by Dr. Stenhouse from lichens in 1848; now produced from *Aniline* (*which see*).

**MAY**, the fifth month of the year, received its name, some say, from Romulus, who gave it this appellation in respect to the senators and nobles of his city, who were denominated *maiores*; others supposed it was so called from Maia, the mother of Mercury, to whom they offered sacrifices on the first day. The ancient Romans used to go in procession to the grotto of Egeria on May-day; see *Evil May-day*.

The annual festival of "Jack in the Green," and his companion sweeps, has gradually ceased, 1876. See under *Working Men*.

**MAYENCE**, see *Mentz*.

**MAY-FLOWER**, see *Pilgrim Fathers*.

"**MAY LAWS**," see *Prussia*, May, 1873.

**MAYNOOTH COLLEGE** (Ireland), founded by parliament, 1795, and endowed by a yearly grant voted for the education of students designed for the Roman Catholic priesthood in Ireland. An act for its government was passed in 1800. It contains about 500 students. Permanent endowment of this college (30,000*l.* for the enlargement of the buildings and 26,000*l.* annually) was granted by parliament, June, 1845. This occasioned much controversy in England, a motion being made for its abolition almost every session. The college was repaired and enlarged in 1860. By the Irish Church act, passed 26 July, 1869, the annual parliamentary grant was to cease after 1 Jan. 1871; a compensation being made. The buildings were much injured by fire, 31 Oct. 1878; damage estimated at 10,000*l.* The pictures and books were saved. The centenary celebrated, an international assembly of ecclesiastics present, 25-27 June, 1895. The king and queen visit the college (see *Ireland*, 1903). Mgr. Gargan, president since 1894, died, aged 84, 27 Aug. 1903.

**MAYO ASSASSINATION.** Richard Southwell Bourke, earl of Mayo, was born 21 Feb. 1822. As lord Naas he was chief secretary for Ireland, in the Derby and Disraeli administrations, 1852, 1858-9, 1866-8. In Sept. 1868, he was appointed viceroy of India, and energetically fulfilled the duties. He was assassinated at Port Blair in the Andaman islands, on a visit of inspection, by Shere Ali, a convict, 8 Feb. 1872. The Indian government

granted an annual pension of 1000*l.* to the countess, and 20,000*l.* for the children; and 1000*l.* a year was added to lady Mayo's pension by parliament, voted unanimously, 22 July, 1872.

**MAYORS OF THE PALACE**, high officers in France, who had great influence during the later Merovingian kings, termed "*fainéants*," do-nothings:—Pepin the Old (or de Landen), 622 *et seq.*; Pepin Héristal, 687-714; Charles Martel, despotic, 714-741; Pepin le Bref, 741, who shut up Childeric III. in a monastery, and himself took the kingdom, 752.

**MAYORS OF CORPORATIONS.** At the time of the Norman conquest, 1066, the chief officer of London was called *port-grave*, afterwards softened into *port-reve*, from Saxon words signifying chief governor of a harbour. He was afterwards called provost; but in Henry II.'s reign the Norman title of *maire* (soon after *mayor*) was brought into use. At first the mayor was chosen for life, but afterwards for periods of irregular duration; now he is chosen annually, but is eligible for re-election. In the City of London he must be an alderman, and have been sheriff. His duties commence on 9 Nov. In early times the mayor was always an M.P. for the city. The prefix *lord* is peculiar to the mayors of London, Dublin, York, Belfast, Liverpool, Manchester, Leeds, Birmingham, Sheffield, Bristol (1890), Cork (1900), Sydney and Melbourne (1902), Cardiff (1905), and to the provosts of Edinburgh, Glasgow, Dundee, Aberdeen and Perth. The dukes of Norfolk and Sutherland, the marquis of Ripon, and the earls of Derby and Lonsdale, and 6 other peers were elected mayors, Nov. 1895. Many other peers elected since then.

The first mayor of London, Henry Fitz-Ailwin, held office for 24 years, appointed . . . 1189 or 1191 (Some say Thomas Legge, created lord mayor by Edw. III., 1354).

Sir Henry Piccard, who had been lord mayor of London in 1357, sumptuously entertained in one day four monarchs: Edward, king of England; John, king of France; the king of Cyprus; and David, king of Scotland; the Black Prince and many of the nobility being present. *Slow* . . . 1363

The lord mayor entertained the viceroy of Egypt, 11 June; the sultan, 18 July, 1867; the shah of Persia, 20 June, 1873; the czar . . . 18 May, 1874

Lord Mayor Nottage died while in office (the first since William Beckford, who died 21 June, 1770), 11 April, 1885

It is now the custom when foreign rulers visit England for them to be entertained at the Guildhall by the lord mayor, and during 1903-4-5 many European royals, including the king and queen of Portugal, the king of Spain, the king of Greece, president Loubet, and others, as well as prince and princess Arisugawa of Japan, have been welcomed by the City Corporation.

**MAZRA** (or Baba Wali), near Candahar, Afghanistan. Here gen. sir Frederick Sleight (afterwards lord) Roberts totally defeated Sirdar Mahomed Ayoub Khan, and captured his camp and all his cannon, 1 Sept. 1880. Amongst the killed were colonel F. Brownlow, capt. St. John P. Frome, and capt. E. Straton; lieut. Hector MacLaine (made prisoner 27 July) was found recently murdered. Ayoub Khan with some followers fled towards Herat.

**MAZURKA**, a Polish dance of the 16th century, introduced into England about 1845; Chopin's music for the mazurka is much admired.

**MEAL TUB PLOT**, against the duke of York, afterwards James II., contrived by one Dangerfield, who secreted a bundle of seditious letters in the lodgings of colonel Maunsell, and then gave information to the custom-house officers to search for smuggled goods, 23 Oct. 1679. After Dangerfield's apprehension, on suspicion of forging these letters, papers were found concealed in a meal-tub at the house of a woman with whom he cohabited, which contained the scheme to be sworn to, accusing the most eminent persons in the Protestant interest, who were against the duke of York's succession, of treason,—particularly the earls of Shaftesbury, Essex, and Halifax. On Dangerfield being whipped the last time, as part of his punishment, 1 June, 1685, one of his eyes was struck out by a barrister named Robert Francis. This caused his death, for which his assailant was hanged.

**MEASURES**, see *Weights*, and *Micrometer*. "Not men, but measures," a phrase used in parliament by Brougham, 2 Nov. 1830.

**MEAT**, see *Provisions*.

**MEAT-BISCUIT**, said to have been invented by Cecil Borden, 1850. See *Milk*.

**MEATH** (Ireland). Many episcopal sees in Meath (as Clonard, Duleek, and others of less note) were fixed at Clonard, before 1151-2, when the division of the bishoprics in Ireland was made by John Paparo, then legate from Pope Eugene III. Eugene was the first styled bishop of Meath, about 1174. Meath was valued, 30 Henry VIII., at 373*l*. 12*s*. per annum.

**MECCA** (in Arabia), the birth-place of Mahomet, about 571, whence he was compelled to flee, 15 July, 622 (the Hégira). On one of the neighbouring hills is a cave, where it is asserted he retired to perform his devotions, and where the greatest part of the Koran was brought to him by the angel Gabriel, 604. Mecca, after being vainly besieged by Hosein for the caliph Yezid, 682, was taken by Abdelmelek, 692. In 1803 it fell into the hands of the Wahabees, a Mahometan sect. They were expelled by the pacha of Egypt in 1818, who retired in 1841. It is said that 160,000 pilgrims visited Mecca in 1858, and only 50,000 in 1859. The grand shereef was assassinated by a fanatic, 21 March, 1880. Pilgrimage to Mecca still continues; annual average, about 300,000 in 1893.

Sultan reported to have decided to construct a railway (the Hedjaz railway) from Damascus to Mecca, chiefly for the benefit of pilgrims. early 1900

**MECHANICS' INSTITUTIONS.** An institute for journeyman mechanics was founded by Dr. Birkbeck in Glasgow, 1800; the first mechanics' institute, properly so called, was organised by Dr. Birkbeck in London, 1824; and many others since on a wider basis, the original idea having been to teach mechanics the principles of their various trades. From the mechanics' institutes have sprung numerous workmen's social and recreative clubs, and technical and other educational organisations.

During the Thirty years' war Mecklenburg was conquered by Wallenstein, who became its duke, 1628; it was restored to its own duke, 1630. After several changes the government was settled in 1701 as it now exists in the two branches of Schwerin and Strelitz. In 1815 the dukes were made grand dukes. **MEDALS**, see *Numismatics*. The ancient medals resembled medallions. Modern medals began about 1453 in the 15th century with the works of Vittore Pisano, of Verona, who died 1456, and his followers. Charles I. authorized the presentation of a badge or medal for "forlorn hopes" soldiers, May, 1643. The house of commons resolved to grant rewards and medals to the fleet whose officers (Blake, Monk, Penn and Lawson) and men gained a glorious victory over the Dutch fleet, off the Texel, in 1653. Blake's medal of 1653 was bought by his majesty, William IV. for 150 guineas. In 1692 an act was passed for applying the tenth part of the proceeds of prizes for medals and other rewards for officers, seamen, and marines. Subsequent to Lord Howe's victory, 1 June, 1794, it was thought expedient to institute a naval medal. Medals were struck for the victory of Waterloo; a general war medal (for the war 1793-1814) was ordered in 1847; and special medals were given after the Kaffir and Chinese wars. Medals were presented by the queen to persons distinguished in the war in the Crimea, 18 May, 1855. **MERCIA**, see under *Britain*.

**MERCURY**, the planet nearest the sun, and the smallest known to the ancients. Schiaparelli

asserts his rotation to be as long as his revolution in his orbit. The transit of Mercury over the sun's disk, of rare occurrence and first observed by Gassendi, 1631, was well observed 5 Nov. 1868; at Athens, 10 May, 1891; well observed by Prof. Barnard at Lick Observatory, California, 10 Nov. 1894. See *Calomet* and *Quicksilver*. The Greek god Hermes was the Roman Mercury.

**MERCY, ORDER OF** (in France), was established with the object of accomplishing the redemption of Christian captives among the Saracens, by John de Matha in 1198. *Hénault*. Another order was formed by Pierre Nolasque in Spain, 1223. A League of Mercy (based on the plan of the guild founded by the late duchess of Teck), organized to further the objects of the prince of Wales's (now king Edward's) hospital fund for London; an "Order of Mercy," established in connection with the league, as a reward for free service to the sick and poor; the prince and princess of Wales, presidents, 1 March, 1899; succeeded by the present prince and princess of Wales, Nov. 1901. Order distributed yearly at Marlborough house by the prince of Wales.

**MERIDA** (Spain), a town in Estremadura (built by the Romans), was taken by the French, Jan. 1811. Near this town, at Arroyo dos Molinos, the British army under general (afterwards lord) Hill defeated the French under general Girard, after a severe engagement, 28 Oct. 1811. The British took Merida from the French in 1812, general Hill leading the combined forces of English and Spanish troops.

**MERIDIAN**, see under *Geodesy*.

**MERINO SHEEP**, imported into England from Spain, 1788, are thought to be descendants of English sheep taken to Spain as part of the dowry of John of Gaunt's daughter Katherine, 1390.

**MERSEY TUNNEL**, see *Tunnel*.

**MERSTHAM TUNNEL MYSTERY**. Late on Sunday night, 24 Sept. 1905, the body of Mary Sophia Money, aged 21, a book-keeper employed at a dairy at Lavender-hill, Clapham Junction, was discovered in Merstham tunnel (S. E. & C. and L. B. & S. C. railways). It was at first supposed to be a case of suicide, but later inquiries and the *postmortem* examination led to the belief that Miss Money had been murdered. In her mouth was found a long piece of silk veil, suggesting that she had been gagged and then thrown out of the train. The body was terribly mutilated, the skull being smashed, the left leg severed from the body. On the sides of the tunnel were marks of her hands; her gloves were covered with soot. The verdict returned at the inquest was "that Miss Money met her death by severe injuries brought about by a train, but the evidence was insufficient to show whether she fell or was thrown from a train," 16 Oct. 1905. The mystery is still unsolved.

**MERTHYR-TYDVIL** (Glamorganshire). Riots commenced here, 3 June, 1831, and continued for several days; many persons were killed and wounded. Population, 1903, 71,651. Incorporated 1905. See *Coal* (*Accidents*).

**MERTON** (Surrey). At an abbey here, the barons under Henry III., 23 Jan. 1236, held a parliament which enacted the Provisions of Merton, the most ancient body of laws next after Magna Charta. They were repealed in 1863; see *Bastards*. The statute of Merton also provides for the inclosure of common lands.

**MERV**, or Meru (the ancient *Antiochia Margiana*), a town of independent Turkestan, Central Asia. It flourished under the Seljuk Turks, especially under Sultan Alp Arslan; it was sacked by the Mongols in 1221; it became subject to Persia in 1510; to the emir of Bokhara in 1787; to the Turkomans in 1856, and to Russia 1883-4. Nearly 10,000 Turcomans die of malignant fever, March-Oct. 1896. See *Russia* and *Turkestan*.

**MESMERISM**. Frederiek Anthony Mesmer, a German physician, of Merseburg, published his doctrines in 1766, contending, in a thesis on planetary influence, that the heavenly bodies diffused through the universe a subtle fluid which acts on the nervous system of animated beings. Quitting Vienna for Paris, in 1778, he gained numerous proselytes and much money by experiments with and without metallic plates, producing effects termed then "animal magnetism," now "hypnotism." A committee of physicians and philosophers investigated his pretensions, and Bailly, in a paper drawn up in 1784, exposed the futility of animal magnetism. Mesmerism excited attention again about 1848, when Miss Harriet Martineau and others announced their belief in it. In 1859, the Mesmeric Infirmary issued its tenth annual report, archbishop Whately being president, and the earl of Carlisle and Mr. Monckton Milnes (afterwards lord Houghton) among the vice-presidents. See *Animal Magnetism* and *Hypnotism*.

The "New Mesmerism" exhibited in Paris by Dr. Luys and others, which included the alleged externalization of sensations and transference of sensibility to inanimate objects, such as dolls, was well described in the *Times*, 28 Dec. 1892, and 5, 11 Jan. 1893, and by Mr. Ernest Hart in the *British Medical Journal* . . . Jan. 1893.

**MESOPOTAMIA**, the district between the rivers Tigris and Euphrates (*which see*, and *Aram*), successively held by Assyrians, Babylonians, Persians, Greeks, Romans, Arabs and Turks. *Meso-*

**MESSENIA** (now *Maura-Matra*), in the Peloponnesus, an ancient kingdom. It had long sanguinary wars with Sparta. It was at first governed by kings; after its restoration to power in the Peloponnesus it formed an inferior republic, under the protection first of the Thebans, and afterwards of the Macedonians.

The first Messenian war began 743 B.C.; was occasioned by violence offered to some Spartan women in a temple of devotion common to both nations; the king of Sparta being killed in his efforts to defend the females. Eventually, Ithome was taken, and the Messenians became slaves to the conquerors.

The second war, to throw off the Spartan yoke, commenced about 685, ending in the defeat of the Messenians, who fled to Sicily.

The third war (the Messenians emigrate) . . . 464-455

**MESSIAH**, synonymous with Christ "the anointed," foretold by *Daniel* ix. 25, about 538 B.C. "We have found the Messiah, which is, being interpreted, the Christ." *John* i. 41. "The Messiah," Handel's greatest oratorio, composed by him in twenty-three days (22 Aug.-14 Sept. 1741), was first performed at Dublin, 13 April, 1742, the receipts being given by him to the charities of that city.

**MESSINA** (Sicily), so named by the Samians, who seized this city, then called Zancle, 671 B.C. It was seized by the Mamertini (*which see*), about 281 B.C. It belonged for many ages to the Roman empire; was taken by the Saracens, about A.D. 829. *Priestley*. Roger the Norman took it from them by surprise, about 1072.

**METALS**. Tubal-Cain is mentioned as an "instructor of every artificer in brass and iron." (*Gen.* iv.) The Phœnicians had great skill in working metals. Bunsen and Kirchhoff's method of chemical analysis by means of the spectrum has added cesium, rubidium, thallium, indium, gallium, and others to the known metals. See *Elements, Mines, Iron*, and the other metals. "Metallurgy," published by Dr. John Percy, 1861-80; he died 19 June, 1880. "Electro-Metallurgy," translated from the German of Dr. W. Borchers, with additions by Walter G. McMillan, published, 1897.

**METAMORPHISTS** in the 15th century affirmed that Christ's natural body, with which he ascended into heaven, was wholly deified.

**METAPHYSICS**, the science of abstract reasoning, or that which contemplates the existence of things without relation to matter. The term, literally denoting "after physics," originated from these words having been put at the head of certain

essays of Aristotle, which follow his treatise on *Physics*. *Mackintosh*. Modern metaphysics arose in the 15th century—the period when an extraordinary impulse was given to the study of the human mind in Europe, commonly called the "revival of learning." Hobbes, Cudworth, S. T. Coleridge, Dugald Stuart, and sir W. Hamilton, were eminent British metaphysicians, and Descartes, Pascal, Kant, Schelling, and Fichte, foreign ones. See *Philosophy*.

**METAURUS**, a river in central Italy, where Hasdrubal, the brother of Hannibal, was defeated and slain, 207 B.C., when marching with abundant reinforcements. The Romans were led by Livius and Claudius Nero, the consuls. The latter commanded the head of Hasdrubal to be thrown into his brother's camp. The victory saved Rome.

**METEMPSYCHOSIS**, a doctrine attributed to Pythagoras, about 528 B.C., asserts the transmigration of the soul from one body to another. It is also ascribed to the Egyptians, who would eat no animal food lest they should devour the body into which the soul of a deceased friend had passed. They had also an idea that so long as the body of the deceased was kept entire, the soul would not transmigrate; and therefore embalmed the dead. See *Buddhism*.

**METEOROGRAPH**, an apparatus for the invention of which father Secchi of Rome received a prize at the Paris International Exhibition, July, 1867. It is self-acting, and registers the various changes of the atmosphere in the form of a diagram.

**METEOROLOGY** (from the Greek *meteōros*, aerial), the science which treats of the phenomena which have their origin in the air, such as rain, lightning, meteors, fogs, &c. The writings of Theophrastus, on meteorology, 3rd century B.C., were translated by Jas. G. Wood, edited by G. J. Symons, published 1894. Aristotle, Bacon, Boyle, and Franklin wrote on the subject.

Sir W. Reed published his work on the "law of storms" in 1838. The works of Daniell (1845), Kämtz (1845), Müller (1847), and Buchan (1867) are esteemed.

The "British" Meteorological Society, established in 1850, chartered in 1866, became Royal, Oct. 1883.

By the exertions of Mr. James Glaisher, long the secretary, the apparatus at Greenwich was erected; and meteorology has appeared in the "Greenwich Observations" since 1848. See *Balloon—Scientific Ascents*.

The Royal Meteorological Society's annual exhibitions began in 1850.

Meteorological observatories have been erected in all parts of the globe.

The Meteorological department of the Board of Trade, established in 1855, under admiral Fitzroy, commenced the publication of reports in 1857. The admiral published his "Weather-Book" in 1863. His exertions are said to have overworked his brain; and on 30 April, 1865, he died by his own hand. The Meteorological office issues apparatus and instruction books to captains of ships and established observatories in many places in the empire. It was handed over to the Royal Society in 1871, and endowed by Mr. J. F. Gassiot. Annual reports on ocean meteorology, weather telegraphy and climatology issued.

The plant is grown in the Botanical society's gardens, London. Many other plants possess this property (*W. Sowerby*), Sept. 1888. During the experiments made at the Jodrell laboratory, Kew, by Dr. Oliver and Herr Joseph Nowack in October, 1889, when many weather changes occurred, only one forecast was given by the weather plant, which therefore cannot be relied upon for meteorological purposes. **METEORS, LUMINOUS**, include shooting stars, fire-balls, and falling stones or aërolites. They were described by Halley, Wallis, and others early in the 17th century. The periodicity of the star showers about the 10th of August (termed in the middle ages St. Lawrence's tears) was discovered separately by Quetelet, 1836, and by Herriek in 1837. The following are remarkable epochs for their annual return:—2 Jan.; 29 July; 3 and 9-12 Aug.; 14-16 Nov.; 11 Dec. *R. P. Greg.* See *August*.

The magnificent continuous star-shower of 14 Nov. 1866, had been predicted by professor Newton some time previously. A fine display occurred on the night of 13 Nov. 1868, in the United States. A similar phenomenon had been witnessed by Humboldt at Omama

(S.A.), 12 Nov. 1799; and by Dr. D. Olmsted, at New-haven (U.S.), 13 Nov. 1833. They were well observed in Britain and Europe, 27 Nov. 1872; and in Southern and Western Europe, 27 Nov. 1885.

**Aërolites**, falling-stones, accompanying meteors, are found in our museums. They contain iron, nickel, and other minerals.

**METHOD** (Greek, a way of transit), that which gives to knowledge its character. S. T. Coleridge's treatise on the science of method is prefixed to the first volume of the "Encyclopædia Metropolitana," 1845.

The most recent work on this subject is Professor Stanley Jevons' "Principles of Science: a Treatise on Logic and Scientific Method," 1874. "The powers of mind concerned in creation of science are discrimination, detection of identity, and retention."

**METHODISTS**, see *Wesleyans*.

**METHUEN TREATY**, a treaty for regulating the commerce between Great Britain and Portugal, made 27 Dec. 1703, concluded by Paul Methuen, our ambassador at Lisbon. It greatly favoured the importation of port wine into this country by lowering the duty, to the discouragement of French wines. It was abrogated in 1834.

**METHYL**, a colourless inodorous gas, a compound of hydrogen and carbon, obtained in the free state first by Frankland and Kolbe separately, in 1849.

**METHYLATED SPIRITS**. By an act passed in 1855 a mixture of spirits of wine with 10 per cent. of its bulk of wood-naphtha, or methyllic alcohol, is allowed to be made duty free for use in the arts and manufactures, not less than 450 gallons being made at one time. In 1861 an act was passed permitting the methylated spirits to be retailed by licence.

**METONIC CYCLE**, a period of 19 years, or 6940 days, at the end of which the changes of the moon fall on the same days; see *Calippic Period*, *Golden Number*.

**METRIC SYSTEM**. Before the revolution there was no uniformity in French weights and measures. On 8 May, 1790, the constituent assembly charged the Academy of Sciences with the organisation of a better system. The committee named for the purpose by the academy included the names of Berthollet, Borda, Delambre, Lagrange, Laplace, Méchain, and Prony. Delambre and Méchain were charged with the measurement of an arc of the meridian between Dunkirk and Barcelona, and from their calculations the *mètre*, which is equal to a ten-millionth part of the distance between the poles and the

equator (3'2808 English feet) was made the unit of length and the base of the system by law on 7 April, 1795. The system was completed in 1799, and made by law the only legal one on 2 Nov. 1801. A decree on 12 Feb. accommodated the old measures to the new system; but on 4 July, 1837, it was decreed that after 1 Jan. 1840, the metric and decimal system in its primitive simplicity should be used in all business transactions. The example of France has been followed by the greater part of Europe, but not yet by Great Britain.

Unit of SURFACE, *centiare*=a square metre=1'1960 English yard (a square decametre or *are*=100 square metres).

Unit of WEIGHT, *gramme*=weight of a cubic centimetre (the 100th part of a metre) of distilled water=0'56438 English drachm.

Unit of MONEY, the *franc*, a piece of silver weighing 5 grammes.

The multiples of these units are expressed by Greek numerals (*deca*-, 10; *hecto*-, 100; *kilo*-, 1000; *myria*-, 10,000). The divisors are expressed by Latin numerals (*deci*-, 10; *centi*-, 100; *milli*-, 1000).

**METZ**, a fortified city in Lorraine, annexed to the empire of Germany, 10 May, 1871. Population, 1890, 60,194; 1900, 58,424. It was the Roman Divodunum or Meti, capital of the Mediomatrici, a powerful Gaulish tribe, and afterwards of the kingdom of Austrasia, or Metz, in the 6th century. It was made a free imperial city, 985. It was besieged by Charles VII. of France for seven months in 1444, and was ransomed for 100,000 florins; was captured by Henry II., 10 April, 1552, and successfully defended by the duke of Guise against the emperor Charles V. with an army of 100,000 men, 31 Oct. 1552 to 15 Jan. 1553. Metz was ceded to France by the peace of Westphalia, 24 Oct. 1648, and was fortified by Vauban and Belleisle. On 28 July, 1870, the emperor Napoleon III. arrived at Metz and assumed the chief command. After the disastrous defeats at Woerth and Forbach, on 6 Aug. the whole French army (except the corps of MacMahon, De Failly, and Douay) was concentrated here, 10, 11 Aug., and by delay was hemmed in by the Germans. Marshal Bazaine assumed the chief command, 8 Aug. The emperor departed with the vanguard, which crossed the Moselle early on 14 Aug.

1. Battle of Pange or Courcelles, gained by the first German army under Von Steinmetz, after several hours' fighting, with great German loss 14 Aug. 1870  
Bazaine was censured for not advancing on 15 Aug. "
2. Battle of Vionville or Mars-la-Tour, gained by the 2nd German army under prince Frederick Charles, after twelve hours' fighting. By the unexpected unmasking of a mitrailleuse battery, Henry, prince of Reuss, and many German nobles were killed. The victory was at first claimed by the French. (This battle, the most sanguinary in the war hitherto, included a Balacava charge of a German regiment of cavalry upon a French battery, by which it was decimated, but to which the victory was greatly due. Twice as many Germans were killed as at Königgratz, the killed and wounded being estimated at 17,000. The French loss was said to have been equally great) 16 Aug.  
Bazaine masses his troops for a decisive conflict, 17 Aug. "
3. Battle of Rézonville or Gravelotte, gained by the combined 1st and 2nd German armies, commanded by the king in person, after twelve hours' fighting. "The most desperate struggle took place on the slopes over Gravelotte, which the Germans gained by nightfall, after repeated fatal charges; the fortune of the day being long in suspense. But the right of the French had been outflanked, they fell back fighting to the last, and retired under cover of Metz. The French are said to have lost 19,000; and the Germans, 25,000." (The carnage is considered to have been unexampled; a large number of French prisoners were made. The German army included Saxons and Hessians) 18 Aug. "  
Bazaine repulsed in a sortie at Courcelles, near Metz (he claimed a victory) 26 Aug. "  
His whole army defeated by gen. Manteuffel of the army of prince Frederick Charles, in a battle lasting from the morning of 31 Aug. to noon, 1 Sept. "
- Von Steinmetz sent to govern Posen; prince Frederick Charles sole commander before Metz, 21 Sept. "
- Vigorous but ineffective sallies 23, 24, 27 Sept. "  
About 100,000 soldiers estimated in Metz, 30 Sept. "  
Great sortie; the Germans surprised; about 40,000 French engaged; they are repulsed after a severe engagement from 3 p.m. till dark; loss about 2000 French and 600 Germans 7 Oct. "  
About 600 oxen and 500 sheep captured during a sortie. 8 Oct. "

Metz surrenders with the army, including marshals Bazaine, Canrobert, and Le Boeuf; 66 generals; about 6000 officers; 173,000 men, including the Imperial guard; 400 pieces of artillery; 100 mitrailleuses; and 53 eagles or standards, 27 Oct. "  
The capitulation was signed at Frescati by generals Jarras and Stiehle on behalf of the French and German commanders 27 Oct. "  
General order to French army issued by marshal Bazaine, saying they were "conquered by famine," 27 Oct. "  
Order to German army issued by prince Frederick Charles, recognising their bravery, great obedience, cheerfulness, and devotion 27 Oct. "  
The Germans enter Metz 20 Oct. "  
One cause of the fall of Metz was the great army it contained; it might have been successfully defended by 20,000 men.  
Marshal Bazaine was tried and condemned to death for surrendering Metz and the army, 6 Oct.-10 Dec.; punishment commuted to 20 years' imprisonment, 12 Dec.; he escaped from Isle St. Marguerite 9 Aug. 1874

MICHAELMAS, 29 Sept., the feast of St. Michael, the reputed guardian of the Roman Catholic church, under the title of "St. Michael and All Angels." Instituted, according to Butler, 487.

he custom of eating goose at Michaelmas has been erroneously attributed to Queen Elizabeth's eating of the bird at dinner on 29 Sept. 1588, at the house of sir Neville Umfreyville, at the time she heard of the destruction of the Spanish Armada. The custom is of much older date, and is observed on the continent. *Clavis Calendaria*.

MICROBES, see *Germ*.

MICROMETER, an astronomical instrument used to measure any small distances and the minuter

objects in the heavens, such as the apparent diameters of the planets, &c., was invented by Wm. Gascoigne, who was killed at the battle of Marston-moor, 2 July, 1644. It was improved by Huyghens about 1652. Sir Joseph Whitworth made a machine to measure the millionth of an inch, about 1858; the measurement of the 30,000th of an inch is now common. Dr. Carpenter measured a filament, the breadth being the 200,000th part of an inch, 1879.

Dr. P. E. Shaw explains to the Royal society an electrical micrometer which, it is stated, can be made to measure the two-millionth of a millimetre, or the fifty-millionth of an inch. This measurement, the smallest yet made, was in connection with the movements of a telephone diaphragm. The measurement was effected by means of an electric current connected with the micrometer and telephone . . . July, 1905

MICROPHONE (Greek, *mikros*, little; *phônê*, sound), a name given by Wheatstone, in 1827, to an instrument for rendering weak sounds audible by means of solid rods. The name was also given to an arrangement invented (in Dec. 1877) by professor D. E. Hughes (inventor of the type-writing telegraph, born in London 16 May, 1831, died 22 Jan. 1900), and shown to the Royal Society, 9 May, 1878.

MICROPHITE, a microscopic plant, especially parasitic; some physiologists consider bacteria and bacilli to be microphites, 1890.

MICROSCOPES, said to have been invented by Jansen, in Holland, about 1590; by Galileo, about 1610; by Fontana, in Italy, and by Drebbel, in Holland, about 1621. Those with double glasses were made at the period when the law of refraction was discovered, about 1624. Solar microscopes were invented by Dr. Hooke. In England great improvements were made in the microscope by Benjamin Martin (who invented and sold pocket microscopes about 1740), by Henry Baker, F.R.S., about 1763, and still greater during the 19th century by Wollaston, Ross, Jackson, Varley, Hugh Powell, and others. *Diamond microscopes* were made by Andrew Pritchard in 1824; and the properties of "test objects" to prove the qualities of microscopes, discovered by him and Goring in 1824-40. A *binocular microscope* (i.e., for two eyes) was constructed by professor Riddell in 1851, and Wenham's binocular prism was made known in 1861. Nacher's *stereoscopic microscope*, 1867; Abbe's *orthoscopic* and *pseudoscopic*, 1881. Treatises on the microscope by J. Quekett (1848); by Dr. W. B. Carpenter (1856 *et seq.*; 8th edition, re-constructed and enlarged by Dr. Dallinger, 1901), and Griffith and Henfrey's "Micrographic Dictionary" (1856, 1875, and 1883), are valuable. The Microscopical Society of London was established 20 Dec. 1830, and the Quekett Microscopical Club, 1865. In 1865 Mr. H. Sorby exhibited his *spectrum microscope*, by which the millionth of a grain of blood was detected.

The new Ashe-Finlayson *comparoscope*, an apparatus by means of which any two slides can be used simultaneously, the images of the slides being projected on to the eye-piece at the same moment, exhibited at the Royal Microscopical Society . . . 15 Feb. 1905

MICROTOME, an instrument for cutting minute sections of organic tissue for the microscope, invented, 1885, by prof. Wm. Rutherford (who died, 21 Feb. 1899); improved by Dr. Paul Meyer and others.

It advanced under Celsus, who flourished A.D. 37, and of Galen, who lived 131. In England midwifery became a science about the period of the institution of the college of physicians, 10 Hen. VII. 1518. Dr. Harvey engaged in the practice of it, about 1603; Astruc affirms that madame de la Vallière, mistress of Louis XIV., in 1663, employed Julian Clement, a surgeon, with great secrecy. **MINT**. Athelstan enacted regulations for the government of the mint about 928. There were several provincial mints under the control of that of London. Henry I. is said to have instituted a mint at Winchester, 1125. Stow says the mint was kept by Italians, the English being ignorant of the art of coining, 7 Edw. I. 1278. The operators were formed into a corporation by the charter of king Edward III., in which condition it consisted of the warden, master, comptroller, assay-master, workers, coiners, and subordinates. The first entry of gold brought to the mint for coinage occurs in 18 Edw. III. 1343. Tin was coined by Charles II. 1684; and gun-metal and pewter by his successor James after his abdication. Sir Isaac Newton was warden, 1699-1727, during which time the debased coin was called in, and new issued at the loss of the government. at Lambeth, near London, in 1673. The improvements in manufacturing plate-glass, and that of very large size, have cheapened looking-glasses very much. Various methods of coating glass by a solution of silver, thus avoiding the use of mercury, so injurious to the health of the workmen, have been made known; by M. Petitjean in 1851; by M. Cinég in 1861, and by Liebig and others.

Among the Protestants, an early undertaking of this kind was a Danish mission, planned by Frederick IV. in 1706. The Society for the Propagation of the Gospel in foreign parts was established 1701, and the Moravian Brethren encouraged missions about 1732. Its peculiar "dry, shrieking, terrible sound" was described in the bombardment of Saarbrück, 2 Aug. 1870. Modifications of the mitrailleuse have been made by Montigny and others. The Fosbery mitrailleuse was tried and approved at Shoeburyness, 11 Aug. 1870.—It is mentioned in *Grose's Military Antiquities* (1801) that in England, in 1625, a patent was granted to William Drummond for a machine composed of a number of muskets joined together, by the help of which two soldiers can oppose a hundred, and named, on account of its effect, "thunder carriage," or more usually, "fire carriage." An English mitrailleuse, a modification of the American galling, containing 50 cartridges, was tried at Woolwich, 18 Jan. 1872; fifty of them were ordered to be made by Armstrong.

**MITRE**. The cleft cap or mitre was worn by the Jewish high-priest, 1491 B.C. It had on it a golden plate inscribed "HOLINESS TO THE LORD." *Exodus xxxix. 28*. The most ancient mitre that has the nearest resemblance to the present one is that upon the seal of the bishop of Laon, in the 10th century. *Fosbroke*. Anciently the cardinals wore mitres, but at the council of Lyons, in 1245, they were directed to wear hats.

The discovery of a stone with inscription in Phœnician characters, relating to Mesha, king of Moab, referred to in 2 *Kings*, iii., was announced in Jan. 1870, and impressions were exhibited soon after.

**MODELS**. The first were figures of living persons, and Dibutades, the Corinthian, is the reputed inventor of those in clay. His daughter, being about to be separated from her lover, traced his profile by his shadow on the wall; her father filled up the outline with clay, which he afterwards baked, and thus produced a figure of the object of her affection, giving rise to an art till then unknown, about 985 B.C.

A beautiful model of the new town of Edinburgh, before the building began, was formed in wood.

A model was made of a bridge over the Neva, of uncommon strength as well as elegance; and of the mountains of Switzerland, by general Pfiffer (1766-85).

M. Choffin's model of Paris also was remarkable for its precision.

Fine models of Gibraltar, Quebec, and other fortified places, are deposited in the Rotunda at Woolwich. See *Warwork and Lodging-houses*.

**MODENA** (formerly Mutina), capital of the late duchy in Central Italy; was governed by the house of Este, from 1288 till 1796, when the last male of that house, the reigning duke Hercules III., was expelled by the French. By the treaty of Campo Formio, the Modenese possessions were incorporated with the Cisalpine republic, 1797, and with the kingdom of Italy, 1805. The archduke Francis of Este, son of the archduke Ferdinand of Austria, and of Mary, the heiress of the last duke, was restored in 1814. Modena, in accordance with the voting by universal suffrage, was annexed to Sardinia on 18 March, 1860. Population of the city, 1881, 31,053; 1901, 64,941; of the province, 1881, 279,254; 1901, 322,617.

**MODOC INDIANS** (a few hundreds), dwelling in lands south of Oregon, were removed to other lands by the United States government. Not obtaining subsistence, they returned to their old possessions, and their able leader captain Jack defeated the troops sent to expel them, 17 Jan. 1873. During negotiations for a peaceful settlement, they decoyed the United States commissioners into an ambush (11 April), and massacred general Canby and about 40 others. Fighting took place, 15, 16 April, and the Indians retreated to almost impregnable positions. The troops were fired on, and suffered much loss, 27 April. The Indians were gradually surrounded. Jack and about twenty warriors held out desperately. Some surrendered, and he himself was captured, 1 June; tried, July, and executed 3 Oct. 1873.

**MOKANNA** (Hakim ben Allah), "The Veiled," prophet, founder of a sect in Khorassan in the eighth century. He pretended to be an incarnation of God, and therefore veiled his face, but really to conceal the loss of an eye. He rebelled against the calif Almahdi, was for a time successful, but was subdued in 780, when he and the remains of his followers took poison. He is the subject of a poem by Thos. Moore in "Lalla Rookh," 1817.

**MONACHISM** (from the Greek *monos*, alone). Catholic writers refer to the prophet Elijah, and the Nazarites mentioned in *Numbers*, ch. vi., as early examples. The first Christian ascetics appear to be derived from the Jewish sect of the Essenes, whose life was very austere, practising celibacy, &c. About the time of Constantine (306-22) numbers of these ascetics withdrew into the deserts, and were called *hermits*, *monks*, and *anchores*;\* of whom Paul, Anthony, and Pachomius were most celebrated. Simeon, the founder of the Stylite (or pillar saint), died 451. He is said to have lived on a pillar thirty years. St. Benedict, the great reformer of western monachism, published his rules and established his monastery at Monte Casino, about 529. The Carthusians, Cistercians, &c., are varieties of Benedictines. In 964, by decree of king Edgar, all married priests were ineffectually ordered to be replaced by monks. Religious orders expelled from France, by decree, 29 March, 1880. Relieved of their vows by the Pope, 1881. See *Abbeys*, and *Benedictines*.

By treaty on 2 Feb. 1861, the prince ceded the communes of Roquebrune and Mentone, the chief part of his dominions, to France, for 4,000,000 francs. The prince, Charles III., born 8 Dec. 1818, succeeded his father Florestan, 20 June 1856; died 10 Sept. 1889; was succeeded by Albert, born 13 Nov. 1848. He married, 1st, lady Mary Douglas-Hamilton, daughter of 11th duke of Hamilton; and 2nd, Oct. 1889, the duchesse de Richelieu. Heir, Prince Louis, born 12 July, 1870. **MONEY** is mentioned as a medium of commerce in *Genesis* xxiii., 1860 B.C., when Abraham purchased a field as a sepulchre for Sarah. The coinage of money is ascribed to the Lydians. Moneta was the name given to their silver by the Romans, it having been coined in the temple of Juno-Moneta, 269 B.C. Money was made of different metals, and even of leather and other articles, both in ancient and modern times. It was made of pasteboard by the Hollanders so late as 1574. Sir Giles Mompesson and sir Francis Mitchell were punished for their abuse of monopolies, 1621. In 1630, Charles I. established monopolies of soap, salt, leather, and other common things, to supply a revenue without the help of parliament. It was decreed that none should be in future created by royal patent, 16 Chas. I. 1640.

See Capt. Mahan's article on the Monroe doctrine, *National Review*, Feb. 1903, and *Times*, 30 Jan. 1903.

President Roosevelt, speaking on the Monroe doctrine at Chautauqua (N.Y.), says: "The Monroe doctrine was meeting with an increasing recognition abroad because it had not been allowed to become fossilised, but had been adapted to meet the growing and changeable needs of America, which had shown that it was no less ready to recognise the obligations to foreign peoples than to insist upon its own rights" . . . 11 Aug. 1905

Violante, daughter of John II., married Andronicus Palæologus, emperor of the East. Their descendants ruled in Italy amid perpetual contests till 1533, when John George Palæologus died without issue. His estates passed after much contention to Frederic II. Gonzaga, marquis of Mantua, in 1536, and next to the duke of Savoy.

**MONUMENT OF LONDON**, built by sir Christopher Wren, 1671-7. The pedestal is forty feet high, and the edifice altogether 202 feet, that being the distance of its base from the spot where the fire which it commemorates commenced. It is the loftiest isolated column in the world. Its erection cost about 14,500*l.* The staircase is of

black marble, consisting of 345 steps. Fall of part of the stone coping, no one injured, 25 Sept. 1888; examined and repaired; re-opened 14 Jan. 1889. Of the four original inscriptions, three were Latin, and the following in English,—cut in 1681, obliterated by James II.; re-cut in the reign of William III.; and finally erased by order of the common council, 26 Jan. 1831. They produced Pope's indignant lines:—

"Where London's column, pointing at the skies,  
Like a tall bully, lifts the head, and lies."

THIS PILLAR WAS SET UP IN PERPETUAL REMEMBRANCE OF THAT MOST DREADFUL BURNING OF THIS PROTESTANT CITY, BEGUN AND CARRIED ON BY TREACHERY AND MALICE OF THE POPIST FRACTION, IN THE BEGINNING OF SEPTEMBER IN THE YEAR OF OUR LORD 1666, IN ORDER TO CARRYING ON THEIR HORRIBLE PLOT FOR EXTERMINATING THE PROTESTANT RELIGION AND OLD ENGLISH LIBERTY, AND INTRODUCING POPE AND SLAVERY.

William Green, a weaver, fell from this monument, 25 June, 1750. A man named Thomas Craddock, a baker, precipitated himself from its summit, 7 July, 1780. Mr. Lyon Levy, a Jewish diamond merchant, of considerable respectability, threw himself from it, 18 Jan. 1810; as did subsequently three other persons: in consequence of which a fence was placed round the railing of the gallery in 1839.

**MOODKEE** (India). Here, on 18 Dec. 1845, the Sikhs attacked the advanced guard of the British, commanded by general Gough, and were repulsed three miles, losing many men and fifteen pieces of cannon. Sir Robert Sale was mortally wounded. The battle preceded that of Ferozeshah (*which see*).

**MOOLTAN** (N. W. India), an ancient city, was stormed by Runjeet Sing, 1818. Here his son, Moolraj Sing, ruler of the Sikhs, treacherously murdered Mr. Vans Agnew and lieutenant Anderson, 21 April, 1848. Several conflicts took place between the British and the Sikhs, in which the latter were beaten, and Mooltan taken after a protracted siege, 2-22 Jan. 1849.

**MOORS**, formerly the natives of Mauritania (*which see*), but afterwards the name given to the Numidians and others, and now applied to the natives of Morocco and the neighbourhood. They frequently rebelled against the Roman emperors, and assisted Genseric and the Vandals in their invasion of Africa, 429. They resisted for a time the progress of the Saracens or Arab Mahometans, but were overcome in 707, and in 1019 were by them introduced into Spain, where their arms were long victorious. In 1063 they were defeated in Sicily by Roger Guiscard. The Moorish kingdom of Grenada was set up in 1237, and lasted till 1492, when it fell before Ferdinand V. of Castile, mainly owing to internal discord. The expulsion of the Moors from Spain was decreed by Charles V., but not fully carried into effect till 1609, when the bigotry of Philip III. inflicted this great injury to his country. About 1518 the Moors established the piratical states of Algiers and Tunis (*which see*). In the history of Spain, the Arabs and Moors must not be confounded.

**MOPLAHS**, industrious fanatical Mahometans in Malabar, E. Indies, gave trouble by their attacks on Hindoos and the British, especially in 1845; an outbreak was suppressed about 15 Sept. 1873.

**MORAL INSTRUCTION LEAGUE**, formally instituted at a meeting in St. Martin's town hall, London, 7 Dec. 1897, under the presidency of Mr. J. Allanson Picton, a member of the first school board for London. Members' first general meeting held 26 Jan. 1898, when a constitution was adopted. The object of the league is "to introduce systematic non-theological moral instruction into all schools and to make the formation of character the chief object of school life." The following authorities have, to Aug. 1905, made provision, or have decided to make provision, for systematic moral instruction (in addition to the Scripture lessons) in their schools:—Birmingham, Leicester, Bradford, Monmouthshire, Durham County, Burton-on-Trent, Colne, Bexhill-on-Sea, Shipley, Barry, Cheshire, Derbyshire, West Riding of Yorkshire, Mansfield, Gloucester, Margate, Ripon, Ebbw Vale, Sheffield, Huddersfield, Brighouse, and Hanley. Offices of the league, 19, Buckingham-street, Strand, W.C.

**MORAL PHILOSOPHY**, the science of ethics, defined as the knowledge of our duty, and the art of being virtuous and happy. Socrates (about 430 B.C.) is regarded as the father of ancient, and Grotius (about 1623) the father of modern moral philosophy; see *Ethics* and *Philosophy*.

**MORAT** (Switzerland), where Charles the Bold of Burgundy was completely defeated by the Swiss, 22 June, 1476. A monument, constructed of the bones of the vanquished, was destroyed by the French in 1798, and a stone column erected. 400th anniversary kept, 1876.

**MORAVIA**, an Austrian province, occupied by the Slavonians about 548, and conquered by the Avars and Bohemians, who submitted to Charlemagne. About 1000 it was subdued by Boleslas of Poland, but recovered by Ulrich of Bohemia in 1030. After various changes, Moravia and Bohemia were amalgamated into the Austrian dominions in 1526. Moravia was invaded by the Prussians in 1866, and they established their head-quarters at Brünn, the capital, 13 July. The demand of the Moravians for home rule was resisted Oct. 1871. Strike of 30,000 coal miners at Ostrau, and rioting suppressed by military, 16, 17 April, 1890. Population in 1890, 2,276,870; 1900, 2,435,081.

**MORAVIANS**, or **UNITED BRETHREN**, said to have been part of the Hussites, who withdrew into Moravia in the 15th century; but the brethren assert that their sect was derived from the Greek church in the 9th century. In 1722 they formed a settlement (called *Herrnhut*, the watch of the Lord) on the estate of count Zinzendorf. Their church consisted of 500 persons in 1727. They were introduced into England by count Zinzendorf about 1738; he died at Chelsea in June, 1760. In 1851 they had thirty-two chapels in England. They are zealous missionaries, and founded settlements in foreign parts, about 1732. London Association founded, 1817. Mr. Thos. Morton, a British merchant, who died 11 Sept. 1807, bequeathed a large sum, conditionally, to the Moravians.

**MORDAUNT**, see *Administrations*, 1689.

**MORDEN COLLEGE** (Blackheath), almshouses for decayed merchants, with pensions, established by sir John Morden, 1695; opened, 1702.

**MOREA**, a name given to the Peloponnesus in the 13th century; see *Greece*.

**MORETON BAY** (New S. Wales). The colony founded here in 1859 has since been named *Queensland* (which see).

**MORGANATIC\* MARRIAGES**, between a man of superior and a woman of inferior rank, in which it is stipulated that the latter and her children shall not enjoy the rank or inherit the possessions of the former. The children are legitimate. Such marriages are frequently contracted in Germany by royalty and the higher nobility. It has been asserted that George I. was thus married to the duchess of Kendal; George IV., when prince of Wales, to Mrs. Fitzherbert, "the lass of Richmond-hill"; the duke of Sussex to lady Cecilia Underwood; Frederic VI. of Denmark to the countess of Danner, 7 Aug. 1850; prince Alexander of Hesse to the

countess Julie von Hauke, 1851, from which sprang the Battenberg family, and several Austrian princesses; more recently the grand duke Paul of Russia with Mme. Pistolokors, reported, 2 Dec. 1902. The Royal Marriage Act, 12 Geo. III., chap. ii., "reduces to a position somewhat like that of morganatic unions every marriage in the royal family of Great Britain not previously approved by the sovereign upon the great seal, provided the prince entering upon it is under 25 years of age, and every such marriage of a prince above 25 years of age which is disapproved by parliament." The family of the late duke of Cambridge (died 17 Mar. 1904), who married Miss Farebrother, an actress (died 1900), bear the name of FitzGeorge.

**MORGARTEN** (Switzerland). 1300 Swiss engaged 20,000 Austrians, commanded by the duke Leopold, whom they completely defeated, 15 Nov. 1315, upon the heights of Morgarten, overlooking the defile through which the enemy was to enter their territory from Zug.

**MORLEY HALL** and Welbeck Institute, Regent Street, London, for the Young Women's Christian Association, opened by princess Christian, 22 Nov. 1886.

**MORMONS** (calling themselves the Church of Jesus Christ of the LATTER-DAY SAINTS). This sect derives its origin from Joseph Smith, born at Sharon, Vermont, 23 Dec. 1805, called the Prophet, who announced in 1823, at Palmyra, New York, that he had had a vision of the angel Moroni. In 1827 he announced that he found the book of Mormon, written on gold plates in hieroglyphics. This book was said, by the opponents of the Mormons, to have been written, about 1812, by a clergyman named Solomon Spaulding, as a religious romance in imitation of the scripture style; this is denied by the Mormons, and the discovery of the MS. of that romance by president Fairchild, of Oberlin college, in 1884, supports the Mormons' contention. The distinguishing characteristics of the sect are its belief in a continuous divine revelation through the inspired medium of the prophet at the head of their church, the practice of polygamy, and a complete hierarchial organization, which comprises two priesthoods, the "Melchizedek," or high priesthood, and the "Aaronic or Levitical," the lesser priesthood which ministers in temporal matters. The "First Presidency," composed of the president of the whole church and two counsellors, is the supreme authority. The Mormons command the payment of tithes, and encourage labour. Missionaries are propagating these doctrines in Europe, Australasia, Africa, China, Japan, South America, and other countries. See Hepworth Dixon's "Spiritual Wives"; J. H. Kennedy's "Early Days of Mormonism"; H. H. Bancroft's "History of Utah." The Mormonites organise a church at Kirkland, Ohio 1831  
They found Zion, in Jackson county, Missouri 1831-2

From 1813 to 1839 the sect endured much persecution, and, driven from place to place, was compelled to travel westwards; till the city Nauvoo.

**MORPHIA**, an alkaloid, discovered in opium by Sertürner, in 1803.

**MORPHOLOGY** (Greek, *morphe*, form), the science of form and structure, as distinguished from physiology, studied in the 19th century, by Goethe, Gegenbaur, Haeckel, Huxley, and others.

**MORRIS DANCE**, see *Morice*.

**MORTALITY TABLES** have been frequently compiled. The first by Halley, astronomer-royal, 1693; the Northampton tables (for 1735-80), by Dr. Price; the Carlisle tables (for 1780-87), by Dr. Hailsham; the Equitable table by Davies, 1825; the Institute of Actuaries' table, 1869; Dr. Sprague's tables, 1882; see *Insurance, Annuities, and Bills of Mortality*.

**MORTARS**, a short gun with a large bore, and close chamber, for throwing bombs; said to have been used at Naples in 1435, and first made in England in 1543. The mortar left by Soult at Cadiz in Spain was fixed in St. James's-park in Aug. 1816. On 19 Oct. 1857, a colossal mortar, constructed by Mr. Robert Mallet, was tried at Woolwich; with a charge of 70 lbs. it threw a shell weighing 2550 lbs.  $1\frac{1}{2}$  mile horizontally, and about  $\frac{1}{4}$  mile in height.

**MORTELLA TOWERS**, see *Martello*.

**MORTIMER'S CROSS** (Herefordshire). The earl of Pembroke and the Lancastrians were here severely defeated by the young duke of York, afterwards Edward IV., 2 Feb. 1461. He assumed the throne as Edward IV. in March following.

**MORTMAIN ACTS** (*mort main*, dead hand). When the survey of all the land in England was made by William I., 1085-6, the whole was found to amount to 62,215 knights' fees, of which the church then possessed 28,015, to which additions were afterwards made, till the 7th of Edward I., 1279, when the statute of mortmain was passed, from a fear that the estates of the church might

grow too bulky. By this act it was made unlawful to give any estates to the church without the king's leave; and this act, by a supplemental provision, was made to reach all lay-fraternities, or corporations, in the 15th of Richard II., 1391. Mortmain being such a state of possession as makes property inalienable, it is said to be in a dead hand. Several statutes have been passed on this subject; legacies by mortmain were especially restricted by the 9th Geo. II., c. 36 (1736). Law consolidated and amended 1888; 1891, 1892.

**MOSAIC WORK** (the Roman *opus tessellatum*), is of Asiatic origin, and is probably referred to in *Esther*, ch. i. 6, about 519 B.C. It had attained to great excellence in Greece, in the time of Alexander and his successors, when Sosos of Pergamus, the most renowned Mosaic artist of antiquity, flourished. He acquired great fame by his accurate representation of an "unswept floor after a feast." The Romans also excelled in Mosaic work, as evidenced by the innumerable specimens preserved. Byzantine Mosaics date from the 4th century after Christ. The art was revived in Italy by Tafi, Gaddi, Cimabue, and Giotto, who designed Mosaics, and introduced a higher style in the 13th century. In the 16th century Titian and Veronese also designed subjects for this art. The practice of copying paintings in Mosaics came into vogue in the 17th century; and there is now a workshop in the Vatican where chemical science is employed in the production of colours, and where 20,000 different tints are kept. In 1861, Dr. Salvati of Venice had established his manufacture of "Enamel-mosaics," and in July, 1864, he fixed a large enamel Mosaic picture in one of the spandrels under the dome of St. Paul's cathedral, London. He also executed commissions for queen Victoria and other persons. He died Feb. 1890, aged 74. See *Paul's, St.*, 1896.

**MOSANDRIUM.** See *Philippium*.

**MOSCOW**, the ancient capital of Russia, was founded, it is said, by Dolgorouki, about 1147. The occupation of the south of Russia by the Mongols, in 1235, led to Moscow becoming the capital, and beginning with Jaroslav II., 1238, its princes became the reigning dynasty. In 1325, the metropolitan of Central Russia moved his seat to Moscow, which is regarded as a holy city by the Russians. The city continued to grow in area and political influence, and Ivan III. (1462-1505) assumed the title of Czar of all Russia. Peter the Great, in 1703, founded St. Petersburg, which became the capital of the empire, but Moscow is still regarded by the peasantry as the real capital. The city has suffered greatly from fire, it having been burned nearly to the ground, 1547; it was taken and burned by the khan of the Crimea, 1571; other disastrous fires, 1739, 1748, 1753, and 1812 (see *infra*). Since the last date Moscow has been largely rebuilt. The centre of the city is the Kremlin or Kreml "citadel," which stands on a height, 100 ft. above the river Moskwa, on which Moscow is situated, and is surrounded by a stone wall. Among the notable buildings within the Kremlin are the old palaces of the czars, the imperial palace, built 1849, the new palace, Orushenaya, containing the most valuable Russian antiquities; the cathedral of the Assumption, founded 1326, rebuilt 1475-79; the cathedral of St. Michael, built 1333, restored 1505, in which are interred the czars to the Ivan Alexievitch, brother of Peter the Great; the cathedral of the Annunciation, founded 1489, rebuilt 1554, formerly the private chapel of the czars; the Voznesenski monastery, dating from 1393, where all the czarinas

are buried; the Ivan Veliki tower, 204 ft. high, with a gilded dome, and having at its foot the Kolokoi "king of bells," weighing over 142 tons, the largest bell in the world; the Hall of the Grand; the arsenal, and other buildings. Outside the Kremlin are the cathedral of St. Basil, 1554; the imperial university, founded by the empress Catherine, 1755, with a library of some 200,000 volumes, and a museum; the public museum, 1861; the foundling hospital, erected 1764; the Golitzyn museum, 1865; the observatory, and many monasteries, educational and scientific institutions for which Moscow is noted. The city ranks next to St. Petersburg as an industrial centre, and is the first commercial mart in Russia. Population, 1885, 753,469; 1897, 988,610; 1900, 1,023,817.

**MUSIC.\*** The origin of music is lost in antiquity; among civilised peoples it is probably to be traced to the ancient Egyptian priests, who employed this art in their religious rites and ceremonies. From the Egyptians the Greeks and Romans derived their knowledge of music. The ancient Hebrews probably took with them into Palestine some of the songs they had learned in Egypt. The hymns used in the temple formed the basis of the melodies of the early Christian church, and from these hymns was formulated the first authoritative musical system. "St. Ambrose, abp. of Milan, 374, and Gregory the Great (pope, 590), may be regarded as the fathers of western church music. Isidore, bp. of Seville, 601, mentions harmony, in the modern sense of the word, in his "Sententiæ de Musica." Guido Arentino (died 1050), gave the names *ut (do)*, *re*, *mi*, *fa*, *sol*, *la*, to the notes now universally used; *si* was subsequently added by Le Maire. The foundation of counterpoint was laid by Johannes Ockenheim, or Okeghem (1420-1513), and his pupil, Josquin des Prés (1450-1521); this art attained its perfection under Orlando di Lasso and Palestrina (the pupil of Claude Goudimel (1510-72), the founder of the Roman school), at the end of the 16th century. The compositions of Monteverde (1568-1643) mark the rise of the new school of harmony, which gradually spread throughout Europe, including among its masters Bach and Handel. The aria was introduced by Alessandro Scarlatti (1659-1725), the founder of the Neapolitan school. Opera seria had its inception about 1580 by the Florence Academy, a group of amateurs living in Florence, who met at the house of count Bardi, a Florentine nobleman, with the object of promoting the closer union of poetry and music by the revival of the musical declamation of the ancient Greeks. The French grand opera school was founded, late in the 17th century, by J. B. Lully (1633-87), who composed many operas, ballets, occasional pieces and some church music. Since the middle of the 18th century Germany has held the highest place in music; its many exponents including Beethoven, Weber, Spohr, and Mendelssohn. The later German school had its origin in the 19th century, and claims as its starting-point Beethoven's ninth symphony, in which music and poetry form a perfect whole; Wagner and Litz, "tone poets," have been the chief exponents of this school, "the music of the future." Among the composers of sonatas and allied works are Beethoven, Mozart, Haydn, Schubert, Chopin, Schumann, Mendelssohn, Brahms, Liszt, and Dvorák. Constanza Festa, whose *Te Deum* has

MUSICAL PIRACY first commenced in 1866, when popular copyright songs were printed by unauthorised persons, and sold in the streets at twopence per sheet. Music publishers sustained heavy losses, and in 1902 piracy having assumed such enormous proportions the Musical Copyright Association was formed by the

publishers. As a result of their efforts a bill was passed in the 1902 session of parliament—the Musical Copyright (summary proceedings) Act, 1902. This bill was, to an extent, inoperative, because whilst it enabled publishers to seize pirated music it was shorn of its two most important provisions—the penalty and the search warrant clauses. In 1903 a bill to amend the 1902 act passed the lords, but was "talked out" of the house of commons by Mr. Caldwell, and on December 15, 1903, a committee was appointed by the home secretary to inquire into the subject of music piracy. As a result another bill was drafted, but was "talked out" of the house of commons by Mr. Caldwell, who was a member of the committee. A further effort to legislate on the subject was made in 1905, but again it met with failure. At the end of that year a man named Willetts, known as the "King of the Pirates," and others, were arrested and charged with conspiracy to print and publish copyright music. It was given in evidence that millions of copies of pirated music had been seized by the police, and in the end Willetts was convicted and sentenced to nine months' imprisonment. Others received lighter sentences.

**MYSTICS**, a name given to those theologians who, in addition to the obvious meaning of the Holy Scriptures, assert that there are interpretations to be discovered by means of an emanation of the Divine Wisdom, by which the soul is enlightened and purified; for which purpose they advocate seclusion for contemplation and asceticism.

Mysticism taught at Alexandria by Clemens, Pantænus, Origen, and others, who mingled Christianity and Platonism, 2nd and 3rd centuries.

Much promoted by the works of the pseudo-Dionysius ("The Mystic Theology," &c), 6th century.

Introduced into the Western empire, 9th century.

Eminent mediæval mystics (opposed by the schoolmen), Master Eckhart (1251-1329); John Tauler of Strasburg, where he acted heroically during the plague, termed the "black death" (1290-1361); Henry Suso (1300-65). They aimed at a more spiritual religion than Romanism; but their followers were charged with immorality, pantheism, communism, and maintaining private inspiration.

Jacob Böhme or Behmen, the German mystic, published his "Aurora" (an alleged divine revelation) 1612; died, 18 Nov. 1624.

**NAAS** (E. Ireland). Here a desperate engagement took place between a body of royal forces and the insurgent Irish, 24 May, 1798, during the rebellion. The latter were defeated with the loss of 300 killed and many wounded.

**NABONASSAR**, ERA OF, received its name from the prince of Babylon, under whose reign astronomical studies were much advanced in Chaldaea. The years contain 365 days each, without intercalation. The first day of the era was Wednesday (said, in mistake, to be Thursday, in *L'Art de Vérifier les Dates*), 26 Feb. 747 B.C.—3967, Julian period. To find the Julian year on which the year of Nabonassar begins, subtract the year, if before Christ, from 748; if after Christ, add to it 747.

**NACHOD** (Bohemia). At this place the Prussians, under their crown prince, defeated the Austrians, after a severe conflict, 27 June, 1866. The Prussian Uhlans vanquished the Austrian cavalry.

**NACOLEA** (Phrygia). Near here the usurper Procopius was defeated, and soon afterwards slain by the emperor Valens, 366.

**NAFELS** (Switzerland). Here an Austrian army was defeated by a small body of Swiss, 1388.

**NĀGA**, the name in Hindu mythology of deified serpents, whose king, Sesha, is the sacred serpent of the god Vishnu.

**NAGA HILLS MASSACRE**, see *India*, 1875.

**NAGASAKI**, a city and port of Japan, on the west coast of the island of Kiusiu, with an excellent harbour famous for its beauty. For over 200 years Nagasaki was the only port of Japan in communication with other countries. From 1637 to 1859 Dutch traders were compelled to reside in their factory at Deshima, near the head of the inlet forming the harbour. Nagasaki was one of the 5 ports opened 1859 to the British and Americans. In 1869 it, with 7 other ports, was opened to foreign nations. There is a fine dockyard at Nagasaki, and 8 miles seaward, on an island, is situated the great Takashima coal mine, which gives importance to Nagasaki as a coaling station. Roman Catholic and Protestant missions are strongly represented in the city and its neighbourhood.

**NAG'S HEAD STORY**. Matthew Parker was consecrated archbishop of Canterbury at Lambeth, 17 Dec. 1559, by bishops Barlow, Coverdale, Scory, and Hodgkin. For forty-five years after, the Romish writers asserted that Parker and others had been ordained in an abnormal fashion by Scory at the Nag's Head Tavern, Cheapside. This fiction was refuted by Burnet, and is rejected by Roman Catholic authorities, such as Lingard.

**NAHUM, FESTIVAL OF**. Nahum, the seventh of the twelve minor prophets, about 713 B.C.; the festival is kept by the Eastern church on 1 December.

**NAISSUS** (Moesia). The Goths were defeated near here with great slaughter by the emperor Claudius II., 269.

**NAJARA** or **NAVARETE** (N. Spain). At Logroño, near these places, Edward the Black Prince defeated Henry de Trastámara, and re-established Peter the Cruel on the throne of Castile, 3 April, 1367.

**NAMES**. A Roman citizen had generally three names; *prænomen*, denoting the individual; *nomen*, the gens or clan; *cognomen*, the branch of the clan: sometimes he had the *agnomen* (e.g., Publius Cornelius Scipio Africanus). The popes change their names on their exaltation to the pontificate, "a custom introduced by pope Sergius, whose name till then was Swine-snout," 687. *Platina*. Onuphrius (followed by most of the modern authorities), refers it to John XII., 956; stating that it was done in imitation of SS. Peter and Paul, who were first called Simon and Saul. In France the name given at baptism was sometimes changed. The two sons of Henry II. of France were christened Alexander and Hercules; at their confirmation these names were changed to Henry and Francis. Monks and nuns, at their entrance into monasteries, assume new names. See *Surnames*. Miss Yonge's "History of Christian Names," published 1863 (new edition 1884). M. A. Lower's "Patronymica Britannica," 1860.

**NAMUR**, in Belgium, was made a county in 932; taken by the French, 1 July, 1692; by William of England, 4 Aug. 1695; ceded to the house of Austria by the peace of Utrecht, and garrisoned by the Dutch as a barrier town of the United Provinces in 1715. The city of Namur was ceded to Austria, 1713; taken by the French in 1746, but was restored in 1749. In 1782, the emperor Joseph expelled the Dutch garrison. In 1792 it was again taken by the French, who were compelled to evacuate it in 1793; regained 1794; delivered up to the allies, 1814; assigned to Belgium, 1831. It was a site of a severe conflict in June, 1815, between the Prussians and the French under Grouchy, when retreating after the battle of Waterloo. Population, 1890, 29,794; 1900, 32,223.

**NANCY** (N.E. France), an ancient city, capital of Lorraine, in the 13th century. After taking Nancy, 29 Nov. 1475, and losing it, 5 Oct. 1476, Charles the Bold of Burgundy was defeated beneath its walls, and slain by the duke of Lorraine and the Swiss, 5 Jan. 1477; see *Lorraine*. Nancy was embellished by Stanislas, ex-king of Poland, who resided and died here Feb. 1766. It was captured by Blücher, Jan. 1814, and during the Franco-Prussian War, on the retreat of MacMahon's army, and expecting the German army, surrendered to four Uhlans, 12 Aug. 1870. It was restored at the peace. Population in 1901, 102,463. Prof. Bleicher, eminent scientist, murdered by M. Four, a chemist, who afterwards committed suicide, 8 June, 1901.

Grand fêtes; visits of president Carnot and the grand duke Constantine of Russia, 5-7 June, 1892.

**NANKIN**, said to have been made the central capital of China, 420. It was the court of the Ming dynasty from 1369 till Yung-lo removed it to Peking in 1410. On 4 Aug. 1842, the British ships arrived at Nankin, and peace was made. The rebel

Tae-pings took it on 19, 20 March, 1853. It was recaptured by the Imperialists, 19 July, 1864, and found to be in a very desolate condition. Estimated population, 1,000,000.

**NANTES** (W. France), formerly capital of the Namnetes. The edict in favour of the Protestants issued here by Henry IV., 13 April, 1598, was revoked by Louis XIV., 22 Oct. 1685 (bicentenary celebration, 22 Oct. 1885). Awful cruelties were committed here by the republican Carrier, Oct.-Nov. 1793; see *Drowning*. Population in 1886, 127,482; 1891, 121,054; 1901, 128,349.

**NAPHTHA**, a clear combustible rock oil, known to the Greeks, called "oil of Media," and thought to have been an ingredient in the Greek fire (*which see*). A rich spring struck near Berdiansk, Russia, Oct. 1899; wells found in cis-Caucasia, Aug. 1903. See *Petroleum*.

**NAPIER'S BONES**, see *Logarithms*.

**NAPLES**, formerly the continental division and seat of government of the kingdom of the Two Sicilies, began with a Greek colony named Parthenope (about 1000 B.C.), which was afterwards divided into Paleopolis (the *old*) and Neapolis (the *new city*); from the latter the present name is derived. The colony was conquered by the Romans in the Samnite war, 326 B.C. Naples, after resisting the power of the Lombards, Franks, and Germans, was subjugated by the Normans under Roger Guiscard, king of Sicily, A.D. 1131. Few countries have had so many political changes, and cruel and despotic rulers, or suffered so much by convulsions of nature, such as earthquakes, volcanic eruptions, &c. The eldest son of the king of Italy is styled prince of Naples. In 1856, the population of the kingdom of Naples was 6,886,030, of Sicily 2,231,020; total, 9,117,050. It now forms part of the revived kingdom of Italy. Population of the province in 1901, 1,135,906; of the city in 1901, 563,751.

**NATIONAL ASSEMBLY, FRENCH.** Upon the proposition of the abbé Siéyès, the states-general of France constituted themselves the National Assembly, 17 June, 1789. On the 20th the hall of this new assembly was shut by order of the king; upon which the deputies of the *tiers état* repaired to the *Jeu de Paume*, or Tennis-court, and swore not to dissolve until they had digested a constitution for France. On the 22nd they met at the church at St. Louis. This assembly abolished the state religion, annulled monastic vows, divided France into departments, sold the national domains, established a national bank, issued assignats, and dissolved itself 21 Sept. 1792; see *National Convention*. In 1848 the legislature was again termed the National Assembly. It met 4 May, and a new constitution was proclaimed, 12 Nov. A new constitution was once more proclaimed by Louis Napoleon in Jan. 1852, after dissolving the National Assembly, 2 Dec. 1851. The present French National Assembly was elected 8 Feb., and met 12 Feb. 1871; new constitution adopted, 25 Feb. 1875; see *France*.

**NATIONAL ASSEMBLY, GERMAN,** see *Germany*, 1848.

**NATIONAL ASSOCIATIONS.** One was formed in 1584, headed by the earl of Leicester, to protect queen Elizabeth from assassination, in consequence of the discovery of various plots. Another was proposed in the house of commons, in Feb. 1696, by sir Rowland Gwyn, for the defence of the person and government of William III. soon after the discovery of the assassination plot (*which see*). The members of both houses of parliament and the majority of the male population joined it immediately; all persons holding office under government were required to be members; see *Aid to Sick and Wounded, Artillery, Arts, Colonies, Education, Employers, Farmers, Social Science, Tuberculosis, and Volunteers*.

**NATIONAL CONVENTION OF FRANCE,** constituted in the hall of the Tuileries 17 Sept., and formally opened 21 Sept. 1792, when M. Grégoire, at the head of the National Assembly, announced that that assembly had ceased its functions. It was then decreed, "That the citizens named by the French people to form the National Convention, being met to the number of 371, after having verified their powers, declare that the National Convention

is constituted." This convention continued until a new constitution was organised, and the executive directory was installed at the Little Luxembourg, 1 Nov. 1795; see *Directory*. The charters (*which see*) in England formed a national convention in 1839.

**NATIONAL COUNCIL OF THE EVANGELICAL FREE CHURCHES** popularly known as "The Free Church Council," originated in an article by dr. Guinness Rogers in the *Methodist Times*, 20 Feb. 1890. The idea of the article, for the federation of the nonconformist bodies to promote their common interests, took practical shape, and the first free church congress was held at Manchester, 7 Nov. 1892. The second congress took place at Leeds, March, 1894, when it was determined that each congress should have an official president, dr. Berry being the first elected to hold that office. Since that date the congress has been held annually. The objects of the national council are "to facilitate intercourse and co-operation among the evangelical free churches; to assist in the organization of local councils; to encourage devotional fellowship and mutual counsel concerning the spiritual life and religious activities of the churches; to advocate the New Testament doctrine of the church, and to defend the rights of the associated churches; to promote the application of the law of Christ in every relation of human life." Among prominent past and present leaders of the movement have been and are dr. Clifford, rev. F. E. Meyer, the late dr. Guinness Rogers, the late rev. H. Price Hughes, dr. Munro Gibson, dr. Fairbairn, rev. J. Scott Lidgett (president 1906-7), rev. T. Lay (the secretary), the late dr. Dale, the late dr. Parker, the late dr. Berry, dr. Townsend, dr. A. McLaren, Messrs. G. Cadbury, R. W. Perks, M.P., Evan Spicer, J. Rutherford, and other prominent nonconformists. In addition to social organizations, "free church lectures" on the history and principles of nonconformity are given. The free church council has taken a very active part in the nonconformist agitation against the education act of 1902, and that for London 1903, and also in the passive resistance movement (*which see*). Offices, Memorial hall, Farringdon-street, E.C.

**NATIONAL DEBT.** In 1693 an excise act was passed, granting duties for carrying on the war with France; the act also secured certain recompenses and advantages to such persons as should collectively advance 1,000,000*l.* for the same purpose; this sum was speedily subscribed. The permanent debt began by the establishment of the Bank of England in 1694, mainly through the exertions of Charles Montague, afterwards earl of Halifax, under the condition of its lending money to the government on interest, the repayment of the principal not to be demanded. The rapid growth of the debt was mainly caused by foreign wars, and its reduction was continually demanded. See *Stocks, Sinking Fund, and Loan Loans*. **NATIONAL GUARD OF FRANCE** was instituted by the Committee of Safety at Paris on 13 July, 1789 (the day before the destruction of the Bastille), to maintain order and defend the public liberty. Its first colours were blue and red, to which white was added, when its formation was approved by the king. Its action was soon paralysed by the revolution, and it ceased altogether under the consulate and empire. It was revived by Napoleon in 1814, and maintained by Louis XVIII., but was broken up by Charles X., after a tumultuous review in 1827. It was revived in 1830, and helped to place Louis Philippe on the throne. In 1848 its reconstitution and its enlargement from 80,000 to 100,000 men led to the frightful conflict of June, 1848. Its constitution was entirely changed in Jan. 1852, when it was subjected entirely to the control of the government. Formerly it had many privileges, such as choosing its own officers, &c. In consequence of the defection of part of the National Guard and the incompetency of the rest during the outbreak in Paris in 1871, its gradual abolition was decreed by the national assembly at

Versailles (488-154), 24 Aug. 1871. The disarmament began in September. National Guard established in Spain, Naples, and other parts during the nineteenth century.

(see *Christmas*); the Nativity of the Virgin Mary, not observed by the protestants at all. Pope Sergius I., about 690, established the latter, but it was not generally received in France and Germany till about 1000; nor by the eastern Christians till the 12th century. The festival of the nativity of St. John the Baptist, 24 June, Midsummer-day, is said to have been instituted in 488.

**NATURAL HISTORY** was studied by Solomon, 1014 B.C. (1 *Kings* iv. 33); Aristotle (384-322 B.C.); by Theophrastus (394-297 B.C.); and by Pliny (23-79 A.D.); see *Botany, Zoology, British Museum*, &c.

**NATURAL PHILOSOPHY**, see *Philosophy*.

**NATURAL SELECTION**, see *Species*.

**NATURALIZATION** is defined to be "the making a foreigner or alien a denizen or freeman of any kingdom or city, and so becoming, as it were, both a subject and a native of a king or country that by nature he did not belong to." The first act of naturalization passed in 1437; and various similar enactments were made in most of the reigns from that time; several of them special acts relating to individuals. An act for the naturalization of the Jews passed May, 1753, but was repealed in 1754, on the petition of all the cities in England; see *Jews*, for the privileges since granted them. The act for the naturalization of prince Albert passed 3 Vict., 7 Feb. 1840. A committee to inquire into the naturalization laws, appointed May, 1868, earl of Clarendon chairman, met 25 Oct. 1868; reported about Feb. 1869; and new acts for this purpose were passed 12 May, 1870, and 25 July, 1872. In 1870 there were about 9500 Americans in England, and about 2,500,000 British subjects in the United States of America. By the new act the latter were enabled to renounce their allegiance; and by the convention signed 3 Feb. 1871, the nationality of British subjects was made dependent on choice and not on birth. Naturalization (abroad) act passed, 6 July, 1895.

Committee on naturalization's report issued, with suggestions, see *Times* leader, 3 Oct. 1901.

**NATURALISM**, a realistic style in literature, mainly introduced by Balzac, 1829 *et seq.* "Naturalism" is now defined as the knowledge of phenomena, and the laws by which they are connected, but nothing more. Some writers combine with naturalism, agnosticism, positivism, and empiricism (*which see*).

"Naturalism and Agnosticism," the Gifford lectures, 1896-8, 2 vols., by prof. James Ward, published 1899, in which he opposes the mechanical view of nature, viz. *naturalism*, and insists upon the recognition of mind as the animating principle. Edmond and Jules de Goncourt published "Medical and Physiological Novels," 1846 *et seq.* Emile Zola, in his "Rougon-Macquart" series, 1871 *et seq.*, portrayed deformed and diseased rather than true nature. A dramatised form of his "Assommoir," entitled "Drink," had a long run in London in 1879, and is (1906) still played at intervals.

**NATURE**, a weekly illustrated journal of science, first appeared 4 Nov. 1869; editor, Mr. (afterwards sir) Joseph Norman Lockyer, F.R.S. Mr. Alex. Macmillan, one of the founders, born 1818, died 25 Jan. 1896.

*La Nature* (founded and edited by M. Gaston Tissandier, died Sept. 1899; see *Balloons*) appeared in 1892.

**NATURE PRINTING.** This process consists in impressing objects, such as plants, mosses, feathers, &c., into plates of metal, causing these objects, as it were, to engrave themselves; and afterwards taking casts or copies fit for printing from. Knipphoff, of Erfurt, between 1728 and 1757, produced his *Herbarium vivum* by pressing the plants themselves (previously inked) on paper; the impressions being afterwards coloured by hand. In 1833, Peter Kyhl, of Copenhagen, made use of steel rollers and lead plates. In 1842 Mr. Taylor printed lace. In 1847 Mr. Twining printed ferns, grasses, and plants; and in the same year Dr. Branson suggested the application of electrotyping to the impressions. In 1849, professor Leydolt, of Vienna, by the able assistance of Mr. Andrew Worrington, obtained impressions of agates and fossils. The first practical application of this process is in Von Heuffler's work on the mosses of Arpach, in Transylvania; the second (the first in this country) in "The Ferns of Great Britain and Ireland," edited by Dr. Lindley, the illustrations to which were prepared under the superintendence of Mr. Henry Bradbury in 1855-56, who also in 1859-60 printed "The British Sea-weeds," edited by W. G. Johnstone and Alex. Croall. The process was applied to butterflies by Joseph Merrin of Gloucester, in 1864.

**NAVIGATION LAWS.** A code of maritime laws is attributed to Richard I. of England, said to have been decreed at the isle of Oleron, 1194, and further enactments were made by

Richard II. in 1381.—In Oct. 1651, the parliament passed an act entitled "Goods from foreign parts, by whom to be imported," the principles of which were affirmed by 12 Charles II. c. 18, "an act for the encouraging and increasing of shipping and navigation" (1660). The latter act restricts the importation and exportation of goods from or to Asia, Africa, or America, to English ships, of which the masters and three-fourths of the mariners are to be English. This was followed by many acts of similar tenor; which were consolidated by 3 & 4 Will. IV. c. 54 (1833). These acts were in the whole or in part repealed by the act "to amend the laws in force for the encouragement of British shipping and navigation" (passed 12 & 13 Vict. c. 29, 26 June, 1849, after much opposition), and which came into operation 1 Jan. 1850. The steam navigation act passed 14 & 15 Vict. c. 79, 1851, same into operation 1 Jan. 1852. The act regulating the navigation of the river Thames was passed in 1786.—In Feb. 1865 the emperor recommended the modification of the French navigation laws; in Feb. 1872, new restrictions were laid upon foreign ships, chiefly affecting British.

**NAVIGATORS** (or *Navvies*). These helped in the construction of railways probably derived their name (about 1830) from formerly making the inland navigation in Lincolnshire, &c., and are doubtfully said to be descendants of the original Dutch canal labourers. NAVAL SALUTE TO THE BRITISH FLAG began in Alfred's reign, and though sometimes disputed, may be said to have been continued ever since. The Dutch agreed to strike to the English colours in the British seas, in 1572. The honour of the flag salute at sea was also formally assented to by France in 1704, although it had been long previously exacted by England; see Flag and Salutes at Sea.

**NAVAL UNIFORMS.** The first notice of the establishment of a uniform in the British naval service, which we have met with, occurs in the *Jacobite's Journal* of 5 March, 1748, under the head of "Domestic News," in these terms:—"An order is said to be issued, requiring all his majesty's sea-officers, from the admiral down to the midshipman, to wear a uniformity of clothing, for which purpose pattern coats for dress suits and frocks for each rank of officers are lodged at the Navy-office, and at the several dockyards for their inspection." This is corroborated by the *Gazette* of 13 July, 1757, when the first alteration in the uniform took place, and in which a reference is made to the order of 1748, alluded to in the journal above mentioned, and which in fact is the year when a naval uniform was first established. James I. had indeed granted, by warrant of 6 April, 1609, to six of his principal masters of the navy, "liverie coats of fine red cloth." The warrant is stated to have been drawn *verbatim* from one signed by queen Elizabeth, but which had not been acted upon by reason of her death. This curious document is in the British Museum; but king James's limited red liverie is supposed to have been soon discontinued.—*Quarterly Review*. An act respecting them was passed in 1894.

**NAVY PAY OFFICE**, organised in 1644, was abolished in 1836, when the army and navy pay departments were consolidated in the Paymaster General's office.

**NAVY LIST** was first officially compiled by John Finlason, the celebrated actuary, and published monthly in 1814 *et seq.*; Lean's "Royal Navy List" is published quarterly.

**NAVAL REVIEWS.** Queen Victoria reviewed the fleet at Spithead, near Portsmouth, 11 Aug. 1853; again, March, 1854, before it sailed to the Baltic, at the commencement of the Russian war; and again, at Portsmouth, on the conclusion of peace, in the presence of the parliament, &c. The fleet extended in an unbroken line of 5 miles, and consisted of upwards of 300 men-of-war, carrying 3800 guns, and manned by 40,000 seamen. There were about 100,000 spectators, 23 April, 1856.

**NAVY VOLUNTEERS (or Reserve).** By 16 & 17 Vict. c. 73 (1853), the admiralty were empowered to raise a body of sea-faring men to be called the "Naval Coast Volunteers," not to exceed 10,000, for the defence of the coast, and for actual service if required. In 1859, acts were passed to enable the admiralty to raise a number of men, not exceeding 30,000, as a reserve force of seamen, to be called the "Royal Naval Volunteers." In November following, the admiralty issued a statement of the "qualifications, advantages,

and obligations" of this reserve. The enrolment commenced on 1 Jan. 1860. The engagement is for five years, and the volunteers are entitled to a pension when incapacitated after the expiration of the term. At the prospect of war with the United States in Dec. 1861, a great number of seamen at Hartlepool, Dundee, London, Aberdeen, &c., offered their services. About 24,000 men, in 1867; 29,500 in 1905. Royal Fleet Reserve, total 12,750. Naval Volunteers Reserve act, 21 July, 1902. By this act the naval volunteers are subject to all regulations made with regard to them by the admiralty; if called out for active service they are liable to serve either ashore or afloat. **NAVY OF FRANCE.** It is first mentioned in history, 728, when, like that of England at an early period, it consisted of galleys; in this year the French defeated the Frisian fleet. The French fleet was almost annihilated by Edward III. at the battle of Sluys, 24 June, 1340. It was considerably improved under Louis XIV. at the instance of his minister Colbert, about 1697. The French navy was in its splendour about 1781; became greatly reduced in the wars with England; see *Naval Battles*. It was greatly increased by the emperor Napoleon III., and in 1859 consisted of 51 ships of the line (14 sailing vessels and 37 steamers), and 308 other vessels, in all 449; including vessels building, converting, or ordered to be built. The new French iron-clad frigate *Gloire*, constructed by M. Dupuy de Lôme, launched in 1860, was generally considered as successful. The *Solférino* and *Magenta* were launched in June, 1861; other iron vessels since. The *Magenta* was destroyed by fire, 6 killed, 31 Aug. 1875. The *Devastation*, a great iron-clad, launched at Lorient, 19 Aug. 1879. The Supreme Navy Council was created by decree, 6 Dec. 1889. Navy league, founded 12 May, 1899. See *Navies (Foreign)*.

**NEBULÆ**, the luminous cloudlike mist visible to the naked eye in some constellations, such as Orion, in others only by powerful telescope; much studied by astronomers, and formerly considered to be clusters of stars. Halley gave a list of 6 nebulae, with a theory, in 1716. Messier, in 1784, gave 103. Sir Wm. Herschel discovered more than 2,500, and sir John Herschel more than 2,000; 7,840 known up to 1887; Dr. Dreyer's index catalogue gives 1,529, published total, 9,369, 1895. Nebulae proper are classified as annular, elliptic, spiral, planetary, and nebulous. Their spectrum consists usually of a few bright lines indicative of their gaseous structure.

The *Nebular Hypothesis* put forth by Laplace in his "Système du Monde," 1796, supposed that the solar system was evolved mechanically from a vast diffused revolving nebula, and that nebulae were the early stages in the formation of planets and their satellites, by cooling, condensation, and contraction. This theory was adopted by sir William Herschel, and though at first opposed, is now generally accepted in a modified form. Mr. Lassell scrutinized the dumb-bell nebula in Orion, and reported that the bright parts did not appear to be stars, Oct. 1860. Dr. Wm. Huggins reported his analyses of certain nebulae by their spectra, and believed them to be gaseous, 1865.

For sir Norman Lockyer's theory see under *Meteors*, 17 Nov. 1887.

Mr. Wm. Ford Stanley's "Notes on the Nebular Theory," a full work, published 1895.

Prof. Max Wolf, of Heidelberg, discovered a fine cluster in *Coma Berenices*, April, 1901.

### NECROMANCERS, see *Magie*.

**NECTARINE**, the *Amygdalus Persica*, originally came from Persia about 1562. Previously, presents of nectarines were frequently sent to the court of England from the Netherlands; and Catherine, queen of Henry VIII., distributed them among her friends.

**NEEDLES.** "The making of Spanish needles was first taught in England by Elias Crowe, a German, about the eighth year of queen Elizabeth, and in Queen Mary's time there was a negro who made fine Spanish needles in Cheapside, but would never teach his art to any."—*Stow*. The manufacture was greatly improved at Whitechapel, London; Redditch, in Gloucestershire, and Hathersage, in Derbyshire. An exhibition of ancient needlework was formed at South Kensington Museum in 1873. Royal school of art (started 1872); new building erected at cost of 52,000*l.* (10,000*l.* from Mr. Edw. Stern). Opened by the princess of Wales, 29 April, 1903.

**NEEDLE-GUN** (*Zündnadelgewehr*), a musket invented by J. N. Dreyse of Sömmerda, about 1827, and made a breech-loader in 1836, which was adopted by the Prussian general Manteuffel about 1846. It was found to be a most effective weapon in the war with Denmark in 1864, and in that with Austria in 1866. The ignition of the charge is produced by a fine steel rod or needle being pressed through the cartridge. The principle is claimed for James Whitley, of Dublin, 1823; Abraham Mosar, 1831; and John Hanson, of Huddersfield, 1843.

Le Verrier, who had conjectured from the anomalous movements of Uranus that a distant planet might exist nearly in the position where Neptune was situated. Calculations to the same effect had been previously made by Mr. J. Couch Adams, of Cambridge; but unfortunate delays occurred in their publication, and also of professor Challis's consequent discovery of the planet. The Royal Society of London awarded its gold medal to both astronomers as equals in the theoretical discovery. A satellite of Neptune was discovered by Mr. Lassell on 10 Oct. following. Neptune is said to have been seen by Lalande, and thought to be a fixed star. The Greek god Poseidon became the Roman Neptune. Prof. J. C. He and the allies however gave it to Frederick I. of Prussia with the title of prince. In 1806 the principality was ceded to France, and Napoleon bestowed it on his general Berthier, who held it till 1814, when it fell to the disposal of the allies. They restored the king of Prussia with the title of prince with certain rights and privileges; but constituted it a part of the Swiss confederation. **NEW COLLEGE** (St. John's Wood, London), erected by the Independent dissenters for the education of their ministers, 1850-1, was formed by the union of Homerton, Highbury, and Coward colleges.

**NEW DEPARTURE DEMOCRATS**, see *United States*, 1871.

**NEW ENGLAND** (N. America). The first settlement made in 1607, was named New England by captain Smith, in 1614. A band of 102 Puritans, now termed the "Pilgrim Fathers" (with 28 women), arrived here in the *May Flower*, and founded the settlement on Plymouth Rock, 25 Dec. 1620, which was named New Plymouth. This was the nucleus of Massachusetts, from whence were gradually developed New Hampshire, Vermont, Connecticut, and Rhode Island. In 1643 these settlements formed the first American confederation, a defensive union, with a constitution based on the Mosaic law, governed by a religious aristocracy, which lasted till 1693. Maine was made an independent state in 1820.

**NEW FOREST** (Hampshire), was made ("afforested") by William the Conqueror, 1079-85. It is said that the whole country, for thirty miles in compass, was laid waste. William Rufus was killed in this forest by an arrow shot by Walter Tyrrel, that accidentally glanced against a tree, 2 Aug. 1100, the site of which is now pointed out by a triangular stone. The New Forest Deer Removal act was passed 14 & 15 Vict. c. 76, 7 Aug. 1851. Agitation for the preservation of this forest, autumn, 1870. In accordance with an act passed in 1877, the forest is now managed by a court of Verderers as a public pleasure ground, and cattle farm. New Forest (sale of lands for public purposes) act passed, 24 July, 1902. See *Forests*.

**NEWFOUNDLAND** (N. America), said to have been discovered by John Cabot, who called it *Prima Vista*, 24 June, 1497. It was formally taken possession of by sir Humphry Gilbert, 1583. In the reign of Elizabeth other nations had the advantage of the English in the fishery. In 1577 there were 100 fishing vessels from Spain, 50 from Portugal, 150 from France, and only 15, but of larger size, from England.—*Hakluyt*. But the English fishery in some years afterwards (1625) had increased so much that the ports of Devonshire alone employed 150 ships, which sold their fish in Spain, Portugal, and Italy. The sovereignty of England was recog-

nized in 1713, by the treaty of Utrecht, certain rights on the "French shores" being reserved for France. Newfoundland obtained the privilege of a colonial legislature in 1832; and the bishopric was established in 1839. Population, 1884, 197,335; 1901, 220,249. Capital, St. John's; population, 1905, 29,594. Appalling fire at St. John's, a great portion of the town destroyed, the loss estimated at 1,000,000. sterling, 9 June, 1846. On 14 Jan. 1857, a convention was concluded between the English and French governments, confirming certain French privileges of fishery in exchange for others. The English colonists were dissatisfied with this convention. Newfoundland refused union with the dominion of Canada, March, 1869; a railway from St. John's to St. George's bay, proposed by the colonial government Aug. 1878. Governor, sir G. Wm. des Vœux, Feb. 1886; sir J. Terence N. O'Brien, Nov. 1888; sir H. H. Murray, Sept. 1895; sir Henry McCallum, 1899; sir Cavendish Boyle, Jan. 1901; sir Wm. MacGregor, July, 1904. See *Canada*, Nov. 1877. "A History of Newfoundland," by Judge D. W. Prowse, published, May, 1895.

**Fishery Dispute**. At Fortune bay, U.S., fishers fixed nets on Sunday, 13 Jan. 1878; this being contrary to local regulations, they were forcibly removed; controversy ensued; Mr. Everts on part of U.S. government sent despatch, 24 Aug.; correspondence, Sept.-Oct.; the marquis of Salisbury refused compensation; but earl Granville granted it; 15,000. were awarded by arbitration

NEWGATE, LONDON. The PRISON derived its name from the gate, to which was attached a small prison, gradually enlarged. One was erected in 1086 by the bishop of London. It was used as a prison for persons of rank as early as 1218; but was rebuilt about two centuries afterwards by the executors of Sir Richard Whittington, whose statue with a cat stood in the niche till the time of its demolition by the great fire of London, in 1666. It was then reconstructed; but becoming an accumulation of misery and inconvenience, was pulled down and rebuilt between 1778 and 1780. During the riots in 1780, the interior was destroyed by fire, but shortly afterwards restored. In 1857 the interior was pulled down to be re-erected on a plan adapted to the reformatory system. Newgate was disused as an ordinary prison, 31 Dec. 1881. Building demolished 1902-3. Sale of fittings and relics

It was frequently visited by the Dutch in the 17th century. They established a colony and erected a fortress, named Dubus, on the S.W. coast, in 1828, which was unsuccessful; and removed in 1835. A lofty range of mountains was named after capt. Owen Stanley, who first saw them from his vessel on sea about 1849. See *German New Guinea*.

**NEWMARKET** (Cambridgeshire), renowned for its horse-races. It is first mentioned in 1227; and probably derived its name from the market then recently established. James I. erected a hunting seat here, called the king's house, to which Charles I. was taken as a prisoner in 1647, when the parliament army was quartered in the neighbouring village of Kennet. Charles II., who was fond of racing, built a stand-house for the sake of the diversion, about 1667,\* and from that period races have been annual to the present time; and many extraordinary races have been run; see *Races*. New Orleans was surrendered to the Federals in April, 1862. The strong feeling of the inhabitants in favour of the Confederates and against the Federals induced general B. Butler to rule them with military rigour, occasionally degenerating into brutal tyranny, especially towards females, May to October, 1862. He was replaced by general Banks, 16 Dec. 1862. Sanguinary riots, due to agitators, begun 30 July, 1866, only suppressed by martial law—about 40 persons, white and coloured, were killed, and about 160 wounded;

\* During the races, on 22 March, 1683, Newmarket was nearly destroyed by an accidental fire, which occasioned the hasty departure of the company then assembled, including the king, the queen, the duke of York, the royal attendants, and many of the nobility; and to this disaster historians have ascribed the failure of the Rye house plot, the object of which was said to be the assassination of the king and his brother on the road from Newmarket to London, if the period of their journey had not been thus anticipated; see *Rye House Plot*.

**CHARTIST RIOTS**.—About 10,000 chartists (*which see*), from the neighbouring mines, armed with guns, pikes, &c., arrived at Newport, 4 Nov. 1839. They divided themselves into two bodies—one, under the command of Mr. John Frost, an ex-magistrate, proceeded down the principal street; whilst the other, headed by his son, took the direction of Stow-hill. They met in front of the Westgate hotel, where the magistrates were assembled with about 30 soldiers of the 45th regiment, and several special constables. The rioters broke the windows and fired on the inmates, by which the mayor, Mr. (afterwards sir Thomas) Phillips, and several other persons were wounded. The soldiers returned the fire, and dispersed the mob, which fled, leaving about 20 dead, and others wounded. A detachment of the 10th royal hussars arrived from Bristol, and the town became tranquil.

Frost was apprehended on the following day, together with his printer, and other influential persons among the chartists. He and others were tried and sentenced to death (afterwards commuted to transportation) Jan. 1840

This artificial river, which rises in Hertfordshire,\* and which, with its windings, then forty-eight miles long, was brought to London, and opened 29 Sept. 1613. So little was the benefit of it understood, that for above thirty years the seventy-two shares (equally divided into *King's* and *Adventurers'*), netted only 5l. apiece. ROYAL NEWSPAPER PRESS FUND, established 1860.

**NEW STYLE.** Pope Gregory X. to rectify the errors of the current calendar a new one, in which ten days were 5 Oct. 1582, becoming 15 Oct. The new style was adopted in France, Italy, Spain, Denmark, Flanders, Portugal, in 1582, in Germany in Switzerland in 1583 and 1584, in 1587; in Scotland in 1600, and in England in 1752 eleven days were left out of the 3 Sept. being reckoned as 14 Sept. T. between the old and new style up to 1752; after 1700, 11 days; after 1800, 13 days. In Russia, throughout the East, the old style is still in use. 1 Jan. 1905, was O.S. 14 Jan. See *Calendar*.

**NEW TESTAMENT,** see *Bible*.

**NEWTONIAN PHILOSOPHY.** Newton's trines respecting gravitation, &c., as Isaac Newton in his "Principia," 1687; see *Gravitation*. He was born 25 Dec. 1642, became master of the mint, 1699; president of the Royal Society, 1703; and died 20 Mar. 1726. His statue of him in marble by Koubiliak is in Trinity College, Cambridge, 14 July, 1726, in bronze by Theed, at Grantham, 21 July, 1726, when lord Brougham delivered a discourse on the life and works of Newton. The latter was 1600*l.*, a sum obtained by public subscription.

**NEWTOWNBARRY RIOT (S. Wales).** At a seizure of stock for tithes, a riot here between the yeomanry and the poor, thirty-five persons were killed or wounded in 1831. The jury at the inquest were unanimous on a verdict.

**NEWTOWN-BUTLER (N. Ire.).** On 30 July, 1689, the Eniskilleners and the Hamiltons thoroughly defeated the

James II. commanded by general Maccarty, taking him prisoner with his artillery, arms, and baggage.

**NEW YEAR'S DAY, &c.** The beginning of the Jewish year was changed and the passover instituted, 1491 B.C. A feast is said to have been instituted by Numa, and dedicated to Janus (who presided over the new year), 1 Jan. 713 B.C.

On this day the Romans sacrificed to Janus a cake of sifted meal, with salt, incense, and wine; and all the mechanics began something of their art of trade; the men of letters did the same, as to books, poems, &c.; and the consuls, though chosen before, took the chair and entered upon their office this day. Nonius Marcellus refers the origin of NEW-YEAR'S GIFTS among the Romans to Titus Tatius, king of the Sabines, who having considered as a good omen a present of some branches cut in a wood consecrated to Strenia, the goddess of strength, which he received on the first day of the new year, authorised the custom afterwards, and gave these gifts the name of Strenæ, 747 B.C.

**NEW YORK,** the "empire state" of the United States of N. America, is said to have been discovered by Verrazano, a Florentine in the French service, about 1524, and rediscovered by Hudson, an Englishman in the Dutch service, in 1609, and settled by the Dutch in 1614, the city being named Manhattan and New Amsterdam; but the English under colonel Nichols dispossessed them and the Swedes, 27 Aug. 1664, and changed its name, the king, Charles II., having given the territory to his brother, the duke of York. **NEY'S EXECUTION.** Ney, duke of Elchingen, prince of the Moskwa, and one of the most valiant of the marshals of France, was shot as a traitor, 7 Dec. 1815. On 7 Dec. 1853, his statue was erected on the spot where he fell.

After the abdication of Napoleon I., 5 April, 1814, Ney took the oath of allegiance to the king, Louis XVIII. On Napoleon's return to France from Elba, he marched against him; but his troops deserting, he regarded the cause of the Bourbons as lost, and opened the invader's way to Paris, March, 1815. Ney led the attack of the French at Waterloo, where he fought in the midst of the fray, his clothes pierced with bullet-holes, five horses having been shot under him; night and defeat obliged him to flee. Though included in the decree of 24 July, 1815, which guaranteed the safety of all Frenchmen, he was sought out, and on 5 Aug. taken at the castle of a friend at Urtillac, and brought to trial before the Chamber of Peers, 4 Dec. The 12th article of the capitulation of Paris, fixing a general amnesty, was quoted in his favour in vain.

**NIAGARA (N. America).** At the head of this river, on the western shore, is Fort Erie, which was taken by the English, 24 July, 1759. It was abandoned in the war with the United States, 27 May, 1813, but was retaken, 19 Dec. following. A suspension bridge of a single span of 820 feet over the Niagara, connecting the railways of Canada and New York, was opened in March, 1855. It is elevated 18 feet on the Canadian, and 28 feet on the American side; superseded by a great new steel arch bridge, last panel fitted, 28, 29 March, 1897, a great engineering feat, constructed by the Pennsylvania steel company for the Canadian and New York incorporations. There are at present four bridges crossing the river.

About eighteen miles below Fort Erie are the remarkable falls. The river is here 740 yards wide; the half-mile immediately above the cataracts is a rapid, in which the water falls 58 feet; it is then thrown, with astonishing grandeur, down a stupendous precipice of 150 feet perpendicular, in three distinct and collateral sheets; and, in a rapid that extends to the distance of nine miles below, falls nearly as much more. The river then flows in a deep channel till it enters lake Ontario, at Fort Niagara.

It became the residence of the kings of Bithynia about 208 B.C. At the battle of Nice, A.D. 194, the emperor Severus defeated his rival, Pescennius Niger, who was again defeated at Issus, and soon after taken prisoner and put to death. The first general council was held here 19 June to 25 Aug. 325, which adopted the **NICENE CREED** and condemned the Arians. It was attended by 318 bishops from divers parts, who settled both the doctrine of the Trinity and the time for observing Easter. An addition was made to the creed, 381; was rejected, 431. See *Filioque*. When the Crusaders took Constantinople, and established a Latin empire there in 1204, the Greek emperors removed to Nice and reigned there till 1261, when they returned to Constantinople; see *Eastern Empire*. **NILE** (Egypt). The longest river in Africa, formerly considered to have its rise in what were termed "the mountains of the moon." The travels of Bruce were undertaken to discover the source of the Nile. He set out from England in June, 1768; on the 14th of November, 1770, discovered the source of the Blue Nile in lake Tana, and returned home in 1773. The Nile overflows regularly every year, from about the 15th of June to the 17th of September, when, having given fertility to the land, it begins to decrease. The first Nilometer (a pillar) is said to have been set up by Osirtasen III., a king of the XII. dynasty, 2,300 B.C.: One was set up by Solyman the Caliph, 715 A.D. In 1829, the inundations of the Nile rose to 26 instead of 22, by which 30,000 people were drowned and immense property lost. Stanley, in his book, "Darkest Africa," published June, 1890, expressed his opinion that the newly-discovered lake Albert Edward Nyanza, at the head of the Semliki river which is fed by the snows of the mighty Ruwenzori range (possibly the mountains of the moon mentioned by Ptolemy the geographer in the 2nd century A.D.), is the real source of the Nile.

**NILE, BATTLE OF THE** (or Aboukir), 1 Aug. 1798, near Rosetta, between the French fleet under Brueys, and the British under sir Horatio Nelson. Nine of the French line-of-battle ships were taken, two were burnt, and two escaped. The French ship, *L'Orient*, with Brueys and 1000 men on board, blew up, and only 70 or 80 escaped. Nelson's exclamation upon commencing the battle was, "Victory or Westminster Abbey!"

**NIMEGUEN** (Holland). Here was signed the treaty of peace between France and the United Provinces, 1678. The French were successful against the British under the duke of York, before Nimeguen, 28 Oct. 1794; were defeated by them 3 Nov.; but gained the place 8 Nov. Population, 1890, 32,618, 1900, 44,043.

**NINETEENTH CENTURY AND AFTER.** a magazine open to writers of totally different opinions; first appeared, March, 1877; introductory sonnet written by lord Tennyson; editor, sir James Knowles (K.C.V.O.), 6 Dec. 1903.

**NINEVEH**, the capital of the Assyrian empire (see *Assyria*), founded by Ashur about 2245 B.C. The empire fell when Nebuchadnezzar captured

Nineveh 606 B.C. The discoveries of Layard and others since 1839, in the neighbourhood of Mosul, at Koyunjik, the site of the ancient Nineveh, and other places, have in a manner disinterred and re-peopled a city which for centuries had ceased to figure on the page of history. Botta commenced his explorations at Khorsabad in 1843, and published his great work "Monuments de Ninive," 1849-50. In 1848 Mr. (after sir, K.C.B.) Austen Henry Layard, published his "Nineveh and its Remains," and in 1853 his "Discoveries," in his second visit in 1849-50. He was born 5 March, 1817, and died 5 July, 1894. See Gladstone, 1868, ambassador at Constantinople, 1877-80. Mr. Hormusd Rassam, in 1854, discovered an ancient palace. Mr. George Smith described his excavations and their results in 1873-4, in "Assyrian Discoveries," 1875. He died at Aleppo, 19 Aug. 1876. See *Assyria*. Mr. Rassam, appointed his successor, among other valuable discoveries at Balawat, nine miles N.E. of Nimroud, and at Koyunjik, &c., found a bronze monument with inscriptions recording the names, title, genealogy, and exploits of king Assur-nazir-pal (B.C. 885-860), builder of the palaces and temples of Kalakh, the capital of the middle Assyrian empire. Mr. Rassam arrived in London with collections, Dec. 1882.

The forms, features, costume, religion, modes of warfare, and ceremonial customs of its inhabitants stand before us as distinct as those of a living people; and by help of the sculptures and their cuneiform inscriptions, the researches of the learned have increased the knowledge of Assyrian history. Among the sculptures that enrich the British Museum may be mentioned the winged bull and lion, and numerous hunting and battle pieces; and the bas-relief of the eagle-headed human figure, presumed to be a representation of the Assyrian god Nisroch (from *Nisr*, an eagle or hawk), whom Sennacherib was in the act of worshipping when he was assassinated by his two sons, about 710 B.C. *2 Kings* xix. 37.

**NIOBIUM**, a rare metal, discovered by Hatchett in columbite, a black earth, and named columbium, 1801. It was pronounced to be identical with tantalum (or tantalum) by Wollaston; but was rediscovered by H. Rose in 1846, and named niobium.

**NIRVANA**, see *Buddhism*.

**NISBET** or **NESBET** (Northumberland). Here a battle was fought between the English and Scotch armies, the latter greatly disproportioned in strength to the former. Several thousands of the Scots were slain upon the field and in the pursuit, 7 May, 1402.

**NISI PRIUS** ("unless before"), words in a writ summoning a person to be tried at Westminster, *unless* the judges should come to hold their assizes in the place where he is. Judges sit in Middlesex by virtue of 18 Eliz. c. 12 (1576).

**NISMES** (Nîmes), S. France, was the flourishing Roman colony, Nemausus. Its noble amphitheatre was injured by the English in 1417. The inhabitants embraced Protestantism, and suffered much persecution in consequence, and Nîmes has frequently been the scene of religious and political contests. The treaty termed the Pacification of Nîmes (14 July, 1629) gave religious toleration for a time to the Huguenots.

**NITRE**, see *Saltpetre*.

**NITRIC ACID**, a compound of nitrogen and oxygen, formerly called *aqua fortis*, is said to have been first obtained in a separate state by Raymond Lully, an alchemist, about 1287; but we are in-

debted to Cavendish, Priestley, and Lavoisier our present knowledge of its properties. Cavendish demonstrated the nature of this in 1785. *Nitrous acid* was discovered by Scheele about 1774. *Nitrous gas* was accidentally discovered by Dr. Hales, *Nitrous oxide gas* (laughing gas) was discovered by Dr. Priestley in 1776. The use of this gas as an anæsthetic, recommended by Davy in 1800, was begun in America (by Mr. W. a dentist), 1844; in Paris, 1866; in London 31 March, 1868, ingenious apparatus having been invented for its application.

**NITROGEN** or **AZOTE** (from the Greek *azō* and *zōō*, I live), an irrespirable element gas, and an important element in food, discovered by Rutherford about 1772. Before 1777, Scheele separated the oxygen of the air from the nitrous, and almost simultaneously with Lavoisier discovered that the atmosphere is a mixture of the two gases. Nitrogen combined with hydrogen forms the volatile alkali ammonia, so freely given off by decomposing animal and vegetable bodies. See *Air*, 1894. Prof. Hermann Hellriegel (b. 1831) demonstrated in 1886 the power of leguminous plants to fix free nitrogen through the agency of microbes in their root nodules whereby the soil is much enriched. Clover gives up to the soil which wheat requires. He died 24 Sept. 1895.

**NITRO-GLYCERINE** (also called **NITRILEUM**), an intensely explosive amber-like fluid discovered by Sobrero in 1847, is produced by mixing glycerine (in successive small quantities) with a mixture of one part of nitric acid and two parts of sulphuric acid. Alfred Nobel, a Swede, attempted its application as an explosive agent in 1864. It has caused several most disastrous accidents, with great loss of life. In attempting to bury some nitro-glycerine in the town moor Newcastle-on-Tyne, 17 Dec. 1867, an explosion took place, and seven persons lost their lives, including Mr. Mawson, the sheriff, and Mr. Bryson, town surveyor; see *Dynamite*. Mr. Alfred Nobel's nitro-glycerine manufactory, near Stockholm, blew up; 15 persons killed, many injured, 10 Jan. 1868. An act prohibiting its importation for a time and regulating its transmission, was passed in 1875 and repealed by the Explosives act of 1875. See *Manufacture* discovered, see *Birmingham*, 1883.

**NIZAM**, see *Hyderabad*.

**NOBEL BEQUEST**. Dr. Alfred Nobel, Swede, died 1896 (see *Nitro-Glycerine*, *Blast*, *Gelatine*, and *Dynamite*), left a large sum which the interest was to be awarded annually by a board of control at Stockholm in proportion of the value of about 8,000*l.* to those in the previous year should have rendered the greatest service to mankind, in inventions or discoveries in physical sciences, chemistry, physiology or medicine, literary work, and the cause of international brotherhood, in the suppression or reduction of standing armies, or the foundation of Peace congresses. Regulations for the execution issued, Oct. 1900. The Peace prize 150,000 kronen divided between M. He Dunant (Swiss) and M. Frédéric Passy (French) 200,000*l.* each to M. Sully Prudhomme, French poet, for literature; to Dr. Behring, of Halle, for medicine; prof. van't Hoff of Berlin, for chemistry; and prof. Röntgen of Munich, for physics. The distribution took place at Stockholm, the ceremony and others present, 10 Dec. 1901. The Peace prize awarded to Mr. William Randal Cremer, M.P., for his work on behalf of inter-

national arbitration; the four Nobel prizes were given to prof. Henri Becquerel of Paris, divided with M. and Mme. Curie also of Paris, for physics; to prof. Arrhenius of Stockholm for chemistry; to prof. Finsen, of Copenhagen for medicine, and to M. Bjørnstjerne Bjørnson, of Christiania, for literature, 11 Dec. 1903. *Nobel Institutes* are in process of establishment to carry out scientific investigation on the lines of the above scheme of the founder.

The Nobel committee of the society of authors, formed for the purpose of recommending English candidates for the literature prize; first meeting held in London, Dr. Richard Garnett in the chair (lord Avebury elected permanent chairman),

**NOBILITY.** The Goths, after they had seized a part of Europe, rewarded their heroes with titles of honour, to distinguish them from the common people. The right of peerage seems to have been at first territorial. Patents to persons having no estate were first granted by Philip the Fair of France, 1095. George Neville, duke of Bedford (son of John, marquis of Montague), ennobled in 1470, was degraded from the peerage by parliament, on account of his utter want of property, 19 Edw. IV., 1478. Noblemen's privileges were restrained in June, 1773; see *Lords*, and the various orders of the nobility.

In 1845 a statistical writer said that there were 500,000 nobles in Russia, 230,000 in Austria; in Spain (in 1780), 470,000; in France (before 1790) 360,000 (of whom 1,200 were of the *ancienne noblesse*); in the United Kingdom, 1,631 with transmissible titles (dukes to baronets).

**NOBILITY OF FRANCE** preceded that of England. On 18 June, 1790, the National Assembly decreed that hereditary nobility could not exist in a free state; that the titles of dukes, counts, marquises, knights, barons, excellencies, abbots, and others be abolished; that all citizens take their family names; liveries and armorial bearings also be abolished. The records of the nobility, 600 volumes, were burnt at the foot of the statue of Louis XIV., 25 June, 1792. A new nobility was created by the emperor Napoleon I., 1808. The hereditary peerage was abolished 27 Dec. 1831; re-instituted by Napoleon III., 1852.

**NOBLE**, an English gold coin (value 6s. 8d.), first struck in the reign of Edward III., 1343 or 1344, said to have derived its name from the excellence of the metal of which it was composed.

**NOCTURNE**, a name given by John Field (who died 1837) to a new and very pleasing musical composition. He was followed very successfully by Chopin, who died, 1849. The term was adopted by Mr. Whistler, the artist, for his night pieces, in which he began with line, form, and colour, 1877-8.

**"NOLUMUS LEGES ANGLIÆ MUTARI,"** see *Bastards*, and *Merton*.

**NOMINALISTS** (or **CONCEPTUALISTS**), a scholastic sect, opposed to the Realists, maintain that general ideas have no existence outside our minds, and only exist by the names we give them. The founder of the sect, Jean Roscellin, a canon of Compiègne, was condemned by a council at Soissons, 1092, but the controversy was revived in the 12th century. Among the Nominalists are reckoned Abelard, St. Thomas Aquinas (partially), Occam, Hobbes, Locke, Berkeley, and Dugald Stewart. The Realists assert that general ideas are real things with positive existence.

**NON-CONFORMISTS.** The Protestants in England are divided into conformists and non-conformists; or, churchmen and dissenters. The first place of meeting of the latter, in England, was established at Wandsworth, near London, 20 Nov. 1572. The name of non-conformists was taken by the Puritans when the Act of Uniformity came into operation on 24 Aug. 1662 (termed "Black Bartholomew's day"), when 2000 ministers of the established religion resigned, not choosing to conform to the statute passed "for the uniformity of public prayers and administration of the sacraments;" see *Puritans*, and *Dissenters*. The laws against them were relaxed by the Toleration act, 24 May, 1689.—The *Nonconformist* newspaper (edited by Mr. Edward Miall, aft. M.P., who died 29 April, 1881) first appeared 14 April, 1841.

The non-conformists presented to Mr. Miall 10,000 guineas for his exertions on behalf of religious equality 18 July, 1873

Three large bodies in England, Congregationalists (or Independents), Baptists, Wesleyan Methodists, 8 others of considerable importance, Presbyterians, Unitarians, Society of Friends (Quakers), Salvation Army and 4 Wesleyan bodies; Primitive Methodists, Methodist (New Connexion), United Methodist Free Churches, and Bible Christians in 1905.

**NONES**, in the Roman calendar, were the fifth day of each month, excepting March, May, July, and October, when the nones fell on the seventh day.

**NON-JURORS** considered James II. to have been unjustly deposed, and refused to swear allegiance to William III. in 1689. Among them were Sancroft, archbishop of Canterbury; Ken, bishop of Bath and Wells, and the bishops of Ely, Gloucester, Norwich, and Peterborough, and many of the clergy, who were deprived 1 Feb. 1691. Non-jurors were subjected to double taxation, and obliged to register their estates, May, 1723. They formed a separate communion, which existed till the beginning of the present century.

**NON NOBIS, DOMINE!** ("Not unto us, O Lord!") &c., *Psalm* cxv. 1), a musical canon, sung as a grace at public feasts, was composed by W. Birde in 1618.

**NON-RESISTANCE OATH** (containing a declaration that it is unlawful to take arms against the king upon any pretence whatever), enforced by the Corporation act, 1661, was repealed in 1719.

**NOOTKA SOUND** (Vancouver's Island), discovered by captain Cook in 1778, and settled by the British in 1786, when a few British merchants in the East Indies formed a settlement to supply the Chinese market with furs; but the Spaniards in 1789 captured two English vessels and took possession of the settlement. The British ministry demanded reparation, and the affair was amicably terminated by a convention, and a free commerce was confirmed to England in 1790.

**"NO-POPERY RIOTS,"** see *Gordon*. The cry was revived against the Catholic emancipation bill, 1829. The Anti-papery association petitioned against the election of Mr. Alderman Knill, R.C., as lord mayor of London, Oct. 1892.

**NORDLINGEN** (Bavaria). Here the Swedes under count Horn were defeated by the Austrians,

27 Aug. 1634; and the Austrians and allies by Turenne in 1645.

**NORE MUTINY**, see *Mutinies*.

**NORFOLK ISLAND** (Pacific Ocean), discovered in 1774, by captain Cook, who found it uninhabited, except by birds. The settlement was made by a detachment from Port Jackson under governor Phillip, in 1788, in Sydney bay, on the south side of the island. This was at one time the severest penal colony of Great Britain. The island was abandoned in 1809, but re-occupied as a penal settlement in 1825, penal settlement removed in 1855. The descendants of the mutineers of the *Bounty* were removed to it in June, 1856, from *Pitcairn's Island* (which see). Visited by lord Hampden, transferred to New South Wales and endowed with a new constitution, 1896. Population, 1901, 827.

Excitement in the island and resignation of the "Council of Elders" as a protest against the absorption of the island into the Australian Commonwealth, reported. . . . June, 1903

**NORICUM**, see *Austria*.

**NORMAL SCHOOLS** (from *norma*, a rule). One for the instruction of teachers, established at Paris by a law, 30 Oct. 1794, opened 20 Jan. 1795, under the direction of La Place, La Harpe, Hally, and other eminent men, was soon closed. Another, established by Napoleon in 1808, was closed in 1822. The plan was revived in 1826, and has been developed in England and other countries. See *Science and Art*.

**NORMANDY** (N. France), part of Neustria, a kingdom founded by Clovis in 511 for his son Clotaire, which, after various changes, was united to France by Charles the Bald in 837. From the beginning of the 9th century it was continually devastated by the Scandinavians, termed Northmen or Normans, to purchase repose from whose irruptions Charles the Simple of France ceded the duchy to their leader Rollo, 905. Rollo, the first duke, held it as a fief of the crown of France, and several of his successors after him, until William, the seventh duke, acquired England, in 1066. It remained a province of England till the reign of king John, 1204, when it was conquered by Philip Augustus and reunited to France. It was re-conquered by Henry V., 1418, and held by England partially till 1450. The English still possess the islands on the coast, of which Jersey and Guernsey are the principal.

On 10 July, 1460, a conflict took place between duke of York and Henry VI. of England, in which the king was defeated, and made prisoner (second time) after a sanguinary fight which took place in the meadows below the town. Northampton was ravaged by the plague in 1637. It was seized and fortified by the parliamentary force in 1642. A fire nearly destroyed the town, 3 July, 1675. Riots here because Mr. C. ### NORTH-EAST AND -WEST PASSAGES.

The attempt to discover a north-west passage was made by a Portuguese named Corte Real, about 1500. In 1585, a company was formed in London called the "Fellowship for the discovery of the North-West Passage." From 1743 to 1818 parliament offered 20,000*l.* for this discovery. In 1818 the reward was modified by proposing that 5000*l.* should be paid when either 110°, 120°, or 130° W. long. should be passed; one of which payments was made to sir E. Parry. For their labours in the voyages enumerated in the list below, Parry, Franklin, Ross, Back, Richardson, McClure, Nares, and McClintock were knighted.

† Capt. McClure sailed in the *Investigator* in company with com. Collinson in the *Enterprise* in search of sir John Franklin, 20 Jan. 1850. On 6 Sept. he discovered high land, which he named Baring's land; on the 9th, other land, which he named after prince Albert; on the 30th the ship was frozen in. Entertaining a strong conviction that the waters in which the *Investigator* then lay communicated with Barrow's straits, he set out on 21 Oct., with a few men in his sledge, to test his views. On 26 Oct. he reached Point Russell (73° 31' N. lat., 114° 14' W. long.), where from an elevation of 600 feet he saw Parry or Melville Sound beneath them. **NORTH SEA. INTERNATIONAL COMMISSION OF INQUIRY.** The proposal of the tsar that the dispute between Great Britain and Russia arising out of the North Sea outrage (see *England*, 22 Oct., 1904, et seq.) should be submitted to an international commission of

inquiry on the basis of the Hague convention, was accepted by the British government, 28 Oct. The members comprising the commission were: vice-adm. sir L. Beaumont (Gt. Britain), vice-adm. Dubasoff (Russia), rear-adm. Davis (United States), adm. baron von Spaun (Austria-Hungary), adm. Fournier (France). The first meeting of the commission was held in Paris, 22 Nov., when adm. Fournier was elected president. Final sitting held 25 Feb., 1905, report of the commission read by adm. Fournier. The majority of the commissioners were unable to determine on what object the ships fired, but the commissioners unanimously recognised that the trawlers committed no hostile act, and the majority were of opinion that as there was no torpedo boat either among the trawlers or on the spot, the fire opened by adm. Rozhdvestvensky was not justifiable. The firing on the starboard side seemed to the majority of the commissioners to have lasted longer than appeared necessary. The commissioners recognised that there was at the close of the firing sufficient uncertainty as to the danger incurred by the ships to decide the admiral to proceed on his way; but the majority regret that he did not inform the authorities, when passing through the Straits of Dover, that the trawlers required assistance. In closing their report the commissioners declared that their appreciations formulated therein were not in their spirit of a nature to cast any discredit either on the military value or the sentiments of humanity of admiral Rozhdvestvensky and of the personnel of his squadron. NOTABLES, French assemblies of nobles,  
bishops, knights, and lawyers. An assembly of the  
notables was convened by the duke of Guise, 20 Aug.  
1560, and by other statesmen. Calonne, the minister  
of Louis XVI., summoned one which met on 22  
Feb. 1787, on account of the deranged state of the  
king's finances, and again in 1788, when he opened  
his plan: but as any reform militated too much  
against private interest to be adopted, Calonne was  
dismissed, and soon after retired to England. Louis  
having lost his confidential minister, De Vergennes,  
by death, called De Brienne, an ecclesiastic, to his  
councils. The notables were re-assembled on 6  
Nov. 1788. In the end, the states-general were  
convoked 5 Dec.; and from this assembly sprang  
the national assembly (*which see*). The notables  
were dismissed by the king, 12 Dec. 1788.—The  
*Spanish notables* assembled and met Napoleon  
(conformably with a decree issued by him command-  
ing their attendance), at Bayonne, 25 May, 1808.

**NOTABLES**, French assemblies of nobles, bishops, knights, and lawyers. An assembly of the notables was convened by the duke of Guise, 20 Aug. 1560, and by other statesmen. Calonne, the minister of Louis XVI., summoned one which met on 22 Feb. 1787, on account of the deranged state of the king's finances, and again in 1788, when he opened his plan: but as any reform militated too much against private interest to be adopted, Calonne was dismissed, and soon after retired to England. Louis having lost his confidential minister, De Vergennes, by death, called De Brienne, an ecclesiastic, to his councils. The notables were re-assembled on 6 Nov. 1788. In the end, the states-general were convoked 5 Dec.; and from this assembly sprang the national assembly (*which see*). ORANGEMEN. The "Battle of the Diamond," 21 Sept. 1795 (see *Diamond*), and the treachery experienced by the Protestants on that occasion, convinced them they would become an easy prey to the Roman Catholics, from their small numbers, unless they associated for their defence, and consequently the Orange Society was formed in 1795. The first Orange lodge was formed in Armagh,

but the name of Orangemen already existed. An Orange lodge was formed in Dublin; the members published a declaration of their principles (the maintenance of church and state under the house of Brunswick) in Jan. 1798. After 1813 Orangeism declined; but revived again in 1827, when the duke of Cumberland became grand-master; and it is stated that in 1836 there were 145,000 Orangemen in England, and 125,000 in Ireland. After a parliamentary inquiry Orange clubs were broken up in conformity with resolutions of the house of commons; but were revived in 1845—1889. In Oct. 1857, the lord chancellor of Ireland ordered that justices of the peace should not belong to Orange clubs. The Orangemen in Canada were greatly excited during the visit of the prince of Wales in Sept. 1860. Mr. Wm. Johnston, a grand-master, convicted of violating the Party Processions act, was elected M.P. for Belfast, Nov. 1869. See *Belfast*. The Orangemen vigorously oppose the home rule movement, see *Ulster*, 1892-3.

**ORANGES.** The sweet, or China orange, was first brought into Europe from China by the Portuguese, in 1547; and it is asserted that the identical tree, whence all the European orange-trees of this sort were produced, is still preserved at Lisbon, in the gardens of one of its nobility. Orange-trees were first brought to England, and planted, with little success, in 1595; they are said to have been planted at Beddington park, near Croydon, Surrey. The duty on imported oranges was repealed in 1860.

**ORATOR HENLEY.** An eccentric English gentleman of some talents, in 1726, opened his "oratory," a kind of chapel, in Newport-market, London, where he gave lectures on theological topics on Sundays, and on other subjects on Wednesdays, every week. Novelty procured him many hearers; but he was too imprudent to gain any permanent advantage. He removed his oratory to Clare-market, and sank into obscurity previously to his death, in 1756.

**ORATORIANs** (from the Latin *orare*, to pray), a regular order of priests established by St. Philip Neri, about 1564, and so called from the oratory of St. Jerome, at Rome, where they prayed. They had a foundation in France, commenced by Guillaume Gibieuf and Pierre de Berulle (afterwards cardinal), 1612, approved by pope Paul V. 1613.—The rev. Frederick Faber and others, as "Fathers of the Oratory," established themselves first in King William-street, Strand, London, in 1848, and afterwards at Brompton.

**ORATORIO**, a sacred musical composition, the subject of it being generally taken from the Scriptures. The origin of our oratorios (so named from having been first performed in an oratory) is ascribed to St. Philip Neri, about 1550. The first true oratorio, Emilio del Cavaliere's "Rappresentazione," was performed at Rome in 1600. He was followed by Giovanni Carissimi, Alessandro Scarlatti, &c. Bach's "Passion Music," the "St. Matthew," was produced at Leipzig on Good Friday, 1739, see *Passion-Week*. Handel composed 17 English oratorios: his first, "Esther," was performed at the Haymarket theatre, 2 May, 1732. "Israel in Egypt" was produced in 1738, and the "Messiah" in 1741; Haydn's "Creation" in 1798; Beethoven's "Mount of Olives," 1803; Spohr's "Last Judgment" (properly "Last Things"), 1825; Mendelssohn's "St. Paul" in 1836, and "Elijah" in 1846; Costa's "Eli," 1865; "Nathan," 1864; S. Bennett's "Woman of Samaria,"

1867; Macfarren's "John the Baptist," 1869; "Sullivan's "Prodigal Son," 1869; "World," 1873; "Martyr of Antioch." Latterly the name has been modified into *Oratorio*, such as Mackenzie's "Sharon," Hubert Parry's "Judith," "King Saul" (1894), &c. See Gounod's "Redemption," Berlioz's "Christ," Elgar's "The Apostles," 1903; or, again, as a form of *Drama* as Schumann's "Paradise and the Perseus," "Golden Legend," Mackenzie's "Dre-

**ORCHIDS**, a natural order of plants, peculiar organization, recently much cultivated. In 1880 a great establishment for the was set up at St. Albans by Mr. J. orchid king," patronised by the R. O. introduced him to queen Victoria at a Manor, 14 May, 1890. The orchids sold for about 5,250*l.*, 19-23 Dec. 1899.

**ORCHOMENUS**, a small Greek town, was destroyed by the Thebans, stored by Philip II. of Macedon, 354; by him to Thebes, 346.

**ORDEAL** was known among the Jews (*Num. v. 2*). It was introduced by the Saxons. A prisoner who pleaded might choose whether he would put trial upon God and his country, by trial at this day, or upon God only. The trial was abolished in 1218.

**ORDER OF THE CORPORAL UNION**, virtually a new episcopal union, to arise out of the Christian Unity (*which see*). It proposed to form 1 (Canterbury, York, Caerleon, and St. Asaph) rectors and provincials; announced 11

**ORDERS**, see *Knighthood*.

**ORDERS IN COUNCIL** were issued by British government 7 Jan. and 11 Nov. prohibiting trade with the ports occupied by French, being reprisals for Napoleon's Milan decrees (see *Continental System*). They greatly checked the progress of man this country, and caused much distress. They were repealed in regard 18 June, 1812. The action under the the to the disastrous war with the United States, 1812-15.

**ORDINANCES**, see *Ordinances*, *Denying Ordinances*.

**ORDINATION of ministers** in the church began with Christ and His apostles. *Mark* iii. 14, and *Acts* vi. and xiv. 23. In 1549 a new form of ordination was ordered to be prepared by a convocation of prelates and six divines.

**ORDNANCE OFFICE**. Before the invention of guns, this office was supplied under the following names: the bowyer, bowyer, the galeater, or purveyor of armour, and the keeper of the tents. It was placed under the management of a major, a lieutenant, surveyor, &c. The major was chosen from among the first gentlemen in service of the sovereign. The appointment was for life; but since the rest held *durante bene placito*, and not infrequently a cabinet minister.—*Beaumont*. The

for this office were revoked 25 May, 1855, and its duties vested in the minister of war, lord Panmure. The last master-general was lord Fitzroy-Somerset, afterwards lord Raglan. The revival of the office recommended by the Ordnance Commission (see under *Army*, 1886).

**ORDNANCE SURVEY.** The trigonometrical survey of England was commenced by gen. Roy, in 1784, continued by col. Colby, and completed by col. (aft. sir Henry) James in 1856. The publication of the maps (scale 7 inches to a mile), commenced in 1819, under the direction of col. Mudge, and was completed in 1862; a large part of these maps have been coloured geologically. The survey of Ireland (6 inches to a mile) has been completed and published; that of Scotland, completed Nov. 1882. By the Survey act, passed 12 May, 1870, the Ordnance Survey was transferred to the Board of Works, and by an act passed in 1889, to the Board of Agriculture, beginning 1 April, 1890. Directors, lieut.-gen. John Cameron, succeeded sir Henry James in 1875, died 30 June, 1878; col. A. C. Cooke; col. R. H. Stothard, 1885; col. Farquharson (K.C.B. 1890); col. Duncan Johnston, 1901; col. R. C. Hellard, 1905. In 1892 several sets of maps were in course of publication or preparation. The Ordnance Survey maps having been considered deficient, a departmental committee was appointed in April, 1892, and met during the year; sir John Dorington, M.P., chairman. Report, with recommendations, presented to the Board of Agriculture, 31 Dec. 1892; published, 6 March, 1893. New maps issued, May, 1902; survey sections sent to S. Africa, spring, 1902; 4-inch and 1-inch maps revised, issued, Aug. 1902; others issued 1903. Pocket maps of many of the sections, scale 1 in. and  $\frac{1}{2}$  in. to a mile, are published at a cheap rate. Annual report to 31 March, 1905, states that a great advance has been made towards the completion of the small maps, and good progress made with the large scale maps. The outline and hill editions, 1 in. scale, have been completed for the whole of the United Kingdom, and the coloured edition completed for England and Wales, and begun for Scotland; about three-quarters of the coloured map of Ireland completed. The 2-mile map drawing of England and Wales completed. Drawing for Scotland begun. The 10-mile map, coloured edition, has been published for the whole of Great Britain, and will be issued for Ireland. The 1-1,000,000 scale map completed and published in colour for the whole of the United Kingdom. The maps to illustrate the official history of the South African war, and those to illustrate the report of the London Traffic Commission, in progress.

New departure made 1903-4, with consent of the treasury, to supply schools who desire it with specially printed Ordnance Survey maps at a very low price. A considerable number of such maps were supplied in 1904-5. Specimens of the principal maps were also prepared for hanging up in public buildings. These maps have been hung up at all post-offices at which they can be ordered, and at nearly 700 other post-offices.

**ORDONNANCES**, the laws enacted by the Capetian kings of France previous to 1789. They began with "in the name of the king," and ended with "such is our good pleasure." The first in French is dated 1287 (Philip IV.). The publication of these "ordonnances," ordered by Louis XIV., 1706, is still in progress. The "ordonnances" of Charles X., promulgated 26 July, 1830, led to the revolution.

**OREGON TERRITORY** (N. America), is said to have been visited by Drake in 1579. Lieut. Broughton took possession of part of it for Great Britain in 1792. In 1810 a settlement named Astoria was founded by a New York Company. Oregon was occupied by the English in 1814, but was claimed by the United States government, to whom the greater part was ceded, after much negotiation, by the treaty of 12 June, 1846. Oregon was made a territory in 1848, and admitted as a state, Feb. 1859. Capital, Salem. Population, 1880, 174,768; 1890, 313,767; 1900, 413,536.

**ORGAN**, a development of the pandean pipes; the "organ" in Gen. iv. 21 should be translated *pipe*. The invention is attributed to Ctesibius, a barber of Alexandria, about 250 B.C.; and to Archimedes, about 220 B.C. The organ was brought to Europe from the Greek empire, and was applied to religious devotions in churches, about A.D. 657. — *Bellarmino*. Organs were used in the western churches by pope Vitalianus, in 658. — *Ammonius*. It is affirmed that the organ was known in France in the time of Louis I., 815, when one was constructed by an Italian priest. The organ at Haarlem is one of the largest in Europe; it has 60 stops and 8000 pipes. At Seville is one with 110 stops and 5300 pipes. The organ at Amsterdam has a set of pipes that imitate a chorus of human voices. Of the organs in ENGLAND that at St. George's Hall, Liverpool, by Mr. Willis, was the largest; next in order that at York minster, and that in the music-hall, Birmingham. In London, the largest was, perhaps that of Spitalfields church; and that in Christ Church was nearly as extensive. The erection of the famous Temple organ was competed for by Schmidt and Harris; after long disputes, the question was referred to vote, and Mr. Jefferies, afterwards chief justice, gave the casting vote in favour of Schmidt (called Father Smith), about 1682. A monster organ was erected in the Crystal Palace, Sydenham, in June, 1857. The organ, by Willis, at the Royal Albert Hall, was said to be the largest in the world; 1871. A larger proposed for a cathedral in Long Island, North America, 1880. A noble organ (by Bryceson), with many appliances, opened in the hall, Primrose-hill-road, London, N., Jan. 1876; see *Westminster Abbey*, 1895.

*Barrel organs* are said to have been first made early in the 18th century. The finest was the *Apollonicon* (which see).

**ORIENTALISTS.** The first International Congress of these scholars was held at Paris, 1 Sept. 1873, M. **ORIENTATION,** the setting of the chancel of a church so that it points to the east. This custom is followed in the churches of England, and those of northern Europe, but is not strictly adhered to in Italy and the South. St. Peter's, at Rome, has its choir pointing to the west.

**ORIFLAMME,** see *Auriflamma*.

**ORIGENISTS** pretended to draw their opinions from the writings of Origen, who lived 185-253. They maintained that Christ was the son of God in no other way than by adoption and grace; that souls were created before the bodies; that the sun, moon, stars, and the waters that are under the firmament, have souls; that the torments of the damned shall have an end, and that the fallen angels shall, after a time, be restored to their first condition. They were condemned by councils, and the reading of Origen's work was forbidden.—*Burke*. These doctrines were condemned by the council of Constantinople in 553.

**ORISSA,** an ancient kingdom of India, now a province of N.W. Bengal, conquered by Clive in 1755, and nearly all acquired by the company in 1765. It suffered much by famine in 1770, and 1792-3, and more especially from the end of 1865 to Nov. 1866, when it is said about 750,000 persons perished. The government and officials were censured for neglect and want of forethought. It is also said that during a hurricane in Oct. 1836, 22,500 persons were drowned.

**ORKNEY AND SHETLAND ISLES** (North of Scotland), were conquered by Magnus III. of Norway, 1099, and were ceded to James III. as the dowry of his wife Margaret, in 1469. The Orkneys were the ancient Orcaades; united with Shetland, they now form one of the Scotch counties. The bishopric of Orkney, founded by St. Servanus early in the 5th century, some affirm by St. Colm, ended with the abolition of episcopacy in Scotland, about 1689; see *Bishops in Scotland*. Orkney and Zetland small piers and harbours act passed, 14 Aug. 1896.

ORPHAN-HOUSES. The emperor Trajan first formed establishments for this purpose. Pliny relates in his Panegyric that he had caused 5000 free-born children to be sought out and educated, about A.D. 105. Orphan houses properly so called are mentioned for the first time in the laws of the emperor Justinian. At the court of Byzantium the office of inspector of orphans, *orphanotrophos*, was so honourable that it was held by the brother of the emperor Michael IV. in the 11th century; see *Foundling Hospitals*.

The planetarium, now termed the Orrery, it is said, was constructed by Rowley, after a pattern devised by the clock-maker, George Graham, at the expense of Charles Boyle, earl of Orrery, about 1715. A large "planetarium" was constructed by the rev. Wm. Pearson, for the Royal Institution, London, about 1803. An excellent planetarium, constructed in London by signor N. Perini, was exhibited in Dec. 1879.

**OSSORY** (S.E. Ireland), **BISHOPRIC OF**, was first planted at Saiger, about 402; translated to Aghadoo, in Upper Ossory, in 1052; and to Kilkenny about the end of the reign of Henry II. It was united to Ferns and Leighlin in 1835.

**OSTEND** (Belgium). Now a fashionable summer resort. An important sea-port in the 11th century, was destroyed by the sea 1334, rebuilt and walled by Philip the Good, the duke of Burgundy, 1445; sustained a siege by the Spaniards, from July, 1601, to Sept. 1604, when it honourably capitulated. On the death of Charles II. of Spain, the French seized Ostend; but in 1706, after the battle of Ramillies, it was retaken by the allies. It was again taken by the French in 1745, but restored in 1748. In 1756, the French garrisoned this town for the empress-queen Maria Theresa. In 1792, the French once more took Ostend, which they evacuated in 1793, but regained in 1794. The English destroyed the works of the Bruges canal; but the wind shifting before they could re-embark, they surrendered to the French, 19 May, 1798. The Ostend East India company, established 1723, was dissolved 1731. Riotous attacks on British fishermen landing fish quelled with bloodshed; intervention of the king; peace restored 23-30 Aug. 1887. Population, 1890, 24,712; 1900, 39,541.

**OSTRACISM** (from the Greek *ostrakon*, a potsherd or shell), a mode of proscription at Athens, is said to have been first introduced by the tyrant Hippias; others ascribe it to Cleisthenes, about 510 B.C. The people wrote the names of those whom they most suspected upon small shells; these they put in an urn or box and presented to the senate. Upon a scrutiny, he whose name was oftenest written was sentenced by the council to be banished from his altar and hearth. 6000 votes were required. Aristides, noted for his justice, and Miltiades, for his victories, were thus ostracized. The custom was abolished by ironically proscribing Hyperbolus, a mean person, about 338 B.C.

OXFORD, PROVISIONS OF, for several political reforms; enacted by "the mad parliament," June 1258; several times annulled and confirmed during the "barons' war."

OXFORD'S ACT, BISHOP OF, see *District Churches*.

OXFORD'S ASSAULT ON THE QUEEN. Edward Oxford, a youth who had been a servant in a public-house, discharged two pistols at queen Victoria and prince Albert, as they were proceeding up Constitution-hill in an open phaeton from Buckingham palace, 10 June, 1840. He stood within a few yards of the carriage, but neither her majesty nor the prince was injured. Oxford was tried at the Old Bailey (10 July), and was adjudged to be insane, and sent first to Bethlehem hospital, next to Broadmoor; and set at liberty in 1868, on condition of going abroad.

OXFORD HOUSE, see *University Teaching*.

"OXFORD MOVEMENT, 1833-45, by R. W. Church," late dean of St. Paul's, published 10 March, 1891; see *Puseyism and Tractarianism*.

OXUS (the Persian and Turkish *Djehoun*, local name, *Amou Daryâ*), a river of Central Asia; supposed to have changed its course before 1000 A.D., and to have resumed its ancient bed in 1878. The Oxus navigated as far as Faizabad Kali (Afghan frontier) by the Russians under adm. Baturin; reported, 11 Dec. 1894.

OXYGEN, a gas (named from the Greek *oxus*, sharp, as being generally found in acids), is the most abundant of all substances, constituting about one-third of the solid earth, and forming about nine-tenths of water and one-fifth of the atmosphere. It was first separated from red oxide of mercury by Priestley, 1 Aug. 1774, and by Scheele, who was ignorant of Priestley's discovery, in 1775. It is a supporter of animal life (in respiration), and of combustion. An oxygen gas company was announced in Dec. 1864; its object being the cheap manufacture of oxygen for its application to the production of perfect combustion in lamps, stoves, furnaces, &c. It is now largely produced with about 5 per cent. of inert nitrogen by the Brin method from atmospheric air (1893). Oxygen was liquefied by Raoul Pictet at Geneva (pressure, 320 atmospheres, temp. 140° below zero Cent.), 22 Dec. 1877. See *Ozone*.

Professor Dewar obtained 2 cubic centimetres ( $\frac{1}{16}$  of a fluid oz.) of liquid oxygen by means of liquid ethylene (the illuminating part of coal gas), temp. 140° below zero Cent. (by Wroblewski and Olzewski's method), at the Royal Institution, London, in the presence of the prince and princess of Wales, 26 June, 1884. He exhibited for the first time some solid oxygen in the form of snow (temperature -200° Cent. -400° Fahr.), produced by placing liquid oxygen in a partial vacuum, at the Royal Institution 27 May, 1886.

Professor Dewar exhibited between 300 to 400 centimetres liquid oxygen at the Faraday Centenary, 26 June, 1891. The feeble magnetism of oxygen, demonstrated by Faraday, was shown by Professor Dewar to be greatly increased when reduced to the liquid state by a temperature of 180° below zero centigrade; announced 10 Dec. 1891. Some liquid oxygen placed in the magnetic field sprang to the poles and adhered to them till evaporated; this was publicly exhibited by the professor at the Royal Institution, 10 June, 1892. Several pints of liquid oxygen and liquid air were then produced in the presence of the audience.

At a meeting of the Royal institution, 20 Jan. 1893, prof. Dewar exhibited some of the remarkable properties of liquid oxygen and air, and he showed how the liquid state could be maintained longer by surrounding it with a very high vacuum. Prof. Dewar reported to the Royal society that he had obtained solid air in the form of ice, a mysterious body, 9 March, 1893. Further researches reported, 22 Jan. 1897.

Prof. Dewar was awarded the Rumford medal of the Royal society in 1894.

Grove, named by him successively as a mine of the oxygen gas resulting from the water effected by a current of high tension or oxygen through which electric discharge taken place; and of air in which moisture has been undergoing slow oxidation.

Marignac determined the action of ozone on substances to be due to their oxidation. Ozonimeters constructed.

M. Schönbein announced his discovery of modification of oxygen, which he termed hitherto found only in the compound peroxides of sodium, potassium, &c.)

The French Academy of Sciences appointed a committee of eminent philosophers to inquire into the nature and relations of ozone

Andrews and Tait demonstrated ozone to be a denser form of oxygen

This further established by Soret and Breguet quantitative reactions. (Odling suggested that Brodie proved ozone to be 3 parts of oxygen pressed into the space of 2)

Ozone, generated by a current produced by magneto-electric machine, employed by sugar, by Edward Beane's patent

Liquefied by Hautefeuille and Chappuis. Other properties since discovered

The Palæontographical society, which publishes elaborate monographs of British organic remains, was founded in 1847. The journal "*Paleontographica*" (German) began 1851. Professor Owen's "*Paleontology*" was published in 1860. "Nearly 40,000 species of animals and plants have been added to the *Systema Nature* by palæontological research." *Huxley*. Louis XIV., in 1692, gave it to his nephew Philippe, duke of Orleans, and it became the residence of his successors. It was confiscated by the republic in 1793, after the execution of Philippe Egalité. Louis Philippe resided in it, 1814-31. It suffered much injury at the revolution in 1848. Under the second empire it became the residence of prince Jerome and his son Napoleon. The buildings were much injured by fire by the communists, 24 May, 1871.

**PALL, PALLIUM.** In the Roman Church an ensign of dignity of a strictly personal character conferred by the pope upon archbishops. It consists of a narrow band of pure white wool, taken from two lambs, which annually, on the feast of St. Agnes, are brought to the church of St. John Lateran, and after being blessed are presented to the pope; the wool is afterwards made up into pallia by a community of nuns. The pallium, which is worn around the shoulders, is ornamented with four purple crosses, and its form is indicated in the arms of the archbishop of Canterbury. By a decretal of pope Gregory XI. (about 1370), no archbishop could call a council, bless the chrism, consecrate churches, ordain a clerk, or consecrate a bishop, till he had received his pall from the see of Rome. The pall was first worn by an Irish archbishop in 1152, when Gelasius was recognised as primate of all Ireland. The late cardinal Vaughan was invested with the pallium in the pro-cathedral, Kensington—the first occasion of its investiture in England since the time of cardinal Pole. Archbishop Bourne, the new archbishop of Westminster, receives the pallium from pope Pius X. at Rome, 12 Nov. 1903.

**PALLADIUM,** the statue of Pallas, said to have fallen from heaven near the tent of Ilus, as he was building Ilium, which the oracle of Apollo declared should never be taken so long as the Palladium was found within its walls. The Greeks are said to have obtained it by craft during the Trojan war, 1184 B.C.; but some writers assert, another statue was taken, and that the real Palladium was conveyed from Troy to Italy by Æneas, 1183 B.C., and preserved by the Romans with the greatest secrecy in the temple of Vesta.—**PALLADIUM** is a rare metal, discovered in platinum ore by Dr. Wollaston, in 1803.

The **PALL MALL GAZETTE**, a daily (evening) independent political and literary journal, first appeared 7 Feb. 1865, and was edited by Mr. Frederick Greenwood till 1 May, 1880, when it became a liberal paper, edited by Mr. John Morley, who retired 25 Aug. 1883. The Panthays sent an embassy to England in 1872, without effect. Sultan Suleiman committed suicide.

PANTHEISM, the formula of which is "everything is God, and God is one," was especially taught by Xenophanes, who died 500 B.C. The doctrine is attributed to Spinoza, Kant, Fichte, and other modern philosophers. Amalie of Chartres, censured for holding the doctrine, recanted 13th century. He is said to have asserted that "all is God, and God is all."

PANTHEON, at Rome, a circular temple built by Agrippa, the son-in-law of Augustus, 27 B.C. It had niches in the wall, where the image or representation of a particular god was set up; the gates brass, the beams covered with gilt brass, and the roof covered with silver. Pope Boniface III. dedicated it to the Virgin Mary and all the saints, by the name of S. Maria della Rotunda, or "ad Martyres," A.D. 608.\*—The PANTHEON IN LONDON was erected by subscription, and opened 27 Jan. 1772; formed into an opera house; burned down 14 Jan. 1792; rebuilt for masquerades in 1795; opened as theatre, 1812; made a bazaar in 1834. PANTOMIMES were representations by gestures and attitudes among the Greeks, and were introduced on the Roman stage by Pylades and Bathyllus, 22 B.C. Comic masques were introduced here from Italy about 1700. The first regular English pantomime is said to have been "Harlequin executed," produced by John Rich at the Lincoln's-inn-fields theatre, 26 Dec. 1717. Joseph Grimaldi (1779-1837) was a most eminent clown.

"PAPAL AGGRESSION." In a consistory holden in Rome, 30 Sept. 1850, the pope (Pius IX.) named fourteen new cardinals, of whom four only were Italians. Among them was Dr. Nicholas Wiseman, vicar-apostolic of the London district, who was at the same time nominated lord archbishop of Westminster.

The answer of the bishop of London (Dr. Blomfield) to a memorial from the protestant clergy of Westminster, against a Romish hierarchy in this country, was followed by the "Durham" letter from lord John Russell, then chief minister of the crown, to the bishop of Durham, in which he severely censured, not only the papal aggression, but also the proceedings of the tractarian clergy of the Church of England 4 Nov. "  
Immediately from every quarter of England addresses poured in to queen Victoria, calling upon her and the government to resist the usurpation: 6700 addresses, it is said, had been voted from nearly as many meetings up to 31 Dec. "  
Dr. Briggs, created Roman catholic bishop of Beverley, was enthroned in St. George's chapel at York, 13 Feb. 1851

Dr. Browne, created bishop of Clifton, and Dr. Burgess, bishop of Shrewsbury: both consecrated in St. George's cathedral, Southwark 27 July, "

PAPAL INFALLIBILITY. This dogma, maintained by one party in the Roman church, tolerated by another, and utterly rejected by a third, was adopted and promulgated at the general council at Rome 18 July, 1870, a great many bishops having withdrawn. The dogma was inculated by the false decretals of Isidore and others, but not adopted by the council of Trent; see *Councils XXI*. Professor Dollinger, the historian, was excommunicated at Munich for rejecting this dogma, 18 April, 1871: he was made a D.C.L. at Oxford about 16 June following; see *Old Catholics*. The doctrine was strenuously attacked by Mr. W. E. Gladstone, in his pamphlet, "The Vatican Decrees," Nov. 1874.

He gives engravings of manufacturers' marks, French and English; the dates of which range from 1330 to 1431. He also gives an extract from a work by Bartholus, a writer of the middle of the 14th century, in which mention is made of a paper manufactory in the Marches of Ancona. At the end of Wynkin de Worde's edition of Bartholomæus De Proprietatibus Rerum, 1494, is this paper, made by John Tote in England, &c. commended.

**PARISHES.** The boundaries in England are said to have been fixed by Honorius, archbishop of Canterbury, 636, or by Alfred about 890. They were enlarged, and the number of parishes was in the 15th century, when consequently reduced. Parish registers were commenced in 1538. Acts were passed in 1844 and 1856 by which new parishes may be formed out of old ones; the acts amended in 1869. The appointment of parish constables was made unnecessary by an act passed Aug. 1872. See *Registration*. Number of ecclesiastical parishes or districts, 1,400. By the Local Government act, passed 5 March, 1894, *Parish and District Councils* were appointed for rural parishes of 300 inhabitants or upwards, with suitable arrangements, to be made by the Local Government. **PARKS.** The Romans attached parks to their villas. Fulvius Lupinus, Pompey, and Hortensius, among others, had large parks. In England, the first great park of which particular mention is made was that of Woodstock, formed by Henry I., 1124. Queen Caroline, consort of George II., inquired, it is said, of the first Mr. Pitt (afterwards earl of Chatham), how much it would cost to shut up the parks as private grounds. He replied, "Three crowns, your majesty." The design was never afterwards entertained. See *Finsbury, Southwark, Green, Hyde, James's, St., Regent's, Victoria, Alexandra, Battersea, West Ham, and People's Parks, Clissold, Waterlow, and Yellowston Park, U.S., and London Parks Act*.

**PARK'S TRAVELS.** Mungo Park set sail on his first voyage to Africa, under the patronage of the African society, to trace the source of the river Niger, 22 May, 1795; and returned 22 Dec. 1797, after having fruitlessly encountered great danger. He again sailed from Portsmouth on his second voyage, 30 Jan. 1805, appointed to a new expedition by government. It is stated that his party fired on the natives when resisted, and that he was killed at Broussa on the Niger, Nov. 1805. His "Travels in Africa" were published in 1799.

**PARLIAMENT** (from the French *parlement*, discourse) derives its origin from the Saxon general assemblies, called *Wittenagemot*. The name was applied to the assemblies of the state under Louis VII. of France, about the middle of the 12th century, but it is said not to have appeared in our law till its mention in the statute of Westminster I., 3 Edw. I., 1272: and yet Coke declared in his *Institutes*, and spoke to the same effect, when speaker (1592), that this name was used even in the time of Edward the Confessor, 1041. The first clear account we have of the representatives of the people forming a house of

commons, was in the 43rd Hen. III. 1258, when it was settled by the statutes of Oxford, that twelve persons should be chosen to represent the commons in the three parliaments, which, by the sixth statute, were to be held yearly. *Burton's Annals*. The general representation by knights, citizens, and burgesses, took place 49 Hen. III. 1265. *Dugdale's Summons to Parliament*, edit. 1685; see *Commons and Lords*. The power and jurisdiction of parliament are so transcendent and absolute, that it cannot be confined, either for causes or persons, within any bounds. It hath sovereign and uncontrollable authority in making and repealing laws. It can regulate or new-model the succession to the crown (as was done in the reigns of Henry VIII. and William III.). It can alter and establish the religion of the country, as was done in the reigns of Henry VIII., Edward VI., Mary, and Elizabeth. *Sir Edward Coke*.<sup>\*</sup> The ninth edition of May's "Practical Treatise on Parliament" was published in 1883; tenth edition, with many changes by sir Richard Palgrave, published Dec. 1893. Mr. G. Barnett Smith's elaborate "History of the English Parliament" was published Nov. 1892; see *Triennial* and *Septennial*. Lee; this embankment, faced with granite, is 886 feet in length, and projected into the river in a line with the inner side of the third pier of old Westminster-bridge. Sir Charles Barry (born 1793, died 1860) was the architect of the sumptuous pile of buildings raised since 1840. The whole stands on a bed of concrete twelve feet thick; to the east it has a front of about 1000 feet, and covers an area of nine statute acres. It contains 1100 apartments, 100 staircases, and two miles of passages or corridors. The great Victoria tower at the south-west extremity is 346 feet in height, and towers of less magnitude crown other portions of the building. The great clock in the clock tower was built 1859 by the firm of Dent from the designs of the late lord Grimthorpe. The cost was 4,080l., the bells increasing the total to 11,934l. The dials are 234 ft. in diameter; hour hands 11 ft. long; minute hands 14 ft.; distance between each minute on the dials 14 ins. The only larger dial in the world is at Mechlin church—40 ft. wide; but there is no minute-hand, which makes an enormous difference in the power required to wind the clock. The clock reports its own rate to Greenwich by electricity twice a day. The average error is under 2 seconds a day. In the recess of 1894; extensive alterations were made in the house and private rooms to promote the comfort of the members and public.

Lee; this embankment, faced with granite, is 886 feet in length, and projected into the river in a line with the inner side of the third pier of old Westminster-bridge. Sir Charles Barry (born 1795, died 1860) was the architect of the sumptuous pile of buildings raised since 1840. The whole stands on a bed of concrete twelve feet thick; to the east it has a front of about 1000 feet, and covers an area of nine statute acres. It contains 1100 apartments, 100 staircases, and two miles of passages or corridors. The great Victoria tower at the south-west extremity is 326 feet in height, and towers of less magnitude crown other portions of the building. The great clock in the clock tower was built 1839 by the firm of Dent from the designs of the late lord Grimthorpe. The cost was 4,000*l.*, the bells increasing the total to 11,934*l.* The dials are 24 ft. in diameter; hour hands 11 ft. long; minute hands 14 ft.; distance between each minute on the dials 14 ins. The only larger dial in the world is at Meehin church—40 ft. wide; but there is no minute-hand, which makes an enormous difference in the power required to wind the clock. The clock reports its own rate to Greenwich by electricity twice a day. The average error is under 2 seconds a day. PARLIAMENT OF IRELAND, it is said, began with conferences of the English settlers on the hill of Tara, in 1173. Writs for knights of the shire were issued in 1295. The Irish parliament met last on 2 Aug. 1800; the bill for the union having passed.

PARLIAMENT OF SCOTLAND consisted of barons, prelates, and abbots, and occasionally of burgesses. A great national council was held at Scone by John Balliol, 9 Feb. 1292; and by Robert Bruce at Cambuskenneth, in 1326. A house of commons was never formed in Scotland. The parliament of Scotland sanctioned the act of union on 16 Jan. 1707, and met for the last time on 22 April, same year.

The parliament hall, Edinburgh castle, erected by James I., in 1434, was thoroughly and judiciously restored by M. Hippolyte Blanc, at the expense of the late Mr. Nelson and family. The hall was reopened, Feb. 1891. The undertaking was greatly promoted by the investigations of lords Napier and Ettrick, major Gore Booth, and Mr. R. Chambers.

PARLIAMENT OF PARIS was instituted by Philip Augustus II., 1190, and was made the chief court of justice in France by Philip IV.; at his suggestion it revoked a bull of pope Boniface VIII., 1302. It was suppressed by Louis XV., 1771; restored by Louis XVI., 1774; demanded a meeting of the states-general in 1787; and was suspended by the national assembly, 3 Nov. 1789; see *Constitution*.

Russell, Mr. Asquith, and others counsel for Mr. Parnell and other M.P.'s (65); attorney-general Sir Richard Webster, Mr. W. Graham and others for the *Times*, 17 Sept. 1888; proceedings begin 22 Oct. 1888.  118th to 128th sitting: Sir Henry James' address for the *Times* 31 Oct.-22 Nov. "  
 The report of the commissioners was laid before parliament, 13 Feb. 1890. The following is an abridgment of their conclusions:—I. That the respondent members of parliament collectively were not guilty of conspiring for the absolute independence of Ireland as a separate nation, but that some of them (Messrs. M. Harris, Dillon, W. O'Brien, W. Redmond, O'Connor, J. Condon, and J. J. O'Kelly), together with Mr. Davitt, established the Land League mainly for that purpose. II. That the respondents [44] did conspire to promote agrarian agitation, the non-payment of rents, and the expulsion of the landlords (styled the English garrison). III. That they acquitted Mr. Parnell and others of the charge of insincerity in their denunciations of the Phoenix Park murders, and affirmed the fac-simile letter to be a forgery. IV. They found that the respondents did disseminate the *Irish World* and other newspapers, intending to incite to sedition and other crimes. V. That the charges of incitement to crime, except by intimidation, and of payments for that purpose, were not proved. VI. They found that the respondents did not denounce the system of intimidation, though they knew its effects; and VII. That they defended persons charged with agrarian crime, and supported their families, but it was not proved that they subscribed for testimonials for, or were intimately associated with, notorious criminals, or aided their escape by payments. VIII. That they found that the respondents made payments to

compensate persons injured in the commission of crime. IX. That the respondents did invite and obtain the assurance and co-operation of the Physical Force Party in America, including the Clan-na-Gael, and did not repudiate the action of that party.

[Certain allegations against Mr. Parnell were declared not proved.]

The report adopted with thanks, by the commons, after 7 days' debate, 3-11 March; by the lords (without a division), 21 March, 1890. Mr. Gladstone's amendment rejected by 339 to 263.

**PAROCHIAL CHARITIES COMMISSION**, see *London*, 1878, and under *Charities*, 1883.

**PARRICIDE**. There was no law against it in Athens or Rome, such a crime not being supposed possible. About 172 B.C., L. Ostius having killed his father, the Romans scourged the parricide: sewed him up in a leathern sack made air-tight, with a live dog, a cock, a viper, and an ape, and thus cast him into the sea. Miss Blandy was executed at Oxford for the murder of her father, April, 1752; see *Trials*, March, 1890.

**PARSEES** or **GUEBRES**, the followers of Zaradusht, called by the Greeks Zoroaster, who is doubtfully said to have lived before sixth century B.C. (see *Magi*), dwelt in Persia till 638, when, at the battle of Kadeeah, their army was decimated by the Arabs, and the monarchy annihilated at the battle of Náhávend in 641. Many submitted to the conquerors, but others fled to India, and their descendants still reside at Bombay (where they are termed Parsees). Sir Jamsetjee Jejeebhoy, the 3rd baronet, was elected president of the community there, July, 1877. Mr. Dadabhai Naoroji, a Parsee merchant, was for several years professor of Gujarati at University college, London. He was nominated as M.P. for the Holborn district, but not elected, 1886; elected 6 July, 1892, for Central Finsbury; visits Bombay, Dec. 1893. "History of the Parsis," by Dosabhai Framji Karaka, published, 1884. See *Bombay*. A Parsee fire temple at Bombay was consecrated, Nov. 1891.

The week preceding Easter is termed "Holy Week," the previous week "Passion Week."

In 1864, the alleged defalcations of Mr. Edmunds, a clerk in the patent office and an official of the house of lords, led to his retirement. He obtained a pension of *Soc.*, which was taken from him by a vote of the house of lords on 9 May, 1865. Much litigation ensued. In an action against Mr. Gladstone, the prime minister, and others, for a libel, Mr. Edmunds was non-suited, 21, 22 June, 1872; and he failed in actions against several newspapers for printing a treasury minute. **PAULIANISTS** or **PAULINIANS**, followers of Paul bishop of Samosata, afterwards patriarch of Antioch, 260, who are said to have denied Christ's divinity and the trinity; he was excommunicated 269 by a council at Antioch.

**PAULICIANS**, a sect of Christian reformers, arose about 652. Although they were severely persecuted, they spread over Asia Minor, in the 9th century, and finally settled at Montford, in Italy, where they were attacked by the bishop of Milan in 1028. Severe decrees against them were made in 1163, and they gradually dispersed; very probably sowing the seeds of the great reformation of the 16th century.

**PAUL JONES**, a Scotchman, born 1742; died at Paris, 1792. He commanded an American privateer during the American war, and made daring depredations on British commerce. He pillaged the house of lord Selkirk, near Kirkcudbright, and at Whitehaven burnt shipping in the harbour, April 1778. The Dutch permitted Paul Jones to enter their ports with two British ships of war which he had taken, and which the stadtholder peremptorily refused to deliver up, 1779.

His remains discovered in Paris and removed to the United States by a squadron of U.S. warships under the command of r.-adm. C. D. Sigsbee (see *France*). 500 marines escort the body from Paris to Cherbourg, 7 July, 1905.

**PAUL'S CROSS, ST.** (London), which stood at the north side of the cathedral, was a pulpit formed of wood, mounted upon steps of stone, and covered with lead, from which the most eminent divines were appointed to preach every Sunday in the forenoon. To this place the court, the mayor, the aldermen, and principal citizens used to resort. It was in use as early as 1259, and was appropriated not only to preaching, but to political and ecclesiastical discourses, &c. The cross was demolished in 1643, by order of the parliament.

Mr. Henry C. Richards, K.C., M.P. for East Finsbury, 1895-1905; died 1 June, 1905; left 3,000*l.* for the erection of a new cross on the site of the old cross.

**PAUL'S SCHOOL, ST.**, was endowed in 1512 by John Colet, dean of St. Paul's, for 153 boys "of every nation, country, and class," in memory of the number of fishes taken by Peter (*John* xii. 11). The first schoolhouse was burnt in 1666; the second, by Wren, was taken down in 1824, and another building erected by George Smith. William Lilly was the first master, and his grammar is still used by the school. *Times*. The claim of the Mercers' company to be owners instead of trustees of Colet's estate was set aside by the vice chancellor, 11 Feb. 1870. The school ordered to be removed to West Kensington; site bought, June, 1878. New building designed by Mr. Waterhouse opened by lord Selborne, 23 April, 1884. The number of scholars has been increased. New schemes for the management of the school were issued by the charity commissioners, 1876, 1879, and 1893; after much discussion and opposition a scheme was sent to the committee of council of education for approval, May, 1894; finally modified, July, 1894; new arrangement, Feb. 1899; further arrangement, 16 June, 1900, under which scheme it is now governed.

**PAUPERS**, see *Poor*.

**PAVAN**, Pavane, or Pavin, was a slow dance of the 16th and 17th centuries, sometimes accompanied by singing.

**PAVEMENT.** The Carthaginians are said to have been the first who paved their towns with stones. The Romans, in the time of Augustus, had pavement in many of their streets; the Appian way, a paved road, was constructed 312 B.C. In England there were few paved streets before Henry VII.'s reign. London was first paved about 1533. It was paved with flagstones between 1815 and 1825; see *Wood Pavement*. Asphalt has been much used since 1869. Wood reported to be the best for road paving in London, May, 1876, and is now (1905) extensively used for paving the leading thoroughfares in London, and other cities and large towns.

Grano-metallic stone laid down in a plastic state in part of the Strand, London, and in other places, 1885. Tarred macadam, as a new and durable pavement at Hamilton, Ontario, reported successful, Nov. 1900.

**PAVIA** (N. Italy), the ancient *Ticinum* or *Papia*. Its university, founded by Charlemagne, is said to be the oldest in Europe. Pavia was built by the Gauls, who were driven out by the Romans, and these in their turn were expelled by the Goths: in 568 it was taken by the Lombards, and became the capital of their kingdom. In the 12th century it was erected into a republic, but soon after was subjected to Milan and followed its fortunes. On 24 Feb. 1525, a battle was fought near here between the French and the Imperialists, when the former were defeated, and their king, Francis I., after fighting with heroic valour, and killing seven men with his own hand, was at last obliged to surrender himself a prisoner. It was long asserted that Francis wrote to his mother, Louisa of Savoy, regent of the kingdom during his absence, saying, *Tout est perdu, madame, fors l'honneur* (All is lost, madam, except honour). The words are now said to have been, *L'honneur et la vie qui est sauvée*.

**PAWNBROKING.** The Roman emperors lent money upon land. The origin of borrowing money by means of pledges deposited with lenders is referred to Perugia, in Italy, about 1462. The institutions were termed *monti di pietà* (which see). Soon afterwards it is said that the bishop of Winchester established a system of lending on pledges, but without interest. The business of pawnbrokers was regulated in 1756, and licences issued in 1783. The rate of interest on pledges was fixed in 1800. In London there were, in 1851, 334 pawnbrokers; and in England, exclusively of London, 1127; the number is increasing more than in proportion to the population. In 1860 an act was passed enabling pawnbrokers to charge a half-penny for every ticket describing things pledged for a sum under 5s. The acts relating to pawnbrokers were amended in 1856, 1859, 1860. The law was consolidated in the pawnbrokers' act passed 10 Aug. 1872.

**PAX**, a small tablet, generally silver, termed, *tabula pacis* or *osculatorium*, kissed by the Roman Catholic priests and laity; substituted for the primeval kiss of peace in the early church. The pax is said to have been introduced about the 12th century.

**PAYMASTER-GENERAL.** In 1836 the army and navy pay departments were consolidated into the paymaster-general's office, sometimes held by a cabinet minister.

**PAYMENT** of M.P.'s, see *Parliament*, 1893; 1895. They are paid in the United States, and in some of our colonies.

**PEABODY FUND.** Mr. George Peabody, an American merchant (born 18 Feb. 1795, died 4 Nov. 1869), who had made his fortune in London, gave on 12 March, 1862, 150,000*l.*, on 21 Jan. 1866, 100,000*l.*, on 5 Dec. 1868, 100,000*l.*, and by his will directed his trustees to pay 150,000*l.*—in all 500,000*l.*—to ameliorate the condition of the London poor; to this amount has been added 958,561*l.*, received for rent and interest, making a total to 31 Dec. 1904, of 1,458,561*l.*

The first block of buildings for working classes, termed "Peabody dwellings," in Commercial street, Spitalfields, was opened 29 Feb. 1864; and others since, in Spitalfields, Islington, Shadwell, Westminster, Chelsea, Bernondsey, &c.; found to be self-supporting. 1878. There were in 1905, 19 groups of dwellings, covering an area of 1,425,354 sq. ft., providing accommodation for over 19,000 persons.

One which was brought in 1574 to Philip II., of the size of a pigeon's egg, was valued at 14,400 ducats. A pearl named the *Incomparable*, spoken of by De Boete, weighed thirty carats, equal to five pennyweights, and was about the size of a muscadine pear. The pearl mentioned by Tavernier, as being in possession of the emperor of Persia, was purchased of an Arab in 1633, and is valued at a sum equal to 110,400l.

**PEAT**, see *Bogs*. A peat coal and charcoal company, established in 1873, when coal was 41s. a ton.

"**PECULIAR PEOPLE**," a small sect founded in London by Wm. Bridges and Jas. Ban-

yard in 1838; chief seat Essex. Two members, Thomas and Maryanne Wagstaffe, were tried and acquitted of manslaughter, 29 Jan. 1868. They had neglected getting medical assistance for their sick child, and depended on the efficacy of their elders' prayers and anointing it with oil (*James* v. 14). Many cases of healing by these means are asserted. On 8 May, 1872, a father was convicted for neglecting to get medical advice for his child who died of small pox; and the sect agreed to modify their practice. Establishments for healing diseases by prayer exist in Germany.

At another trial, Thomas Hines was acquitted, in accordance with the opinion of the court; Baron Pigott held that the case did not amount to criminal neglect because the prisoner had not called in a doctor to his sick child, 19 Aug. 1874; similar cases since; 1875-6. John Robert Downes (for neglect respecting scarlet fever) sentenced to 3 months' imprisonment 21 Sept., 1876. Thos. Senior sentenced to 4 months' imprisonment for manslaughter of his infant child, 15 Dec. 1898; similar cases since.

**PEDESTRIANISM.** Euchidas, a citizen of Platea, is said to have gone from thence to Delphi to bring the sacred fire. This he obtained, and returned with it the same day before sunset, having travelled 125 English miles. No sooner had he saluted his fellow citizens, and delivered the fire, than he fell dead at their feet. After the battle of Marathon, a soldier was sent from the field to announce the victory at Athens. Exhausted with fatigue, and bleeding from his wounds, he cried out, "Rejoice, we are conquerors!" and immediately expired.

Foster Powell, the English pedestrian, performed many astonishing journeys on foot. His expedition from London to York and back again, in 1788, is said to have been completed in 140 hours.

Captain Barclay, for a wager (on which many thousands of pounds depended), walked 1000 miles in 1000 successive hours, each mile in each hour, in forty-two days and nights (less 8 hours). His task was accomplished on 10 July, 1859.

On 7 Oct. 1861, a 12 miles foot-race was held, when Levett, the champion of England, ran 7 miles in 37 minutes 27 seconds; Deerfoot, a Seneca Indian, ran 13 miles in 65 minutes 5 seconds; and Mills ran 10 miles in 54 minutes 10 seconds: other races followed.

**PELOTA**. The national ball game of the Basques, but, like the Basques themselves and their language, the origin is unknown. It is extensively played in Spain as well as the Basque provinces, and also in South America and Mexico. Pelota somewhat resembles racquet. Its distinctive feature is the *chistera* or basket, which takes the place of the racquet, a sickle-shaped, wickerwork instrument, 2 ft. long on the outer curve, and 4 or 5 in. wide, with a flange on each side of the inner curve, converting it into a curved scoop; the *chistera* is strapped firmly to the right wrist of the player, enabling him to send the ball with terrific speed against the wall of the court. The qualities of pace and endurance, combined with accuracy and skill, are essential to the game. Introduced into England by the 17th century, it was played at Olympia, London, 4 Jan. 1906.

of the pendulum is said to have been applied to clocks by Galileo about 1639, and by Richard Harris about 1641. Christian Huyghens claimed this discovery, 1658. See *Clocks*. George Graham invented the compensating pendulum, 1715. Experiments were made to determine the density of the earth by pendulums by Mr. (aft. sir) G. B. Airy (aftds. astronomer-royal), and others, in a mine in Cornwall, in 1826 and 1828; and at Horton colliery 1854. In 1851, M. Foucault demonstrated the rotation of the earth by the motion of a pendulum.

The settlement by the Swedes here in 1643, was taken by the Dutch in 1655, and acquired by the British in 1664. Pennsylvania was granted by Charles II. to the duke of York, 1664; and it was sold to the Penn family, 1681. Pennsylvania was afterwards purchased from the Indians by the celebrated William Penn (son of admiral Penn), who went out from England with a number of colonists; from which period the settlement gradually increased. Mr. Penn granted a charter in May, 1701, but the emigrants from the Low Countries refused it, and separated themselves from the province of Pennsylvania. They afterwards had their own assembly, in which the governor of Pennsylvania presided. This state adopted an independent constitution in 1787, and established the present in 1790. Capital, Harrisburg; principal cities, Philadelphia and Pittsburg (*which see*). It was strongly unionist during the civil war, 1861-5; see *United States of America and Petroleum*. Several days' violent storms and heavy rain in the Alleghenies swelled the rivers, and caused the overflow of the lakes, May, 1889. At 5 p.m. 31 May, the South Fork reservoir, a lake about 4 miles square, burst the huge dam, and a mass of water rushed down the South Fork, four miles, by the deep circuitous Conemaugh valley, to its junction with the Conemaugh river, driving all before it. For a distance of about 12 miles round Johnstown the flood swept out towns and villages, destroying all the bridges, railways, and factories. South Fork, Johnstown, Cambria city, Morrellville, Sheridan, and other flourishing towns were completely blotted out. A great mass of floating wreckage, which was stopped by a stone railway bridge at Johnstown, took fire; above five hundred persons, who were hurled on the burning mass, perished. Estimated death-roll 6,000.

The most energetic measures were taken by the government, by several states, and by the railway companies for the relief of the sufferers, and for averting imminent famine and pestilence. Robbers of the dead and living were lynched by a vigilance committee. Troops were sent to maintain order, liberal subscriptions were begun in London, Paris, and other places, June.

It is stated that the dam had previously given visible signs of its being in a very insecure condition, and had not been properly constructed. Several towns and villages submerged, June; many bridges swept away; above 150 deaths reported.

After heavy rains, when the rivers had become torrents, early on 5 June, a cloud burst over the Pittsburgh oil regions, causing great inundations. At Titusville the tanks of oil and distilled benzine were upset and were ignited by lightning and the city was fired. A flaming stream with floating wreckage carried all before it, destroying the bridges. Explosions followed, causing a panic, and the people fled to the hills, women and children being trampled on during the rush. The fiery river reached Oil city, 18 miles distant, and a large part of it was reduced to ashes or submerged. About 150 persons were either drowned or burnt at Titusville, and about 200 missing. The loss of property at the two cities was estimated at 3,000,000 dollars; large sums were subscribed for the relief of the sufferers,

**PENNY.** The ancient silver penny was the first silver coin struck in England, and the only one current among the Anglo-Saxons. The penny until the reign of Edward I. was struck with a cross, so deeply indented that it might be easily parted into two for halfpence, and into four for farthings, and hence these names. Copper penny and two-penny pieces were coined by Boulton and Watt, at Soho, Birmingham, in 1797, and were accounted the finest of our copper currency; see *Coins*, &c.—**PENNY-POST**; see *Post-office*.—**THE PENNY CYCLOPEDIA** in 1833 (supplements in 1846 and 1858). **PENTAMETER VERSE** (five feet), first used about the 7th century B.C.; see *Elegy*.

**PENTATEUCH.** The name (Greek *penta-teukos*, whence Pentateuch) was applied by Origen, one of the greatest of the Greek fathers (185-254), to the first five books of the Old Testament, of which Moses was the traditional author; Joshua is by modern critics included among these earlier writings, the six books being styled the *Hexateuch*. The authorship of the Pentateuch by Moses, and of the book bearing the name of Joshua, was, until the 19th century, generally accepted by the Christian Church. Modern criticism, although differing on the questions of age and structure, is unanimous in the opinion that the Pentateuch is composed from documents of various dates and authorship. Discrepancies, as in the double narrative of the Creation (Gen. i.-ii. 4, and Gen. ii. 5 *et seq.*), the statement (Gen. xxxvi. 31) that "these are the kings that reigned over the land of Edom before there reigned any king over the children of Israel," passages reflecting the prophetic mode of thought of the prophetic writings, and those indicating the interests and ideas of the priesthood, led to the inference that the Pentateuch was compiled from various sources. This found expression in the views of some medieval Jewish scholars, as Ibn Ezra; of Roman Catholics, as Andreas du Maes (16th cent.); and by philosophers, as Spinoza (17th cent.). Jean Astruc, a Belgian physician (1753), may be regarded as the pioneer of modern criticism on the subject. He distinguished two great sources—A the Elohist, and B the Jehovist, and 10 smaller writings; the compilation of these he attributed, however, to Moses. (His hypothesis was introduced into Germany by Eichhorn.) Investigations of the documents and hypotheses founded on them were carried on by Eichhorn, Ilgen, Geddes, De Wette, Bleek, Delitzsch, Ewald, Schrader, Hupfeld, Kuenen, Wellhausen, and other scholars, giving rise to the "Older Document Hypothesis," the "Fragment Hypothesis," the "Supplement Hypothesis," the "Crystallization Hypothesis," and the "Modern Document Hypothesis," which regards the Pentateuch as composed of 4 principal elements: P the Priestly Code, the older Elohist (the *Grundschrift* of Wellhausen); E the second Elohist; J the Jahvist, and D the Deuteronomist, designed by some critics A, B, C, D respectively. Scholars differ as to the relative age of the Jahvist and Elohist documents. The Deuteronomist, who composed the law-book found in the reign of Josiah, king of Judah, 621 B.C., is third in point of time; the Priestly Code is regarded as the latest of these writings, and is post-exilic. See Kuenen's "Historico-critical Inquiry into the Origin and Composition of the Hexateuch," Driver's "Literature of the Old Testament," G. A. Smith's "Modern Criticism and the Preaching of the Old Testament," Cheyne's "Founders of Old Testament Criticism," Wellhausen's "De Komposition des Hexateuchs."

**PERUGIA**, a city of central Italy; as *Perousia*, anciently one of the Etruscan confederation. It allied itself with the Samnites, but was ruined by two defeats by the Romans, 309 and 295 B.C. It was taken by Octavius Caesar from the adherents of Antony; many of whom were immolated on altars by their victor, 41. Leo X. took Perugia from the rival families Oddi and Baglioni, in A.D. 1520. An insurrection here against the pope was put down by the Swiss with great cruelty, 20 June, 1859. Perugia was taken by the Sardinian general Fanti, in Sept. 1860, when the cruel papal general Schmidt and 1600 men were made prisoners.

**PERUKE** or **WIG**. The ancients used false hair, but the peruke was first worn in France and Italy about 1620; and introduced into England about 1660, and prevailed more or less till about 1810.

It is said that bishop Blomfield (of London), in 1830, obtained permission for the bishops to discontinue wearing their wigs in parliament, of which they gradually availed themselves.

**PERUVIAN BARK**, *see Jesuits' Bark*.

**PESCHIERA**, a strong Austrian fortress, on an island in the Mincio, near the Lago di Garda, N. Italy. It has been frequently taken by siege:—by the French, 1796; by the Austrians and Russians, 1799; by the French again, 1801; given up by them, 1814; taken by the Sardinians, May, 1848; retaken by Radetsky, March, 1849. The Sardinians were preparing to besiege it in July, 1859, when peace was made. It was given up to the Italians, 9 Oct. 1866; *see Quadrilateral*.

**PESSIMISM** (from *pessimus*, the worst), the opposite doctrine to *optimism* (*which see*). Mr. James Sully's "Pessimism, a History and a Criticism," was published in 1877. Arthur Schopenhauer (1788-1860), an eminent pessimist, says, "All life is effort, all effort is painful, the pains of life must predominate."

**PESTALOZZIAN SYSTEM** of education was devised by John Henry Pestalozzi, born at Zurich in Switzerland, in 1746, died 17 Feb. 1827. In 1775 he turned his farm into a school for educating poor children in reading, writing, and working; but he did not succeed. In 1798 he established an orphan school where he began with the mutual instruc-

tion, or monitorial system, since adopted by Lancaster; but his school was soon after turned into a hospital for the Austrian army. In 1802, in conjunction with Fellenberg, he established his school at Hofwyl, which at first was successful, but eventually declined through mismanagement.

**PESTH** (Hungary), built about 889, on the east bank of the Danube, opposite Buda, was repeatedly taken and besieged in the wars of Hungary, particularly with the Turks. The great insurrection broke out here, and the minister, count Lamberg, was killed, 28 Sept. 1848. Budapesth was taken by the imperialists, 5 Jan. 1849. The Hungarians afterwards defeated the Austrians, who were obliged to evacuate it 18 April, same year; see *Hungary*. Budapesth formally constituted capital of Hungary, Nov. 1873.

Hungarian national exhibition opened 2 May, 1885.

**PESTILENCE**, see *Plague*.

**PETALISM** (from the Greek *petalon*, a leaf), a mode of deciding upon the guilt of citizens of Syracuse, similar to the Athenian ostracism, the name being written on a leaf (generally of an olive) instead of on a shell, about 460 B.C. If guilt were established the sentence was usually banishment.

**PETARD**, or **PETAR**, an invention ascribed to the Huguenots in 1579. Petards of metal, nearly in the shape of a hat, were employed to blow up gates or other barriers, and also in countermines to break through into the enemy's galleries. Cahors was taken by Henry IV. by means of petards, in 1580, when it is said they were first used. "Hoist with his own petar." *Shakespeare*, Hamlet iii. 4.

**PETER THE GREAT'S WILL**, see under *Wills*.

**PETER THE WILD BOY**, a savage creature found in the Harzwald, electorate of Hanover, when George I. and his friends were hunting. He was found walking on his hands and feet, climbing trees like a squirrel, and feeding on grass and moss, Nov. 1725. At this time he was supposed to be thirteen years old. He died, while under the care of an English farmer, Feb. 1785, unchanged in his habits.

**PETERBOROUGH**, anciently Medeshamstede (Northamptonshire); obtained its present name from a king of Mercia founding an abbey and dedicating it to St. Peter about 655. The church, destroyed by the Danes, was rebuilt with great beauty. The tower becoming dangerous, restoration resolved on, Dec. 1882. Foundation laid of new building, 7 May, 1884. Choir re-opened 11 July, 1889; Cathedral re-opened, 14 Oct. 1890; further restoration, May, 1894; completed (total cost about 80,000*l.*), July, 1902. The bishopric was erected by Henry VIII., out of the lands of dissolved monasteries in the diocese of Lincoln. The first bishop was John Chambers, the last abbot of Peterborough, 1541. The see was valued in the king's books at 419*l.* 19*s.* 11*d.* Present income 4500*l.* The oldest church clock known is said to be at Peterborough. Population, 1881, 21,228; 1891, 25,172; 1901, 30,870.

Exhibition of relics of Mary queen of Scots opened 19 July, 1887.

**PETERSBURG, ST.**, the modern capital of Russia, founded by Peter the Great, 27 May, 1703. He built a small hut for himself, and some wooden hovels. In 1710, the count Golovkin built the first house of brick; and the next year, the emperor, with his own hands, laid the foundation of a house of the same material. The seat of empire was transferred from Moscow to this place in 1712. Here, in 1736, a fire consumed 2000 houses; and in 1780, another fire consumed 11,000 houses; this last fire was occasioned by lightning. Again, in June, 1796, a large magazine of naval stores and 100 vessels were destroyed. The winter palace was burnt to the ground, 29 Dec. 1837. The railway to Moscow was finished in 1851; to Berlin, opened 5 May, 1862. On 10 June, 1862, property to the amount of nearly a million sterling was destroyed by fire. **PETER'S CHURCH, ST. (Rome)**, originally erected by Constantine, 306. About 1450, pope Nicholas V. commenced a new church. The present magnificent pile was designed by Bramante; the first stone laid by pope Julius II. in 1506. In 1514, Leo X. employed Raphael and two others to superintend the building. Paul III. committed the work to Michael Angelo, who devised the dome, in the construction of which 30,000 lbs. of iron were

used. The church was consecrated 18 Nov. 1626. The front is 400 feet broad, rising to a height of 180 feet, and the majestic dome ascends from the centre of the church to a height of 324 feet; the length of the interior is 600 feet, forming one of the most spacious halls ever constructed. The length of the exterior is 669 feet; its greatest breadth within is 442 feet; and the entire height from the ground 432 feet. Renewal of the leaden envelope completed, July, 1884.

**PETER'S PENCE**, presented by Ina, king of the West Saxons, to the pope at Rome, for the endowment of an English college there, about 725; so called because agreed to be paid on Peter Mass, 1 Aug. The tax was levied on all families possessed of thirty pence yearly rent in land, out of which they paid one penny. It was confirmed by Offa, 777, and was afterwards claimed by the popes as a tribute from England, and regularly collected, till suppressed by Henry VIII. 1534. Camden. A public collection (on behalf of the pope) was forbidden in France in 1860.

The Peter's pence presented at the pope's jubilee was said to amount to 263,950*l.*; Great Britain, 48,000*l.*; Ireland, 700*l.* Feb. 1893. See Pope.

**PETERWARDEIN** (in Austria), was taken by the Turks, July, 1526. Here prince Eugene of Savoy gained a great victory over the Turks, 5 Aug. 1716.

**PETITIONS**. The right of petitioning the crown and parliament for redress of grievances is a fundamental principle of the constitution. Petitions are extant of the date of Edward I. In the reign of Henry IV. petitions began to be addressed to the house of commons in considerable numbers. In 1837 there were presented to parliament 10,831 petitions, signed by 2,905,905 persons; in 1859, 24,386, signed by 2,290,579; in 1867, 12,744, signed by 1,145,216; 1893-94, 33,742, signed by 5,010,056; 1901, 9,885, signed by 1,111,342. See *Abhorrens*, and *Rights*.

A petition from Boulogne for a consul was brought in, but not received by the commons. April-May, 1876. Evidence before a committee of the commons disclosed systems whereby vast numbers of fictitious and forged signatures were obtained, rendering the petitions for and against the continuance of the London coal and wine dues utterly valueless, May, 1887.

**PETO'S ACT**, 13 & 14 Vict. c. 28 (1850), renders more simple and effectual the titles by which religious bodies hold property.

**PETRA**, the ancient Sela, in mount Seir, near mount Hor, in the land of Edom. In the 4th century A.C. it was held by the Nabatheans, who successfully resisted Antigonos. About A.D. 70 it was the residence of the Arab princes named Aretas. It was conquered by Cornelius Palma, and annexed to the empire under Trajan, 105, to which period its remarkable monuments are ascribed. It was an important station for commercial traffic with Rome. It has been described by Burekhardt and other travellers.

**PETRARCH AND LAURA**; celebrated for the refined passion of the former for the latter, began in 1327, and the chief subject of his sonnets.

**PHIPPS' EXPEDITION.** The hon. captain Phipps (afterwards lord Mulgrave) sailed from England in command of the *Sea-Horse* and *Careless* ships, to make discoveries, as near as possible to the North Pole. In August 1773, he was for nine days environed with barriers of ice, in the Frozen Ocean, north of Spitzbergen, 80° 48' N. lat. A brisk wind in two or three days accomplished their deliverance. They returned to England without having made any discoveries, 20 Sept. 1773. Nelson was coxswain to the second in command.

**PHLOGISTON**, a term employed by Stahl to designate the hypothetical matter or principle of fire; "the inflammable principle" of bishop Watson, near the close of the 17th century. The chemical theory based upon it was refuted by Lavoisier, 1790, who substituted for it the theory of oxygenation.

**PHOCIS**, a state in Northern Greece. The Phocians seized Delphi 357 B.C., and commenced the second Sacred War. They were opposed by Thebes and other states, and were utterly subdued by Philip II. of Macedon in 346. By the excavations of the British school of archaeology at the remains of two ancient temples of Apollo, with relics of bronzes, inscriptions, &c., and at Hyampolis, a shrine of Artemis (Diana), &c., were discovered, reported, 30 Aug. 1894.

**PHENICIA**, on the sea coast of Syria. The natives were the most eminent navigators and traders of antiquity, their cities or allied states being Tyre, Sidon, Berytus, Tripoli, Byblos, and Ptolemais, or Acee. From the 10th to the 13th centuries before Christ, they established colonies on the shores or isles of the Mediterranean—Carthage, Hippo, Utica, Gades, and Panormus, and they are said to have visited the British Isles. Phenicia was conquered by Cyrus, 537 B.C.; by Alexander, 332; by the Romans, 47; and after partaking of the fortunes of Palestine, was added to the Ottoman empire, A.D. 1516. See *Sidon* and *Tyre*.

**PHENIX CLUBS**, of a treasonable character, were formed in Ireland in 1858. They met at night to drill. Several persons were arrested and tried in March, 1859, at Tralee; but the jury could not agree on their verdict. Daniel Sullivan was condemned to penal servitude for ten years, April, 1859. Eventually some of the prisoners pleaded guilty, and were discharged on being bound over to keep the peace.

**PHONOGRAPH**, a machine proposed to be attached to pianofortes and other keyed instruments, by which any music that is played may be written down on blank paper, since it rules and prints the notes simultaneously. It was patented by Mr. Fenby, 13 June, 1863. The motive-power is electro-magnetism. Machines with a similar object were projected by Mr. Creed in 1847; Mr. J. F. Unger in 1774; and by Mr. Carreyre in 1827. See *Telephonography*.

A new phonograph by Thomas Alva Edison, electrician of New Jersey, was announced. Dec. 1877. Linear indentations are made by means of a pin in a sheet of tinfoil by speaking or singing; and from these casts may be taken. When these are placed upon the diaphragm of a telephone connected with revolving apparatus, the sounds may be reproduced with a wondrous effect. Improved by Mr. Shelford Bidwell, 1879. See *Telephony*.

Many improvements made, and others in progress; almost perfect results obtained, and immense number of instruments in use. 1905.

**PHONOGRAPHY** (from the Greek *phōnē*, sound), suggested by Franklin, 1768. The Phonetic society, whose object was to render our mode of writing and printing more consonant to sound, was established, 1 March, 1843; sir W. C. Trevelyan, president, and Mr. Isaac Pitman, secretary, the latter being the inventor of the system which was made known in 1837; knighted, May, 1894; died, aged 84, 22 Jan. 1897. Among other works published by the promoters of the system, was the "Phonetic News," in 1849. **PHOSPHORESCENCE**. The property possessed by some bodies of retaining luminosity after exposure to light observed by the ancients; especially noticed by Vincenzo Cascariolo (1602), Boyle, Canton, Wilson, and others; and specially studied by Edmond Bequerel, and Balmain. See *Luminous Paint*, *Air* (footnote).

**PHOSPHORUS** was discovered in 1667, by Brandt, of Hamburg, who procured it from urine. The discovery was prosecuted by John Kunkel, a Saxon chemist, about 1670, and by the hon. R. Boyle about the same time. *Nouve. Dict.* Phosphoric acid is first mentioned in 1743, but is said to have been known earlier. Gahn pointed out its

existence in bones in 1769, and Scheele devised a process for extracting it. Canton's phosphorus is so called from its discoverer, 1768. Phosphorated hydrogen was discovered by Gengembre in 1812. The consumption of phosphorus has immensely increased since the manufacture of lucifer matches. In 1845, Schrötter, of Vienna, discovered allotropic or amorphous phosphorus, which ignites more slowly and is less unwholesome in working than ordinary phosphorus.

Mr. S. A. Rosenthal and Dr. S. J. von Komoekl succeeded in preparing matches without yellow phosphorus, reported . . . . . Sept. 1898

**PHOTOGRAPHY.** The action of light on chloride of silver was known as early as the 16th century. The phenomenon was studied by Scheele (1777), Senebier (1790), Ritter and Wollaston (1801). From the results of these investigations, experiments were made by Thos. Wedgwood and Humphry Davy, in the Royal Institution, London, which were published in its *Journal*, 1802. Wedgwood may be regarded as the first *photographer*. His paper was entitled "an account of a method of copying paintings upon glass, and of making profiles by the agency of light upon nitrate of silver."

Further discoveries were made by Niepce in 1814, and Sir J. Herschel in 1819.

Louis J. M.-Daguerre commenced his experiments in 1824; and in 1826 joined Joseph Nicéphore Niepce, and worked with him till the death of the latter in 1833. The production of *Daguerre type* plates was announced in Jan. 1839; and the French chamber of deputies granted a pension to Daguerre and to Niepce's son Isidore.

In 1839 Mr. Henry Fox Talbot first published his mode of multiplying photographic impressions by producing a *negative* photograph (i. e., with the light and shades reversed) from which any number of positive copies may be obtained. PHOTOGRAPHY, the art of producing engravings by the action of light and electricity. The earliest specimens were produced by Nicéphore Niépce, and presented by him in 1827 to the great botanist, Robert Brown. Great advances have since been made in this art by MM. Niépce de St. Victor (who published a treatise on it in 1856), Vitry, W. R. Grove, H. Fox Talbot, &c. In 1852, Paul Pretsch patented a process which he called "Photogalvanography."

**PHOTOPHONE**. In this apparatus, constructed by professor Graham Bell and Mr. Sumner Tainter of Washington, in 1880, a thin plane mirror is thrown into vibration by the voice; a beam of light is reflected from this mirror and received at a distance by a cell of the metal selenium; when, by arrangement, this is connected with a telephone, the sounds are reproduced.

Hippocrates, the father of medicine, flourished about 422 B.C., and Galen, born A.D. 131, was the oracle of medical science. About 980 Avicenna, an Arab, wrote a system of medicine. Dr. R. Quain's *Dictionary of Medicine*, published 1882, 3rd edition issued 1902. "The System of Medicine," consisting of contributions by eminent physicians and surgeons, edited by sir J. Russell Reynolds, in 5 vols., published 1866-75. A "System of Medicine," by many writers, edited by dr. Clifford Allbutt, vol. I., June 1896; vol. III., 1898. See *Medical*.

The dogmatic age of medicine lasted till the Reformation, when it was attacked by Paracelsus (1493-1541), and Vesalius (1514-64). Since 1800 medical practice has been completely transformed by physiological and chemical research.

The discovery of the circulation of the blood, by Dr. Harvey, furnished an entirely new system of physiological and pathological speculation, 1628. See *Medical* and *Societies*.

**PHYSICIAN TO THE KING**.—John, the king's chaplain and physician (afterwards bishop of Bath and Wells), mentioned 1090.

The earliest mandate or warrant for the attendance of a physician at court is dated 1454, and 33 Henry VI., a reign fertile in the patronage which was afforded to practitioners in medicine; but no appointment existed which can justly be called physician to the royal person. By this warrant the king, with the consent of his privy council, deputed to three physicians and two surgeons the regulation of his diet, and the administration of such medicines and remedies as might be sufficient for his cure, without any allusion to the previous existence or permanency of the office which they were authorised for a time to fill, or to a remuneration for their services.—*Life of Linacre*.

Linacre was elected the president of the college. Dr. W. Harvey was great benefactor to this institution, 1653. He built a library and public hall, which he granted for to the college, with his books and instruments. The college was afterwards held in a building Warwick-lane, erected by sir C. Wren, when continued till 1825, when the present elegant edifice in Trafalgar-square was erected from design by sir R. Smirke. The college is composed of fellows and members, formerly called licentiates and extra-licentiates. The queen's bench decided that the college was entitled by the medical act of 1886 to grant diplomas both of medicine and surgery, 8 March, 1893. The prince of Wales elected a fellow of the college, July, 1897.—The College of Physicians, Dublin, was founded by charter of Charles II. 1667, and was re-incorporated in 1692. **PHYSICS**, see under *Philosophy, Natural*.

**PHYSIOGNOMY**, a science which affords that the dispositions of mankind may be discovered from the features of the face. The origin of the term is referred to Aristotle; and Cicero was attached to the science. It became a fashionable study from the beginning of the 16th century; and in the 18th century, the essays of Le Cat and Porteneth led to the modern system.

J. K. Lavater, who endeavoured to raise physiognomy to the rank of a science, published his celebrated work "Physiognomische Fragmente," 1775-78, of which an English translation by Holcroft was published in 1791. The subject was considered by C. R. Darwin in his work "Expression of the emotions in Man and Animals," 1872, and by Mantegazza in his "Physiognomy and Expression," 1890.

**PHYSIOLOGY** is that part of physics which treats of the inner constitution of animals and plants, and the several functions and operations of all their organs and tissues. The works of Müller, Milne-Edwards, Huxley, Carpenter, Virchow, Brown-Séquard, Helmholtz, Ludwig, Du Bois-Reymond, Salomon Stricker, Rutherford and John Bucknill, are much celebrated, and Todd's "Cyclopædia of Physiology" (1836-59) is a library in itself. Physiological Society, in London, founded by Dr. Burdon-Sanderson (bart. 1899) and others, early in 1876; see *Anatomy, Biology, Morphology, Royal Institution*. International congresses of physiology have been held since 1888.

**PIACENZA**, see *Placencia*.

**PIANETTE**, a small upright piano introduced by Bord of Paris in 1857.

**PIANOFORTE**. \* The invention is attributed to Cristofalli (or Cristofori), an Italian, J. C. Schröter, a German, and Marius, a Frenchman, early in the 18th century. The strings are struck by small hammers, and not by quills, as in harpsichords. Schröter is said to have presented a model of his invention to the court of Saxony, in 1717; and G. Silberman manufactured pianofortes with considerable success in 1772. Pianofortes were made in London by M. Zumpie, a German, 1766, and have been since greatly improved by Clementi, Broadwood, Collard, Kirkman, Erard, Pleyel, and others.

Upright pianos, first made in this country, were suggested by Isaac Hawkins in 1800, and Thomas Long, in 1802. Wm. Southwell patented "cabinet pianos" in 1807; superseded, from about 1840, by the cottage, piccolo, and other pianos.

A keyed instrument at Modena was named "piano e forte," 1598.

A "stone pianoforte," formed of a series of flints and other stones of various sizes, collected in France and arranged by M. Baudre, was played on by him at the Royal Institution, on 16 March, 1866.

The *transposing* piano, invented by Mr. Henry Schallehn, was exhibited at the Savoy hotel, Westminster, 10 June, 1890.

The Janko pianoforte, with a new arrangement of keyboard, exhibited in the Portman rooms, London, W., 24 Nov. et seq. 1891, said to possess many advantages.

A "double piano," a new harpsichord and harp, played on at Messrs. Pleyel's rooms, London, 12 April, 1897.

**PICARDY** (N. France), was conquered by the English in 1346, and by the duke of Burgundy in 1417, to whom it was ceded by the treaty of Arras, 21 Sept. 1435, and annexed to France by Louis XI., 1463.

**PICCADILLY**, a fine street, W. London; the name, of uncertain origin, was Pickadilla and Pigudello, about 1660, when a house of entertainment existed near the Haymarket, termed Piccadilly hall, after which buildings were gradually extended westwards.

**PICCOLO PIANO**, a small pianoforte introduced by Robert Wornum in 1829.

**PICHEGRU'S CONSPIRACY**, see *Georges*.

\* The nucleus of the instrument was a little box over which were stretched strings: such was the cithole, the dulcimer, and the psalter. The clavichord had keys; the clavichord (about 1500) had dampers; successive improvements were the virginals (on which queen Elizabeth played), the spinet (about 1700), and the harpsichord (with two rows of keys), said to have been used in the 15th century, for which Bach and Handel composed in the 17th century. A collection of harpsichords (one dated 1555) is in the South Kensington museum. A double-pianoforte (with two keyboards reversed), giving remarkable effects (patented by M. M. Menegotti), played on at Covent-garden theatre, 21 Oct. 1878.

**PIETISTS**, a Lutheran sect, instituted in Leipsic, by Philip James Spener, a professor of theology, about 1689, with the view of reforming the popular religion. He established "colleges of pietists," with preachers resembling those of the society of friends and the methodists in Britain, about 1760. A body resembling the Pietists, named Chasidim, arose among the Jews in the Ukraine, and spread through Poland and European Turkey.

**PIEZOMETER** (Greek *piezo*, I compress), an apparatus for measuring the compressibility of liquids, invented by Ersted (died 1851); improved by Despretz & Saigey.

**PIGEONS** were employed as carriers by the ancients. Hirtius and Brutus corresponded by means of pigeons at the siege of Modena. The pigeons of Aleppo served as couriers at Alexandretta and Bagdad. Thirty-two pigeons liberated from London at 7 o'clock in the morning, 22 Nov. 1819; at noon one of them arrived at Antwerp; a quarter of an hour afterwards a second arrived; the remainder on the following day. *Phillips*. At a pigeon race, 25 July, 1872, from Spalding to London, the speed allowed was 90 seconds a mile; see *Post Office*, 1870.

In a pigeon race from Dover to Plymouth, some pigeons attained the velocity of 1,233 yards, 1,215 yards and 1,008 yards per minute 22 July, 1886. About 300 pigeon-flying societies exist in France: the organization of carrier-pigeon stations ordered by the minister for war, Jan. 1888. About 350 similar societies exist in Germany, stated Jan. 1888.

**PILCHARD FISHERY**. Peculiar to Land's End, Cornwall, reverts to W. Ireland, after suspension of two centuries (stated July, 1883).

**PILGRIMAGE OF GRACE**, a name assumed by religious insurgents in the north of England, who opposed the dissolution of the monasteries. The movement, which commenced in Lincolnshire in Sept. 1536, was suppressed in Oct.; but soon after revived in Yorkshire; and an expedition, bearing the foregoing name, having banners on which were depicted the five wounds of Christ, was headed by Aske, and other gentlemen, and joined by priests and 40,000 men of Ycrk, Durham, Lancaster, and other counties. They took Hull and York, with smaller towns. The duke of Norfolk marched against them, and by making terms dispersed them. Early in 1537 they again took arms but were promptly suppressed, and the leaders, several abbots, and many others, were executed.

**PILGRIMAGES** began with the pilgrimage of the empress Helena to Jerusalem, 326. They became very frequent at the close of the 10th century. Robert II. of France made several pilgrimages; among others one to Rome about the year 1016, perhaps in 1020, when he refused the imperial dignity and the kingdom of Italy. The pilgrimage to Canterbury is described by Chaucer in his *Canterbury Tales* about 1383. The pilgrimage of Mahometans to Mecca, the birth-place of the prophet, is commanded in the Koran. This pilgrimage was very great from India, where it has been encouraged by the princes, but discouraged by the British as idolatrous. The great mortality due to want and disease compelled the government to intervene with strict sanitary regulations, with the result that the number of deaths has diminished, and the number of pilgrims increased. See *Cholera*. Pilgrimages to shrines of the Virgin Mary in France revived in 1873, and since, in consequence of miracles alleged to have taken place at La Salette in 1846 and at Lourdes, 11 Feb. 1858; those of La Salette discredited by Pope Leo X., 1879. In some cases a head was put through a hole, the hands through two others, the nose slit, the face branded with one or more letters, and one or both ears were cut off. There is a statue of the pillory, 41 Hen. III. Many persons died in the pillory by being smothered with stones by the mob, and pelted with rotting and putrid offal. It was abolished as a punishment except for perjury, 1815, and totally abolished in 1837. The last who suffered at the Old Bailey was Peter Jas. Bossy, for perjury, 22 June, 1837.

**PINS** have been found in British barrows (*Fosbrooke*); and are mentioned in a statute of 1483. Brass pins were brought from France in 1540, and first used in England, it is said, by Catherine Howard, queen of Henry VIII. Pins were made in England in 1543. *Stow*. They were first manufactured by machinery in England in 1824, under a patent of Lemuel Wellman Wright, of the United States.

**PIOMBINO**, a principality, Italy, previously ruled by the Appiani family, was acquired by the Spaniards, 1589. It was ceded to France, 1801, and given by Napoleon to his sister Elise, wife of prince Bacciochi, who held it from 1805 to 1815, when it was restored to the Buoncampagni family, subject to Tuscany. It became part of the kingdom of Italy, 1860.

**PISTOLS**, the smallest fire-arms, said to have been invented at Pistoja in Italy; were first used by the cavalry of England about 1544. Subsequently they were made with a revolving cylindrical breech, in which are formed several chambers for receiving cartridges, and bringing them in succession into a line with the barrel ready for firing. The earliest model of this kind of arm is to be found in the museum of the United Service Institution, and is supposed to date from the reign of Charles I. An eight-chambered matchlock revolver of the 16th century is placed in the Royal Artillery Museum, Woolwich. The manufacture of pistols by machinery was first introduced into England from the United States, America, in the year 1853, by col. Colt, who invented the Colt revolving pistol, 1851. This system of manufacture induced the British government to establish the Enfield armoury, in 1855; see *Fire-Arms*.

The mutineers remained unknown to England until discovered accidentally in 1814. A ship nearing the island was hailed by a swarthy youth in the English language, when it appeared that the mutineers, soon after settling there, had married some black women from a neighbouring island, and had become a well-conducted community under the care of Adams, the principal mutineer. He died in 1829, when George Hunn Nobbs, an Englishman, who arrived a few years before, became chief. In Aug. 1852 admiral Moresby spent a few days on the island. By his means Nobbs was sent to England and obtained ordination. His death (aged 86) announced Jan. 1885. As their numbers increased, the island proved incapable of their support. The English government removed them, with all their property, in the ship *Morayshire*, on 3 May, 1856, and landed them, after a boisterous passage, on Norfolk Island, prepared previously for their reception, 5 June. The government stocked Norfolk Island with 2000 sheep, 450 head of cattle, and twenty horses, and gave them stores to last twelve months; their numbers were 66 males and 102 females.

\* The Campanile was erected to contain bells, and stands in a square close to the cathedral. It is built entirely of white marble, and is a cylinder of eight stories, each adorned with a round of columns, rising one above another. It inclines so far on one side from the perpendicular, that in dropping a plummet from the top, which is 188 feet in height, it falls sixteen feet from the base. Some thought this was done purposely by the architect; others attributed it to an accidental subsidence of the foundation. From this tower Galileo made his observation on gravitation (about 1635).

† William Pitt, second son of the great earl of Chatham, was born 28 March, 1759; became M.P. 23 Jan. 1782; moved for a reform in parliament, 7 May, 1782; became chancellor of the exchequer, July, 1782; prime minister, Dec. 23, 1783; died 23 Jan. 1806.

**PLANETARIUM,** see *Orrery*.

**PLANETS.** Jupiter was known as a planet to the Chinese and the Chaldeans, and inserted in a chart of the heavens, made about 600 B.C., and in which 1460 stars are accurately described; this chart is said to be in the national library at Paris. See *Jupiter, Mars, Saturn*. We now know eight primary planets, termed major; *Mercury, Venus, the Earth, Mars, Jupiter, Saturn, Uranus, Neptune*; and secondary or minor, situated between the orbits of Mars and Jupiter. The numerical order differs in the lists of English, German, and French astronomers. In the French and German lists, *Aglaia to Pandora* are numbered 47 to 55; *Meleté* is 56.

*Uranus*, formerly called *Georgium Sidus* and *Herschel*; discovered by W. Herschel (see *Georgium Sidus*) . . . 23 March, 1781

*Neptune*, discovered by Galle (in consequence of the calculations of Le Verrier) (see *Neptune*), 23 Sept. 1846. It had been theoretically discovered by professor J. Couch Adams of Cambridge . . . 1845

*Vulcan* (between Mercury and the Sun), said to be discovered by M. Lescaubault, a physician (not seen since), 26 March, 1850, and its discovery is now generally doubted; said to have been seen by Watson during the solar eclipse (doubted by Peters) . . . 29, 30 July, 1858

Between five and six hundred minor planets have been discovered since 1 Jan. 1801. In recent years this work has been greatly aided by photography.

During 1902 43 small planets were discovered. The minor planets are very small, being in general only a few miles in diameter. They are divided into three groups (Mars group, Chief group, and Jupiter group) according to their mean velocities.

The rapid discovery of planetoids by photography, especially by Wolf and Charlois, in recent years, has caused much confusion in records, 1892-1903.

Broom, in French *genet*, in Latin *genista*, being the only tough, pliant shrub in Palestine, the noble criminal was smartly scourged with it, and from this instrument of his chastisement he was called *Planta-genista*, or Plantagenet; other accounts are given. *Skinner and Mezeray*.

The Grecian army, about 110,000, lost but 1000. The Greeks obtained immense plunder, and henceforth delivered from the fear of Persian invasions. It was found in the sand of the river Pinto, in South America, unknown in Europe until 1741, when Don Ulloa announced its existence in the narrative of his voyage to Peru. *Greig*. In its ore have been found the metals palladium, rhodium, osmium, and ruthenium (*which see*). Platinum was malleable and ductile by Dr. Wm. Hyde Wollaston, whose processes are described in the Royal Bakerian lecture for 1829. He died in 1828. It is said, gained 30,000*l.* by his invention. 1850, M. H. Ste.-Claire Deville made known a method of obtaining platinum from its ore, of abundance and purity; and at the international exhibition of 1862 was shown a mass of platinum weighing 266*l.* of a metal hitherto considered infusible, obtained by his process, employed oxy-hydrogen flame. See *Philosophical Magazine*.

**PLATONIC YEAR**, the period of time which the equinoxes take to finish their revolution, at the end of which the stars and constellations have the same place with regard to the equinoxes that they had at first. Tycho Brahe says that this year or period requires 25,816 common years to complete it; Ricciolus computes it at 25,920; and Cassini at 24,800; at the end of which time some imagined that there would be a total and natural renovation of the whole creation.

**PLAY-GROUNDS**. In 1858 a society was established by the earl of Shaftesbury and other benevolent persons to provide play-grounds for the recreation of adults and the children of the humble classes. Ground was liberally offered by the government, and by the marquis of Westminster and others; and in 1859 an act of parliament was passed to facilitate grants of lands for this purpose, for which part of Smithfield was to be reserved. The scheme was not successful.

**PLYMOUTH BRETHREN,** a body of Christians calling themselves "the Brethren," first appeared at Plymouth about 1830. In 1851 they had 132 places of worship in England and Wales. They object to national churches as too latitudinarian, and to other dissenters as too sectarian. They receive into communion all who confess Christ, and own the Holy Ghost as his vicar. Their doctrines agree with those of most evangelical protestant churches, but they recognise no order of ministers. Mr. Darby, regarded as their founder, afterwards separated from them with some adherents.

**PNEUMATIC DESPATCH COMPANY,** to convey letters and parcels through tubes by means of atmospheric pressure and a vacuum. The company's act was passed 13 Aug. 1859, and tubes were laid down in Threadneedle-street on 12 Sept. 1860; and on 20 Aug. 1861, successful experiments were performed at Battersea. In 1862 tubes were laid down from the Euston railway station to the N.W. post-office in Camden-town, and on 21 Feb. 1863, the conveyance of the mail-bags began. In Oct. 1865, tubes had been laid down between Euston railway and Holborn; and on 7 Nov. several persons travelled in them. Engineer, Mr. Rammell. The company stopped through insufficient support, 1876.

A pneumatic tube by Siemens, employed to transmit telegraphic messages, began about Jan. 1871.

**PNEUMATIC LOOM,** in which compressed air is the motive power, invented by Mr. Harris was exhibited in London in Dec. 1864. A company was formed to bring it into general use. Pneumatic tyre company, see *Velocipede*, 1896.

**PODOSCAPHE,** see *Canoe*.

**POET-LAUREATE.** Selden could not determine the precise origin of this office.

Warton, in his *History of English Poetry*, states that in the reign of Henry III. there was a *Verificator* left, to whom an annual stipend was first paid of 100*l*.

Chaucer, on his return from abroad, assumed the title of poet-laureate; and in the twelfth year of Richard II. 1389, he obtained a grant of an annual allowance of 100*l*.

In the reign of Edward IV., John Kay was laureate. Andrew Bernard was laureate, temp. Henry VII.; and John Skelton, temp. Henry VIII.

James I. in 1615 granted to his laureate a yearly pension of 100 marks; and in 1630, this stipend was augmented by letters patent of Charles I. to 100*l*. per annum, with an additional grant of one tierce of Canary Spanish wine to be taken out of the king's store of wine yearly.

We believe that on Southey's appointment the tierce of Canary wine was commuted for 27*l*.

Laurence Eusden commenced a series of Birth-Day and New Year's Odes, which continued till the death of

Pye, in 1813.

On the death of Warton its abolition was recommended by Gibbon, whose elegant compliment on the occasion still more forcibly applied on Wordsworth's death, in 1850—"This is the best time for not filling up the office, when the prince is a man of virtue, and the poet just departed was a man of genius."

The standard of France was overthrown, many of her nobility slain, and her king was taken prisoner, and brought to London; see *Tours and Voughé*.

**POISONING.** A number of Roman ladies formed a conspiracy and poisoned their husbands. A female slave denounced 170 of them to Fabius Maximus, who ordered them to be publicly executed, 331 B.C. It was said that this was the first public knowledge they had of poisoning at Rome. Poisoning was made petty treason in England, and was punished by boiling to death (of which there are some remarkable instances), 23 Henry VIII. 1531; see *Boiling to death*. The frequency of cases of poisoning by means of arsenic, in England, caused the British legislature to pass a law rendering the sale of arsenic difficult (14 Vict. c. 13, 6 June, 1851). The sale of poison is now regulated by the Pharmacy act of 1868. Additional restrictions by act passed in 1885. The *Poisoned Grain Prohibition Act* passed 28 July, 1863.

A deadly poison, freely administered by Italians in the seventeenth century, was called *aqua tofana*, from the name of the woman Tofania, who made and sold it in small flat vials. She carried on this traffic for half a century, and eluded the police; but, on being taken, confessed that she had been a party in poisoning 600 people. Numerous persons were implicated by her, and many of them were publicly executed. All Italy was thrown into a ferment, and many fled, and some persons of distinction, on conviction, were strangled in prison. It appeared to have been chiefly used by married women who were tired of their husbands. Four or six drops were a fatal dose; but the effect was not sudden, and therefore not suspected. It was as clear as water, but the chemists have not agreed about its real composition. A proclamation of the pope described it as aquafortis distilled into arsenic, and others considered it as a solution of crystallised arsenic.

Between 1666 and 1676, the marchioness de Brinvilliers poisoned her father and two brothers and many others. She was executed, 16 July, 1676.

\* On 22 Feb. 1846, an Austrian force under general Collin, which had entered Cracow on the approach of armed bands of peasantry, was attacked and driven out of the town. A provisional government was then proclaimed by the insurgents, and two days afterwards they crossed the Vistula, expecting to be joined by the peasantry of Galicia, who were solicited by the nobles and clergy to strike a blow in the cause of liberty. The Austrian government, in order to prevent this junction, excited in the peasantry a suspicion of the motives of the nobles, and offered a reward for every noble delivered up, alive or dead; a general massacre of the nobility and clergy in the circle of Tarnow followed: the insurgents from Cracow were defeated at Gdow, whence they retreated to Podgorze, a suburb of Cracow: here they were attacked by general Collin, and driven into Cracow on the 27th of February. The forces of the three powers then began to concentrate on Cracow; the people in the town opened negotiations with the Austrians about a surrender, and while these were going on a Russian corps entered the town without resistance, and soon afterwards the revolution was at an end.

Two stars in the constellation *Ursa Major*, or Great Bear, are called *pointers* to the Polar star. The discovery of the Pole star is ascribed by the Chinese to their emperor, Hong-ti, the grandson (they say) of Noah, who reigned and flourished 1970 B.C. *Univ. Hist.* Spectroscopic observations at Lick observatory prove the star to be a triple system, i.e., a binary, with a revolution of about 4 days, moving round a third more distant star, Sept. 1899.

**POLITICAL ECONOMY**, the science  
 which has for its object the improvement of the  
 condition of mankind, and the promotion of civili-  
 sation, wealth, and happiness; was considered by  
 Plato, Xenophon, and Aristotle. Its history in  
 this country may be dated from the publication of  
 sir Wm. Petty's "Treatise on Taxes," 1662, and  
 "Political Arithmetick," 1691; Dr. Adam Smith's  
 "Wealth of Nations," 1776. The works of J. S.  
 Mill, M'Culloch, Malthus, Ricardo, Carey, Jevons,  
 Sidgwick, Marshall, and Fawcett are celebrated. A  
 professorship of political economy was established  
 at Oxford by Mr. Henry Drummond, M.P., 1825;  
 and at Cambridge, first by Mr. G. Pryme, in 1828;  
 but regularly established by the university in 1863,  
 Henry Fawcett (blind) being the first professor.

Archbishop Whately endowed a professorship at  
 Trinity college, Dublin; Isaac Butt first pro-  
 fessor. 1832

The Political Economy club, London, founded in

 ACT passed 9 Aug. 1869.

**POLITICAL UNIONS** were formed in Eng-  
 land in 1831 to carry the Reform Bill; the most  
 important was that of Birmingham.

**POLITICIANS.** A politician is described as  
 a man well versed in policy, or the well regulating  
 and governing of a state or kingdom; a wise and  
 cunning man. A man of artifice; one of deep  
 contrivance. *South.* The term was first used in  
 France about 1569. A new faction appeared,  
 known by the name of Politicians, headed by the  
 duc d'Alençon and the Montmorencies, and  
 strengthened by the accession of the Huguenots in  
 1574. The duke was arrested and the Montmoren-  
 cies sent to the Bastille.

**POLKA**, a dance said to have been invented  
 between 1830 and 1834 in Bohemia, and to have  
 obtained its name in Prague in 1835. It became  
 very popular, and was introduced into England  
 about 1844.

**POLL ACT** passed in Ireland by the Junto of  
 the Pale, putting a price upon the heads of certain  
 Irish; the earl of Desmond being then deputy,  
 5 Edward IV. 1465. This act long endured, see  
*Ireland*, 1465.

**POLLENTIA** (Piedmont, N. Italy), the site  
 of a great victory of Stilicho, the Imperial general,  
 over Alaric the Goth, 29 March, 403.

**POLL-TAX or CAPITATION TAX**, existed  
 among the ancient Romans. It was first levied in  
 England in 1380; and occasioned the rebellion of  
 Wat Tyler (see *Tyler*), 1381. It was again levied  
 in 1513. By the 18th Charles II. every subject  
 was assessed by the head, viz., a duke 100l., a  
 marquis 80l., a baronet 30l., a knight 20l., an  
 esquire 10l., and every single private person 12d.,  
 1667. This grievous impost was abolished by  
 William III. 1689.

**POLLUTION OF RIVERS**, see *Rivers*.

**POLO**, the game of ball termed hockey played  
 on horseback, became popular in England in 1872,  
 having been introduced from India. Games were  
 played by lancers and life-guards at Woolwich, 16,  
 19 July, 1872. A polo club was formed, and inter-  
 national contests held. Polo is said to have been  
 an old Russian game, mentioned 1492 under  
 the name of Chügān, as brought from Persia.  
 English beat the Americans, 3 games out of 4,  
 June, 1902.

**POLOTSK** (Russia). The French under mar-  
 shal Oudinot were here defeated by the Russians  
 under general Wittgenstein, 30 and 31 July, 1812;  
 the next day, the Russians were defeated. After  
 several smaller actions with various results, Polotsk  
 was stormed by the Russians, and retaken Oct. 1812.

**POLTOWA**, see *Pultowa*.

**POLYGAMY**, &c., was permitted among  
 the early nations, and now by Mahometans  
 and Mormons (*which see*). In Media, it was a  
 reproach to a man to have less than seven  
 wives. Among the Romans, Marc Antony is  
 mentioned as the first who took two wives. The  
 practice was forbidden by Arcadius, 394. The  
 emperor Charles V. punished polygamy with death.  
 In England, by stat. 1 James I. 1603, it was made  
 felony, with benefit of clergy. It was formerly  
 punished with transportation, but now by im-  
 prisonment or penal servitude; see *Marriages*.  
 Abolished in the United States, 23 March, 1882.—  
**POLYANDRY** (where one woman has several hus-  
 bands) is permitted in some eastern countries, the  
 children having equal rights.

**POLYGLOT**, from two Greek words denoting "many languages," is chiefly applied to editions of the Bible in several languages.

Giustini published a polyglot psalter, 1576.

1. The Complutensian Polyglot, in six vols. folio, was printed at Alcalá (Complutensis), in Spain, 1502-14; the first edition published in 1522, at the expense of the celebrated cardinal Ximenes, costing 250,000 ducats. Six hundred copies of it were printed: three on vellum. Count MacCarthy, of Toulouse, paid 483*l.* for one of these copies at the Pinelli sale.

Christian, 1890-98.

**POLYOLBION**, a poetical description of the tracts, rivers, mountains, forests, &c. of Great Britain, with historical details, by Michael Drayton, published 1606-22; a new edition, 3 vols., by the rev. Richard Hooper, was published 1876.

The polypes are of the order Zoophytes, and are partly animal and vegetable.

**POLYTECHNIC INSTITUTION**, ROYAL, Regent-street, London, was erected by Thompson in 1838, opened 6 Aug. 1839, and enlarged in 1848. It contained a hall of manufactures with machines worked by steam-power, lecture theatres, &c., diving-bell, electric machine, &c. *Timbs*. The institution did not prosper commercially, and its decline was hastened by the fall of a staircase on 3 Jan. 1859, when one person was killed and many injured. The institution was closed in May, 1859, but was re-opened by a new company on 12 Nov. 1860; see *Ecole Polytechnique*. Professor Pepper, the director for many years, resigned in 1872; returned, 1878. The classes were formed into a college, which was inaugurated by the earl of Shaftesbury, 7 Oct. 1872. Polytechnic institution announced to be closed on 27 Aug. 1881; affairs wound up. Plant sold for about 2000*l.* 23 March, 1882. In 1882 it was occupied by the Polytechnic young men's christian institute, principally by the instrumentality of Mr. Quintin Hogg (suffocated by fumes in a geyser bath, 17 Jan. 1903), for educational purposes, with about 2000 members; over 17,000, Jan. 1903.

**POMERANIA**, a Prussian province, N. many, was held by the Poles, 980, and by mark, 1210; made an independent duchy, 1 and divided between Sweden and Brandenburg, 1648. The Swedish part, awarded to Denmark 1814, was given up to Prussia for Lauenburg, see *Denmark*; *Wrecks*, 1878.

**POMPEII** (S. Italy), an ancient city of Campania, was partly demolished by an earthquake A.D. 63. It was afterwards rebuilt, but was overwhelmed by an eruption of Vesuvius, accompanied by an earthquake, on the night of 24 Aug. 79. principal citizens were then assembled in an amphitheatre where public spectacles were exhibited. The ashes buried the whole city and covered surrounding country. After a lapse of 16 centuries, a countryman, as he was turning up ground, found a bronze figure; and this directed to further search, which brought many other objects to light, and at length the city uncovered. The part first cleared was supposed to be the main street, 1750. The kings of Naples greatly aided in exploring Pompeii, and the Italian government resumed the work in 1863. Many discoveries since.

A commemorative meeting of antiquaries and philosophers met at Pompeii, 25 Sept. 1879.

**POMPEY'S PILLAR** stands about the quarters of a mile from Alexandria, between the city and the lake Mareotis. The shaft is fluted and the capital ornamented with palm-leaves; the whole, which is highly polished, composed of the pieces, and of the Corinthian order. The column measures, according to some, 94 feet; to others

141, and even 160 feet; but of its origin, name, use, and age, nothing is certain.

It is generally believed that the column has no reference to Pompey, to whom a mark of honour was, nevertheless, set up somewhere about this part. One supposes the edifice was dedicated to Vespasian, another to Severus; and Mr. Clarke, from a half-effaced inscription on the base, considered that Adrian is the person honoured; while many assert, from the same inscription, that it is dedicated "to Diocletian Augustus, most adorable emperor, tutelar deity of Alexandria."

**PONDICHERRY** (S.E. India), on the Coromandel coast, the chief of the French possessions in India. Area 115 square miles. Population 174,456. It was first settled by the French in 1674. Prosperous state of the colony reported Jan. 1889. Population, town of Pondicherry, 45,583.

**PONT-Â-NOYELLES**. At this place, near Amiens, took place a fierce indecisive conflict, lasting from 11 A.M. to 6 P.M., between the Germans under Manteuffel and the French army of the north under Faidherbe, 23 Dec. 1870. Both sides claimed a victory; the French general asserted that he remained master of the field.

**PONTEFRAC** (formerly Pomfret) (S. York). At the castle (built 1080), Richard II. was confined and murdered, 10 Feb. 1400. Some writers assert that Richard escaped and died in Scotland. In this castle also, the earl Rivers, lord Grey, sir Thomas Vaughan, and sir Richard Haut or Hause, were put to death by order of the duke of Gloucester, then protector of England (afterwards Richard III.), about 26 June, 1483. The castle, which had stood four sieges, was dismantled in 1649. The first parliamentary election by ballot took place here, 15 Aug. 1872, very quietly. It lost one of its two members in 1885. **PONTIFFS** (Latin *Pontifices*), the highest Roman sacerdotal order, established by Numa. The college first consisted of 4 patricians, with a chief (Pontifex Maximus); to these 4 plebeians were added, by the Ogulnian law, 300 B.C. Sylla increased the number to 15 (8 *maiores*, 7 *minores*), (81), and Julius Caesar to 16. T. Coruncanian, a plebeian, obtained this office, 254 B.C.

**PONTUS**, in Asia Minor, seems to have been a portion of Cappadocia, and received its name from

its vicinity to the *Pontus Eurinus*. Artabazus was made king of Pontus by Darius Hystaspes in the 4th century B.C. His successors were mere satraps of the kings of Persia.

**POOR**. The poor of England, till the time of Henry VIII., subsisted as the poor of Ireland until 1838, entirely upon private benevolence. By statute 23 Edw. III. 1349, it was enacted that none should give alms to a beggar able to work. By the common law, the poor were to be sustained by "parsons, rectors of the church, and parishioners, so that none should die for default of sustenance;" and by 15 Rich. II. impropricators were obliged to distribute a yearly sum to the poor; but no compulsory law was enacted till the 27th Hen. VIII. 1535. The origin of the present **POOR LAW** is referred to the 43rd of Elizabeth, 1601, by which overseers were appointed for parishes. See *Settlement, Act of*.

**POOR KNIGHTS OF WINDSOR, or ALMS KNIGHTS.** Soon after his institution of the order of the Garter, Edward III. founded this charity, for the provision of 24 (afterwards 26) poor persons eminent for military services. King William IV. changed the name to the "Military Knights of Windsor," in consequence of their all having held commissions in the army, Sept. 1833.—The "Naval Knights of Windsor" are maintained on a distinct foundation, under the bequest of Samuel Travers, 1724. The corporation was established in 1798. An act making lieutenants and widowers eligible was passed in 1867. Alterations made by act passed in 1885. An act to dissolve the corporation was passed in 1892.

**POPE, A.**, poet (1688—1744). His bi-centenary was celebrated by an exhibition of books, pictures, and other relics, and a lecture by professor H. Morley at Twickenham town-hall, 31 July, 1888.

**POPE JOAN.** It is falsely asserted that, in the 9th century, a female named Joan, having conceived a passion for Felda, a young monk, in order to be admitted into his monastery assumed the male habit, and that on the death of her lover she entered upon the duties of professor, and, being very learned, was elected pope, when Leo IV. died, in 855. Other scandalous particulars follow; "yet, until the reformation, the tale was repeated and believed without offence." *Gibbon*.

**POPISH PLOTS**, see *Gunpowder Plot* and *Oates's Plot*.

**POPLAR TREES.** The Tacamahac poplar (*Populus Balsamifera*) was brought hither from North America before 1692. The Lombardy poplar from Italy about 1758.

**POPLIN** (or Tabinet), an elegant rich fabric

composed of silk and worsted, introduced by the Huguenot refugees from France about 1693; first manufactured in Dublin. Irish poplins are so deservedly esteemed.

**PORT BRETON**, an isle near New Caledonia, South Pacific.

In 1877 the marquis Du Breil de Rays purchased of the king Maragano a quantity of land on which to found a colony. Glowing prospectuses were issued in France, a company was formed, and, the scheme being favoured by the legitimists, a large number of shares were purchased and much money received. Other speculating companies were formed, and colonial government officers nominated. In spite of warning and prohibition several vessels sailed in 1879 with emigrants to meet with misery, disease, and, to a large extent, with death. A few who had been landed in New Caledonia got back to France and published an account of their sufferings. The marquis and some of his associates were brought to trial 27 Nov. 1883; he was sentenced to four years' imprisonment and a fine of 3000 francs, his associates to shorter imprisonment, 2 Jan. 1884; on appeal, sentence confirmed, 14 March, 1884.

**PORTE**, or **SUBLIME PORTE**, official name of the court of the sultan of Turkey. Mostasem, the last of the Abbasside caliphs (1243-58), fixed in the threshold of the principal entrance to his palace at Bagdad a piece of the black stone adored at Mecca, and thus this entrance became the "porte" by eminence, and the title of his court. The sultans, successors of the caliphs, assumed the title. — *Bouillet*.

**PORTEOUS MOB**. Capt. Porteous, at Edinburgh, on 15 April, 1736, commanded the guard at the execution of Wilson, a smuggler, who had saved the life of a fellow criminal, by springing upon the soldiers around them, and by main force keeping them back, while his companion fled. This excited great commiseration, and the spectators pelted the guard with stones. Fearing a rescue, Porteous ordered his men to fire upon the mob, and seventeen persons were killed or wounded. He was found guilty of murder, 22 June, 1736; but the queen granted him a reprieve (the king being then in Hanover). The people, at night, broke open the

prison, took out Porteous, and hanged him dyer's sign-post, in the Grass-market, 7 Sep. None of the rioters were ever detected.

**PORTER**. Dr. Ashe says that this mal obtained its appellation on account of its been drunk by porters in the city of London 1730. The number of licensed brewers in England, was 2257; in Scotland, 154; Ireland, 96—total, 2507. On 17 Oct. 1814, at brewhouse two large vats of porter burst, doing neighbouring houses. Several lives were and the loss was between 8000 and 9000 bar

**PORTLAND ISLE** (off Dorset), the English Gibraltar. Fortified before 1142. Portland castle was built by Henry VIII. about 1536. Off this peninsula a naval engagement commenced between the English and Dutch, 18 Feb. 1653, which continued for three days. The English destroyed eleven Dutch men-of-war and thirty merchantmen. Van Tromp was admiral of the Dutch, and Blake of the English.—Here is found the noted freestone used for building our finest edifices. The Portland lights were erected 1716 and in 1789. The pier, with nearly half a mile square of land, was washed into the sea in Feb. 1792. Prince Albert laid the first stone of the Portland breakwater, 25 July, 1849, and the last stone was laid by the prince of Wales, 10 Aug. 1872. Mr. James Rendel, the first chief engineer, was succeeded on his death in 1856 by Mr. (aft. sir) John Coode. The breakwater and other harbour works cost 1,033,600*l.* exclusive of convict labour. **PORTLAND (or BARBERINI) VASE.** This

\* Born 1738; became lord chamberlain, 1765; lord lieutenant of Ireland, 1782; premier, 1783; home secretary, 1794; lord president, 1801; premier again, 1807; died 1809, when Mr. Spencer Perceval became premier.

beautiful specimen of Greek art (composed of a glass-like substance, with figures and devices raised on it in white enamel; height 10 inches; diameter in the broadest part, 7; with a handle on each side) was discovered about the middle of the 16th century, in a marble sarcophagus in a sepulchre at a place called Monte del Grano, about 2½ miles from Rome. The sepulchre was supposed to have been that of the Roman emperor, Alexander Severus (222-235), and his mother Mammaea, and the vase is supposed to have been the cinerary urn of one of these royal personages. It was placed in the palace of the Barberini family, at Rome, where it remained till 1770, when it was purchased by sir William Hamilton, from whose possession it passed to that of the duchess of Portland, 1787; at the sale of her effects, it is said to have been bought by the then duke of Portland, who, in 1810, deposited it (on loan) in the British museum. On 27 Feb. 1845, this vase was smashed to pieces with a stone by a man named William Lloyd; it was skilfully repaired, and is now shown to the public in a special room. Josiah Wedgwood made a mould of it, and took a number of casts.

**PORTO BELLO** (S. America), discovered by Columbus, 2 Nov. 1502, was taken by Morgan the buccaneer in 1668; by the British under admiral Vernon, from the Spaniards, 21 Nov. 1739, and the fortifications destroyed. Before the abolition of the trade by the galleons, in 1748, it was the great mart for the rich commerce of Peru and Chili.

**PORTO FERRAJO**, capital of Elba (*which see*); built and fortified by Cosmo I., duke of Florence, in 1548. The fortifications were not finished till 1628, when Cosmo II. completed them with great magnificence; see *France*.

**PORTO NOVO** (S. India). Here sir Eyre Coote, with about 9500 men and 55 light field-pieces, skilfully defeated Hyder Ali, ruler of the Carnatic, with 80,000 men and some heavy cannon, 1 July, 1781. Hyder lost about 10,000, the British 587 killed and wounded.—**PORTO NOVO**, W. Africa, a French settlement on the coast of Dahomey, *which see* (1890 *et seq.*).

**PORTREEVE** (derived from a Saxon word signifying the governor of a port or harbour). The chief magistrate of London was originally so styled;

but Richard I. appointed two bailiffs, and afterwards London had mayors. *Camden; see Mayors.*

**PORT ROYAL** (Nova Scotia), capital of the French colony, Acadie, founded in 1604; after having been taken and restored several times, it was finally acquired by the British in 1710, and named Annapolis.

**PORT ROYAL** (Jamaica), once a considerable town, was destroyed by earthquakes in 1602 and 1692; laid in ashes by fire in 1702; reduced to ruins by an inundation of the sea in 1722; and destroyed by a hurricane in 1774. After these calamities, the custom-house and public offices were removed to Kingston. Port Royal was again greatly damaged by fire in 1750; by another awful storm in 1784; and by a devastating fire in July, 1815; in 1850 it suffered by cholera.

**PORT ROYAL DES CHAMPS** (near Paris) was a French Cistercian convent, founded by Odo, bishop of Paris, at the wish of king Philip Augustus, 1204. Having fallen into decay, it was revived and reformed in 1608 by Angelica Arnauld. In 1625 the increased community removed to Paris. The Port Royal des Champs, in 1656, became the retreat of the Arnaulds, Tillemont, Pascal, Lancelot, and other eminent Jansenists, who devoted themselves to education, and produced the Port Royal grammars, logic, and other works. This institution was condemned by the pope in 1709, and the buildings were pulled down, and tombs desecrated, by the order of Louis XIV., in 1710. The Port Royal at Paris was suppressed, with other monasteries, in 1790.

**PORTUGAL**, the ancient Lusitania. The present name is derived from Porto Callo, the original appellation of Oporto. After a nine years' struggle under Viriathes, a brave able leader, the Lusitanians submitted to the Roman arms about 137 B.C. Portugal underwent the same changes as Spain, the fall of the Roman empire. There are Portugal two universities, that of Coimbra, founded in 1308, and the smaller one of Evora, founded 1533. Lisbon, the capital (pop. 1900, 365,000) has its royal academy, and the small town Thomar has an academy of sciences; but general literature is at a low ebb in Portugal. The poet Camoens, called the Virgil of his country and author of the *Lusiad* (1569), translated in English by Mickle, was a native of Lisbon. His constitution, granted in 1826, was revised in 1850. **POSITIVE PHILOSOPHY** set forth by Auguste Comte, an eminent mathematician, born 19 Jan. 1798; died at Paris, 5 Sept. 1857, succeeded by M. Pierre Lafitte as director of positivism; died, aged 80, early Jan. 1903. M. P. Emile Littré, the great French philologist, ardently embraced the system, and published "De la Philosophie Positive," in 1845.—See *Calendar*.

Comte's "Cours de Philosophie Positive," published 1830-42; "Système de Politique Positive, ou Traité de Sociologie, instituant la Religion de l'Humanité (l'amour pour principe, l'ordre pour base, et le progrès pour but)," 1851-4.

It professes to base itself wholly on positive facts or observed phenomena, and rejects all metaphysical conceptions, which it considers negatives, having nothing real or true in them; and dispenses with the science of mind. It sets aside theology and metaphysics as two merely preliminary stages in life; and abandons all search after causes and essences of things, and restricts itself to the observation and classification of phenomena and the discovery of their laws. Comte asserted that Europe had now arrived at the third stage of its progress.

Positivism does not recognise the supernatural or the future state.

"The Church of Humanity" is a modified form of positivism, described by Mr. Richard Congreve, an ardent comtist (*Pall Mall Gazette*, 17 Jan. 1884); he died, aged 87, 5 July, 1899.

Commemorative meeting at Paris, address by Mr. Fred. Harrison, 5 Sept. 1896.

**POSSIBILISTS.** A section of the liberal party in Spain; aiming at reforms: Sen. Castelar, a chief, Oct. 1883.

The name was also given to the workmen's party in Paris, who aimed at effecting social reforms by legal methods; they are said to have prevented a revolutionary outbreak of the violent Blanquists, or autonomists, at the presidential election, 3 Dec. 1887.

**POSTAL UNION, GENERAL,** was established by the Treaty of Berne, signed 9 Oct. 1874, and took effect from 1 July, 1875. From time to time conferences have been held.

**POSTING.** Post-chaises were invented by the French, and, according to Grainger, were introduced into this country by Mr. William Tell, son of the writer on husbandry. Posting was fixed by statute of Edward VI. at one penny per mile, 1548. By a statute, re-establishing the post-office, none but the postmaster or his deputies could furnish post-horses for travellers, 1660. The post-horse duty was imposed in 1779. Post-horse duty yielded, in 1852, in England, 128,501*l.*, and in Scotland, 16,933*l.*

**POSTS,** said to have originated in the regular couriers established by Cyrus, who erected post-houses throughout the kingdom of Persia, about 550 B.C. Augustus was the first who introduced this institution among the Romans, 31 B.C. This was imitated by Charlemagne about A.D. 800.—*Ashe*. Louis XI. first established post-houses in France owing to his eagerness for news, and they were the first institution of this nature in Europe, 1470.—*Hénault*.

**POST-OFFICE OF ENGLAND.** In England, in the reign of Edward IV. 1481, riders on post-horses went stages of the distance of twenty miles from each other, in order to procure the king the earliest intelligence of the events that passed in the course of the war that had arisen with the Scots.—*Gale*. Richard III. improved the system of couriers

in 1483. *1483 similar arrangements existed in England.*

*Sailer's Letters.* Post communication between London and most towns of England, Scotland, and Ireland, existed in 1635.—*Strype*.

The first chief postmaster of England, Sir Thomas Randolph, appointed by queen Elizabeth James I. appointed Matthew de l'Equer as foreign postmaster, 1619; and Chas. I. appointed William Frizell and Thomas Witherings.

A proclamation of Chas. I., "whereas to this time there hath been no certain intercourse between the kingdoms of England and Scotland, the king now commands his postmaster of England for foreign parts to settle a running post or two to run night and day between Edinburgh and London, to go thither and come back again in six days." The king commanded his "postmaster of England for foreign parts," to open a regular communication by running posts between the metropolises and Edinburgh, West Chester, Holyhead, Ireland, Plymouth, Exeter, &c. (Rates of postage—1 letter carried under 80 miles *rd.*; under 140 miles, *qd.*; above that distance in England, *td.*; to any part of Scotland, *sd.*.)

An enlarged office erected by the parliament in 1643; and one more considerable in 1657, with a view "to benefit commerce, convey the public dispatches, and as the best means to discover and prevent many dangerous wicked designs against the commonwealth by the inspection of the correspondence."

The post-office as at present constituted was founded 12 Chas. II. 27 Dec. 1680.

Farmed to John Manley, 1653; to Daniel O'Neill, 1657.

Penny Post first set up in London and its suburbs by a Mr. Robert Murray, upholsterer.

He assigned his interest in the undertaking to Mr. Dockwra, a merchant, 1683; but on a trial at the King's bench bar it was adjudged to belong to the duke of York, as a branch of the general post, and was thereupon afterwards annexed to the revenue of the crown.

This institution considerably improved and made a twopenny post July, 1794, *et seq.*

Cross posts established by Ralph Allen.

Between 1730 and 1740, the post was only transmitted three days a week between Edinburgh and London; and the metropolis, on one occasion, sent a single letter, which was for an Edinburgh banker, named Ramsay.

A penny post was first set up in Dublin. The mails conveyed by coaches; the first mail left London for Bristol (see *Mail Coaches*).

The mails first conveyed by railway, 1830; by the overland route to India.

Post-office acts consolidated.

Early in 1837, Mr. Rowland Hill broached his plan of penny postage, which was adopted after a full investigation by a committee of the house of commons.

The new postage law, by which the uniform rate of *qd.* per letter was tried as an experiment, came into operation.

POTASSIUM, a remarkable metal, discovered by Humphry Davy, who first succeeded in separating it from its oxide, potash, by means of a powerful voltaic battery, in the laboratory of the Royal Institution, London, about 19 Oct. 1807; and also the metals Sodium from soda, Calcium from lime, &c. The alkalis and earths had been previously regarded as simple substances. Potassium ignites on contact with moisture.

POTATOES, natives of Chili and Peru, generally considered to have been brought to England from Santa Fé, in America, by sir John Hawkins, 1565. Others ascribe their introduction to sir Francis Drake, in 1586; their general introduction, 1592. Their first culture in Ireland is referred to sir Walter Raleigh, who had large estates in that country, about Youghal, in the county of Cork. It is said that potatoes were not known in Flanders until 1620. A fine kind of potato was first brought from America by Mr. Howard, who cultivated it at Cardington, near Bedford, 1765; and its culture became general soon after. The failure of the potato crop in Ireland, several years, especially in 1846, caused famine, to which succeeded pestilential disease of which multitudes died; among them many priests and physicians. Parliament voted ten millions sterling; and several countries of Europe, and the United States of America, forwarded provisions and other succours; see Ireland. In 1868 it was reported that in England and Wales 500,000 acres, and in Ireland 1,000,000 acres, were under cultivation for potatoes. Potato disease prevailed greatly in England, autumn of 1872. In consequence the value of potatoes imported in 1872 was 1,654,240*l*.; in 1871, only 225,732*l*.; in 1877, 7,964,840 *ewt.*, value, 2,348,749*l*.; in 1883, 5,149,509 *ewt.*, value 1,585,260*l*.; in 1887, 2,763,357 *ewt.*; in 1890, 1,940,100 *ewt.*; in 1900, 8,910,932 *ewt.*; in 1902, 5,699,090 *ewt.*, value, 1,589,432*l*.; in 1904, 9,993,965 *ewt.*, value 2,437,971*l*. Temporary alarm respecting the American Colorado beetle or bug, autumn, 1876. Acres cultivated for potatoes in Great Britain in 1867, 492,217; 1871, 627,801; 1877, 512,471; 1883, 543,455; in 1887, 559,052; in

**POTTERY AND PORCELAIN**. (ch. xvi.). Earthenware was made by the ancient Egyptians, Assyrians, Greeks, Etruscans, and Romans.

The Majolica, Raffaele, or Umbrian ware of the 15th century was probably introduced into Italy from the Moors from Majorca. Raffaele and other artists made designs for this ware.

**POULTRY COMPTER** (London) was one of the most noted of the old city prisons. The comptor of Wood-street belonged to the sheriff of London, and was made a prison-house in 1555. This latter and Broad-street comptor were re-built in 1667. The Giltspur-street prison, built to supply the place of the old city comptors, was pulled down in 1855. The Poultry chapel was erected on the site of the Poultry comptor, in 1819.—*Leigh*.

**POUND**, from the Latin *Pondus*. The value of the Roman *pondo* is not precisely known, though some suppose it was equivalent to an Attic *minas*, 4 *zl.* 4s. 7d. The pound sterling was in Saxon times about 671, a pound troy of silver, and a shilling was its twentieth part; consequently the latter was three times as large as it is at present.—*Peuchan*. Our avoirdupois pound weight came from the French and contains sixteen ounces; it is in proportion to our troy weight as seventeen to fourteen; see under *Standard*.

**POYNINGS' LAW**, named after sir Edward Poynings, lord deputy of Ireland at the time of its passing, at Drogheda, 13 Sept. 1494. By this law all legislation in the Irish parliament was confined to matters first approved of by the king and the English council. The act was repealed, together with the English Declaratory act of the 6th of Geo. I. and other obnoxious Irish statutes, April, 1782.

**PRÆMONSTRATIENSIS ORDER**, or **WHITE CANONS**, founded in 1120 by Norbert, a monk, at Pré Monré, near Laon. Its first house in England was founded by Peter de Gousla or Gousel, at Newsham, in Lincolnshire, 1143—*Tanner*; according to others in 1146. The order spread widely through England soon after. The house at Newsham was dedicated to St. Mary and St. Martial.—*Lewis*.

**PRÆMUNIRE, LAW OF**. This law (which obtained its name from the first two words "*Præmoneri*," or "*Præmuniri facias*," "Cause to be forewarned," which is applied to any offence in the way of contempt of the sovereign or his government) derived its origin from the aggressive power of the pope in England. The offence introduced a foreign power into the land, and created an *imperium in imperio*. The first statute of Præmunire was enacted 35 Edward I. 1306.—*Coke*. The pope bestowed most of the bishoprics, abbacies, &c., before they were void, upon favourites, on pretence of providing the church with better qualified successors before the vacancies occurred. To put a stop to these encroachments, Edward III. enacted a statute in 1353. The statute commonly referred to as the statute of Præmunire is the 16th of Richard II. 1392. Several similar enactments followed. The assertion that parliament is independent of the sovereign was declared a *præmunire*, 1661.

**PRÆTORIAN GUARDS**, instituted by the emperor Augustus (13 B.C.); their numbers enlarged by Tiberius, Vitellius, and their successors. At first supporters of the imperial tyrants, they eventually became their masters, actually putting up the diadem for sale (as in March, 193 A.D., when it was bought by Didius Julianus). They committed many atrocities, and were finally disbanded by Constantine in 312.

**PRÆTORS**, Roman magistrates, afterwards termed consuls (*which see*), were elected at the establishment of the republic, 509 B.C. In 366 the *prætor urbanus* was appointed for the city, and the *prætor peregrinus* for foreigners, 246 B.C. Two prætors were appointed for the provinces, 227, and two more, 197. Sylla, the dictator, added two, and Julius Cæsar increased the number to 10, which afterwards became 16. After this, their number fluctuated, being sometimes 18, 16, or 12; till, in the decline of the empire, their dignity decreased, and their numbers were reduced to three.

**PRAGA**, a suburb of Warsaw, where a bloody battle was fought, 4 Nov. 1794; 30,000 Poles were killed by the Russian general Suwarow. Near here, on 25 Feb. 1831, the Poles, commanded by Skrznecki, defeated the Russians, under general Giemars, who lost 4000 killed and wounded, 6000 prisoners, and 12 pieces of cannon.

**PRAGMATIC SANCTION**, an ordinance relating to church and state affairs. The ordinances of the kings of France are thus called; in one the rights of the Gallican church were asserted against the usurpation of the pope in the choice of bishops,

by Charles VII. in 1438. The Pragmatic Sanction for settling the empire of Germany in the house of Austria, 1439. The emperor Charles VI. published the Pragmatic Sanction, whereby, in default of male issue, his daughters should succeed in preference to the daughters of his brother Joseph I., 19 April, 1713; and he settled his dominions on his daughter Maria Theresa, in conformity thereto, 1723. She succeeded in Oct. 1740; but it gave rise to a war, in which most of the powers of Europe were engaged, and which lasted till 1748.

**PRAGUE**, the capital of Bohemia (*which see*). The old city was founded about 759; the new city rebuilt in 1348 by the emperor Charles IV., who made it his capital and erected a university. Prague has suffered much by war. Population, 1880, 162,323; 1890, 184,109; 1900, 389,741.

She was the only daughter of the celebrated marshal Sebastiani, the mother of nine children, and in her forty-first year. Circumstances were so managed by him as to give it the appearance of being the act of another. During the arrangements for the trial, the duke took poison.

**PRAYER-BOOK**, see *Common Prayer*. The Prayer-book and Homily Society, London, was founded in 1812.

Prayer-book Revision Society, established 1854, for promoting a revision of the book of common prayer, and such liturgical reforms in the church of England as

in the opinion of the society would strengthen its Protestant and scriptural character.

**PRAYERS.** "Then began men to call upon the name of the Lord" (*Gen.* iv. 26), 3875 a.c. The mode of praying with the face to the east was instituted by pope Boniface II. A.D. 532. Prayers for the dead, first introduced into the Christian church about 190, are advocated by some ministers of the English church. Prayers addressed to the Virgin Mary and to the saints are said to have been introduced by pope Gregory, 593. See *Liturgies*.

**PREBENDARY**, a clergyman attached to a cathedral or collegiate church, who receives an income termed *prebenda* for officiating at stated times. The office slightly differs from that of a canon.

**PRECEDENCE** was established in very early ages, and was amongst the laws of Justinian. In England the order of precedence was regulated chiefly by two statutes, 31 Hen. VIII. 1539, and 1 Geo. I. 1714.

It was maintained by St. Augustin, and opposed by Pelagius, in the early part of the 5th century. In later times it has been maintained by the Augustinians, Jansenists, the church of Scotland, and many dissenters (termed Calvinistic), and opposed by the Dominicans, Jesuits, and dissenters (termed Arminian), especially by the Wesleyan methodists.

**PREHISTORIC ARCHEOLOGY** began in Sweden, and first systematised by Mr. Nilman Daniel Wilson's "Archæology and Pre-historic Annals of Scotland," published 1851. An international congress for treating prehistorical subjects met at Neuchâtel in 1866, and at Paris in 1867. At the third meeting at Norwich, Aug. 1868, it assumed the name of "International Congress for Prehistoric Archaeology," and published its transactions in 1869. A meeting was held at Stockholm 7-14 Aug. 1895. See *Barrowes, Man, Ancient Monuments and Land Dwellings*.

Sir John Lubbock divides prehistoric archaeology into four great epochs: 1. The Drift or Palæolithic or stone age; 2. The Neolithic or polished stone age; 3. The Bronze age; 4. The Iron age, when bronze superseded.

**PRE-RAPHAELITE SCHOOL**, a name given about 1850, to J. E. Millais, Wm. Holman Hunt, D. G. Rossetti, and other artists, who opposed the routine conventionality of academic teaching and resolved to study nature as it appeared to them, and not as it appeared in the antique. For a short time they published "The Germ, or Art and Poetry," beginning in 1850. Their works have been much criticised, but their influence has been beneficial. Their principles were much advocated by the great art-critic, John Ruskin.

**PREROGATIVE COURT**, in which formerly all wills were proved, and all administration taken, which belonged to the archbishop of Canterbury by his prerogative, a judge being appointed by him to decide disputes. Appeals from this court previously to the pope, were commanded to be made to the king in chancery, 1533; to the privy council in 1830-2. This court was abolished, and the *Probate Court* established in 1857. Sir John Dodson, the last judge, died in 1858.

**PREROGATIVE, ROYAL.** In England the sovereign is the supreme magistrate, and it is a maxim that he can do no wrong. He is the head of the established church, of the army and navy, and the fountain of office, honour, and privilege, but is subject to the laws, unless exempted by name. The royal prerogatives were greatly extended by several despotic sovereigns, such as Elizabeth, James I., and Charles I. Elizabeth used the phrase "We, of our Royal prerogative, which we will not have argued or brought in question" (1591). James I. told his parliament "that as it was blasphemy to question what the Almighty could do of His power, so it was sedition to inquire what"

\* The records date from 1283; but the testamentary jurisdiction from that year to 1433 was exercised by the court of arches. Then abp. Stafford transferred it to a new court; president, the commissary of the prerogative court of Canterbury. There was also a prerogative court of the archbishop of York.

king could do by virtue of his prerogative." These extreme doctrines were nullified by the revolution of 1688, and the exercise of the prerogative is now virtually subject to parliament; see *Lords*.

**PRESBURG**, the ancient capital of Hungary, where the diets were held and the kings crowned. On 26 Dec. 1805, a treaty was signed between France and Austria, by which the ancient states of Venice were ceded to Italy; the principality of Eichstadt, part of the bishopric of Passau, the city of Augsburg, the Tyrol, all the possessions of Austria in Suabia, in Brisgau, and Ortenau, were transferred to the elector of Bavaria, and the duke of Württemberg, who, as well as the duke of Baden, were then created kings by Napoleon. The independence of the Helvetic republic was also stipulated. A new iron and stone railway and passenger bridge over the Danube was inaugurated by the emperor, 30 Dec. 1890. Population, 1890, 52,444; 1900, 61,861.

**PRESBYTERIANS** are so called from their maintaining that the government of the church appointed in the New Testament was by presbyteries, or association of ministers and ruling elders, equal in power, office, and in order. "The elders (Greek, *presbyteros*) I exhort, who am also an elder (*sympresbyteros*)." 1 Peter v. 1. Presbyterianism was accepted by parliament in place of episcopacy in England in 1648, but set aside at the restoration in 1660. It became the established form of church government in Scotland in 1606. Its tenets were embodied in the formulary of faith said to have been composed by John Knox, in 1560, which was approved by the parliament, and ratified, 1567, and finally settled by an act of the Scottish senate, 1606, afterwards secured by the treaty of union with England in 1707. The first Presbyterian meeting-house in England was established at Wandsworth, Surrey, 20 Nov. 1572.

The troops also suffered considerably.

**PRESS ASSOCIATION** (a company "limited") was established by the newspaper proprietors of London and the provinces, at a meeting at Manchester, 29 June, 1868, to make arrangements to enable them to avail themselves of the increased facilities for the speedy transmission of news afforded by the post office, in consequence of the purchase of the rights of all the telegraph companies, authorised by the Telegraph Act of 1868. The organisation of the association was completed at a meeting in London, 3 March, 1869. The Provincial Newspaper Society, out of which it sprang, was founded in 1836, and became the Newspaper Society in 1889. Since 1868 the number of good daily provincial newspapers, containing the latest news of the world, has very greatly increased. Foreign press association registered as a society, March, 1898.

**PRESS, LIBERTY OF THE.** The *imprimatur* "let it be printed" was much used on the title-pages of books printed in the sixteenth and seventeenth centuries. The liberty of the press was severely restrained, and the number of master-printers in London and Westminster limited by the Star Chamber, 13 Charles I., July 1, 1637. John Milton published his noble work, "Areopagitica; or, a Speech for the Liberty of Unlicensed Printing," 1644. See *Fourth Estate*.

"Disorders in printing" were repressed by the parliament in 1643 and 1649, and by Charles II. 1662  
The censorship of the press (by a licence established in 1655 and 1663) abandoned. 1695

Preston was taken in 1715 by the Scotch insurgents, under Forster, who proclaimed king James VII. They were defeated in a battle on 12, 13 Nov. by generals Willes and Carpenter, who with the royal army invested Preston on all sides. The Scots laid down their arms, and their nobles and leaders were secured; some were shot as deserters, and others sent to London pinioned and bound together, to intimidate their party.—The stoppage of the cotton manufacture in 1861 and 1862, through the civil war in America, occasioned great suffering in Preston. Population, 1901, 115,055.

"The Preston guild Merchant festival," said to have been instituted in Saxon times, recorded as beginning 1308, and to have been kept once in 20 years regularly since 1562, was duly celebrated in Sept. 1862, Sept. 1882, and Sept. 1902

Among the Jews, the priests held their office at the age of thirty years. The office of high or chief priest was fixed in Aaron's line, 1491 B.C. After the captivity of Babylon, the government and the crown were superadded to the high priesthood; it was the peculiar privilege of the high priest, that he could be prosecuted in court but that of the great Sanhedrim. The heathens had their arch-flamen or high priest resembling the Christian archbishop. For the history of the office, see *Holy Cross*.

The honour of first printing with single types in Europe has been appropriated to Mentz, Strasburg, Haarlem, Venice, Rome, Florence, Basle, and Augsburg; but the names of the three first only are entitled to attention; the early history is very doubtful, and the subject of much controversy; see *Press*.

Adrian Junius awards the honour of the invention to Laurencez John Koster, of Haarlem, "who printed with blocks, a book of images and letters, *Speculum Humane Salvationis*, and compounded an ink more viscous and tenacious than common ink, which blotted, about 1438."

[The leaves of this book, being printed on one side only, were afterwards pasted together.]

**PRINTING-MACHINES.**—William Nicholson, editor of the *Philosophical Journal*, first projected (1790-1), but Mr. König first contrived and constructed a working printing machine, which began with producing the *Times* of 28 Nov. 1814, a memorable day in the annals of typography.

In 1818, Mr. E. Cowper patented improvements.†

König's machine printed 1800 an hour on one side; Cowper's improvements increased this number to 4200. This was raised to 15,000, by Mr. Applegath's machine, which printed the *Times*.

Hoe's American machine, introduced into London 1858, prints 20,000 an hour.

Marinoni's machine at Paris said to print 36,000 an hour; Dec. 1868.

Walter press, invented for the *Times* by J. C. Macdonald and Mr. Calverley, between 1862-9, prints about 17,000 an hour perfected; 1872.

American Campbell press said to print 50,000 sheets perfected in an hour, Feb. 1876.

Ingram web rotary machine, invented by Mr. (later sir) W. J. Ingram, M.P., for printing illustrated papers; first used to print *Illustrated London News*, 4 Oct. 1877.

\* Romish Service-books, used at Salisbury, by the devout called *Pies* (*Pica*, Latin), as is supposed from the different colour of the text and rubric. Our printing-type *Pica* is called *Cicero* by foreign printers.—*Wheatley*.

† In 1817 was published Blumenbach's *Physiology* by Elliotson, the first book printed by machinery. The machine employed was König's, one which printed both sides in one operation at the rate of 900 sheets an hour (1816).

**PRINTING IN COLOURS** was first commenced by the employment of several blocks, to imitate the initial letters in MSS. (for instance, the Mentz Psalter of Fust, 1455, which has a letter in three colours). Imitations of chiaroscuro soon followed ("Repose in Egypt," engraving on wood after Louis Cranach, in 1510, in Germany; others by Ugo da Carpi, in Italy, 1518).

J. B. Jackson (1720-54) attempted, without success, to imitate water-colour drawings and to print paper-hangings.

About 1783, John Skippe, an amateur, printed some chiaroscuros.

In 1819-22, Mr. William Savage produced his remarkable work, "Hints on Colour Printing," illustrated by imitations of chiaroscuro, and of coloured drawings, giving details of the processes employed.

In 1836, Mr. George Baxter produced beautiful specimens of Picture-Printing, and took out a patent, which expired in 1855. In some of the illustrations to the "Pictorial Album" (1836), he employed twenty different blocks.

It has been applied to Lithography (hence Chromolithography).

In 1849, Mr. G. C. Leighton produced imitations of water-colour drawings, by means of modifications and improvements of Savage's processes. In 1851 he commenced colour-printing by machinery, and has since availed himself of aqua-tinted plates, and also of electrotyped silver and copper surfaces to obtain purity of colour as well as durability; Mr. Leighton died, 8 May, 1895.

The large coloured prints of the *Illustrated London News* were first issued in Dec. 1856.

Mr. E. Meyerstein explained his process of printing many colours at one impression (steno-chromy), *Society of Arts*, 13 Dec. 1876.

Mr. Ivan Orloff's colour-printing machine, multi-coloured designs produced by one operation; one set up in London, July, 1899.

Mr. Carl Hentschel's three-colour process popular, 1905.

**Printing surfaces.** Vulcanised india-rubber was first employed for this purpose by Mr. John Leighton, F.S.A., about 1862, and patented in the name of Alfred Leighton, 1864. The application is much used for hand-stamps for books, &c.

Mr. Fred Wicks' type-casting machine (cheap), reported *Times*, 19 Nov. 1896, adopted 1900.

International exhibition of printing at Stationers' hall, London, opened by the lord mayor, 14 Oct. 1889; another at the Agricultural-hall, 30 April, 1904.

**PRIORIES**, at first dependent on the great abbeys, are mentioned in 722 in England; see *Abbeys*, and *Monasteries*. *Alien priories* were seized by the king (Edward I.) in 1285, and in succeeding reigns on the breaking out of war with France; but were usually restored on the conclusion of peace. These priories were dissolved, and their estates vested in the crown, 3 Henry V. 1414.—*Rymer's Federa*.

**PRISCILLIANISTS**, disciples of Priscillian, a Spanish bishop who propagated doctrines alleged to contain Gnosticism and Manicheism, 372. When condemned he appealed from the pope to the emperor, but was beheaded at Treves, 385.

**PRISONERS OF WAR**, among the ancient nations, when spared, were usually enslaved. About the 13th century, civilized nations began to exchange their prisoners.

The Spanish, French, and American prisoners of war in England were 12,000 in number, 30 Sept. 1779. The number exchanged by cartel with France, from the commencement of the then war, was 44,000 June, 1781.

The English prisoners in France estimated at 6000, and the French in England 27,000 . . . Sept. 1798.

The English in France amounted to 10,300, and the French, &c., in England to 47,600, in . . . 1811.

The *Prison acts*, for England, Ireland, and Scotland, passed 12 July and 14 Aug. 1877. They transfer management of prisons, after 1 April, 1878, from local authorities to the home secretary; provide for re-distribution and reduction of number of prisons, &c.

**BORSTAL SCHEME.**—This scheme for dealing with male criminals between the ages of 16 and 21 had its inception in the suggestion made in 1894 by the departmental committee on prisons (Mr. Herbert Gladstone, chairman) "that the most determined effort should be made to lay hold of these incipient criminals, and to prevent them by strong restraint and rational treatment from recruiting the criminal class." The scheme was tentatively tried at Bedford prison in 1900, and from thence transferred to Borstal, where it came into more active operation, Oct. 1902. In outline the scheme works on the basis of the "indeterminate" sentence; the magistrate fixing the maximum sentence, discretion being allowed the governor, chaplain, and medical officer, acting as a committee, to reconsider the term, should the conduct of the prisoner warrant such reconsideration. The probationer at the end of the first 6 months of his sentence appears before the committee, and his case is thoroughly examined, and if it appears that he is likely to really benefit by his release the prisoner is remitted a part of his sentence.

Moral and religious influences are brought to bear on each prisoner, and habits of industry and the notion of self-respect inculcated and encouraged. Trades are taught, and recreations within the limits of discipline are permitted. The governor, Mr. Weston, in his report for 1902-3 to the prison commissioners, states: "The progress made in the trades here can only be understood by those who have seen them, who can watch day by day the general improvements, both in tone, demeanour, and ability; they become a living study of human nature. Calling the character of the youths and the element which most of them have received their early training it is very striking that under proper care they brought to their bearings in so short a time, visiting committee in its report (1903-4) states that of a total of 209 youths received only in three cases it necessary to transfer a juvenile-adult back to a local prison as incorrigible. The period of 6 months imprisonment being in the opinion of the prison commissioners too short a period for any lasting improvement to be made on criminal character, they have decided to transfer to Borstal only cases of 12 months and upwards. Of 76 cases dealt with on discharge, all of whom but 6 had previously been convicted, the majority more than once—no less than 36 had satisfactory. In 1904 an association was formed by the prisoners at Borstal on their discharge, to supervise their future career. The principle of the Borstal scheme, "hard work, strict discipline, but by contrivances of reward, encouragement and is acted upon in some of the states of America, Elmira, and at Concord.

### PRIVATE BILLS, see *Acts of Parliament*.

**PRIVATEER**, a ship belonging to private individuals, sailing with a licence (termed a *Letter of Marque*), granted by a government in time of war, to seize and plunder the ships of the enemy. The practice, said to have been adopted by Edward I. against the Portuguese in 1295, was general during the war between Spain and the Netherlands in the 17th century, and during the last French war. Privateering was abolished by the great sovereigns of Europe by treaty, 30 March, 1856. The United States government refused to agree unless the right of blockade was also given up. The British government declined this, asserting "that the system of commercial blockade was essential to its naval supremacy." On 17 April, 1861, Jefferson Davis, president of the southern confederacy, announced his intention of issuing letters of marque, and on the 19th president Lincoln proclaimed that all southern privateers should be treated as pirates. This decree was not carried out: see *United States*. All the great powers forbade privateering during the American civil war (which see). By the treaty of Washington privateering was prohibited; and April, 1898, in relation to the Spanish-American war, a Spanish decree maintains liberty of action.

### PRIVILEGED PLACES, see *Asylums*.

**PRIVY COUNCIL**. A council said to have been instituted by Alfred, 895. The number of the council was about twelve when it discharged the functions of state, now confined to the members of the cabinet; but it had become of unwieldy amount before 1679, in which year it was remodelled upon sir William Temple's plan, and reduced to thirty members: Anthony Ashley, earl of Shaftesbury, being president. The number is now unlimited. To attempt the life of a privy councillor in the execution of his office was made capital, occasioned by Guiscard's stabbing Mr. Harley while the latter was examining him on a charge of high treason, 9 Anne, 1711.

"The Proceedings and Ordinances of the Privy Council of England from 10 Richard II. to 33 Hen. VIII., edited by sir H. Nicolas, 7 vols." were published by the record commissioners, 1834-7.

The "Acts of the Privy Council," edited by Mr. J. R. Dasent, beginning with 1542, Vols. I.-IX., issued in 1890-4; Vol. XVI. 1897.

**JUDICIAL COMMITTEE OF THE PRIVY COUNCIL**.—In lieu of the Court of Delegates, for appeals from the lord chancellors of Great Britain and of Ireland in cases of lunacy—from the Ecclesiastical and Admiralty Courts of England, and the Vice-Admiralty courts abroad—from the Warden of the Staunaries, the courts of the Isle of Man, and other islands, and the Colonial courts, &c.,—fixed by statute 3 & 4 Will. IV., c. 41, 1833; amended by other acts in 1844, 1851, 1852.

**JUDGES**.—The lord president, lord chancellor, master of the rolls, vice-chancellor, lords justices in appeal, lord chief justice of the queen's bench and common pleas, lord chief baron, judges of the courts of bankruptcy, probate, and admiralty, and others appointed by the queen. In consequence of the increase of business, and consequent delay, the Crown was empowered to appoint four new judicial members of the committee, by 34 & 35 Vict. c. 91 (21 Aug. 1871). The attorney-general, sir R. Collier, was made a judge of the Common Pleas, 7 Nov., and a member of the judicial committee 23 Nov. 1871.

These proceedings were considered contrary to the spirit of the act by several judges and the legal profession

generally. A vote of censure on the Gladstone ministry was negatived in the house of lords (89-87), 15 Feb.; in the commons (268-241), 19 Feb. 1872. Other changes were made by an act passed in 1876. The addition of judges from the colonies authorized by an act passed 6 July, 1895.

**PRIVY SEAL**, THE LORD, the fifth great officer of state, has the custody of the privy seal, which he must not put to any grant, without good warrant under the king's signet. This seal is used by the king to all charters, grants, and pardons, signed by him before they come to the great seal. Richard Fox, bishop of Winchester, held this office in the reign of Henry VIII. previously to 1523, when Cuthbert Tunstall, bishop of London, was appointed. The privy seal has been on some occasions in commission.—*Bealson*. See under *Liverpool*, *Canning*, *Wellington*, and succeeding *Administrations*.

### PRIZE-FIGHTING, see *Boxing*.

**PRIZE MONEY**, arising from captures made from the enemy, was decreed by government to be divided into eight equal parts, and distributed by order of ranks, 17 April, 1793. The distribution of army prize-money is regulated by an act passed in 1832. Naval prize-money is now regulated by royal proclamation; the last, 19 May, 1866.

**PROBABILITY, THEORY OF** (termed by Butler, "the guide of life"; by Laplace, "good sense reduced to calculation"), was originated by Pascal, and taken up by Fermat, in their correspondence in 1654.

Its object is "the determination of the number of ways in which an event may happen or fail, in order that we may judge whether the chances of its happening or failing are greater."—*Jevons*.

It has been treated upon by the most eminent mathematicians, viz., the Bernoullis, De Moivre, D'Alembert, Euler, Lagrange, Laplace, and Quetelet. Isaac Todhunter's copious "History of Probability," published 1865.

In 1711 the sale of commissions was forbidden without the royal permission; in 1719-20 regulations were issued; and a fixed scale of prices was adopted in consequence of a commission in 1765. Large over-regulation payments continued to be paid. They withdrew from the established church, professing to follow the word of God alone, and maintaining that the church retained many human inventions and popish superstitions; see *Cathari, Nonconformists, and Presbyterianism*.

**PURLEY**, see *Diversions*.

**PURPLE**, a mixed tinge of scarlet and blue, discovered at Tyre. It is said that Hercules Tyrius having observed his dog's lips to be stained, after eating a shell-fish named *murex* or *purpura*, was thereby led to invent the dye. The Stepped Pyramid of Sakkara is conjecturally assigned to Ouenephes of the first dynasty, see *Egypt*. Three great pyramids are situated near Gizeh on the W. bank of the Nile. The first or greatest, is said to have been erected as the tomb of Choofoo, fourth dynasty, the Cheops of Herodotus, dated by Brugsch, 3733-3666 B.C. Its height is said to have been originally 481 feet, and its base 774 square feet. The second pyramid is ascribed to Chafra, or Chephren, 3666-3633 B.C. The third pyramid is said to have been built by Menkaura or Mycerinus, 3633 B.C.

The pyramids have been visited and described by Belzoni, 1815; Vyse, 1836; C. Piazza Smith, and others, see *Egypt Exploration Fund*.

The solar quadrant was introduced about 290 *b.c.* The Arabian astronomers under the caliphs, in 995, had a quadrant of 21 feet 8 inches radius, and a sextant 59 feet 9 inches radius. Davis's quadrant for measuring angles was produced about 1600; Hadley's quadrant about 1731; see *Navigation*.

**QUADRILATERAL** or **QUADRANGLE**, terms applied to four strong fortresses in N. Italy, long held by the Austrians, but surrendered to the Italians, Oct. 1866;—Peschiera, on an island in the Mincio; Mantua on the Mincio; Verona and Legnago, both on the Adige; see *Italy*, *Peschiera*, &c. Ple-

beians were first elected in 409 *b.c.* There were eight quæstors in 265. Sylla raised the number to twenty; Julius Cæsar to forty.

**QUAKERS** or **SOCIETY OF FRIENDS**, originally called Seekers, from their seeking the truth, and afterwards Friends (3 *John*, 14). Justice Bennet, of Derby, gave the society the name of Quakers in 1650, because George Fox (the founder) admonished him and those present to quake at the word of the Lord. This sect was commenced in England about 1646, by George Fox (then aged 22), who was joined by George Keith, William Penn, and Robert Barclay, of Ury, and others. Fox rejected all religious ordinances, explained away the commands relative to baptism, &c.; discarded the ordinary names of days and months, and used *thee* and *thou* for *you*, as more consonant with truth. He published a book of instructions for teachers and professors, and died 13 Jan. 1691. Sir H. Nicolas explains the Quaker calendar in his *Chronology of History*. The first meeting-house in London was in White Hart-court, Gracechurch-street. Headquarters of the Friends in England, Devonshire-house, 12, Bishopsgate-street Without, London, E.C. A numerous body of Friends called the *Hicksites*, from the name of their founder, Elias Hicks, exists in the United States; the *Wilburite* section in Pennsylvania are characterised by their adherence to the old-fashioned costume and mode of speech.

Their principles are contained in "Extracts of minutes" (from the beginning) published 1782; revised 1802, 1861, and 1883.

The Quakers early suffered grievous persecutions. At Boston, U.S., where the first Friends who arrived were females, they were cruelly scourged, and had their ears cut off; some put to death.

In 1659 it was stated in parliament that 2000 Friends had endured sufferings and imprisonment in Newgate; and 164 Friends offered themselves at this time, by name, to government, to be imprisoned in lieu of an equal number in danger (from confinement) of death, 1659.

Fifty-five (out of 120 sentenced) were transported to America, by an order of council, 1664.

The masters of vessels refusing to carry them for some months, an embargo was laid on West India ships, when a mercenary wretch was at length found for the service. The Friends would not walk on board, nor would the sailors hoist them into the vessel, and soldiers from the Tower were employed. In 1665, the vessel sailed; but it was immediately captured by the Dutch, who liberated twenty-eight of the prisoners in Holland, the rest having died of the plague. Few reached America.

A schism in the society was begun in America about 1827, by Elias Hicks publishing his opinions denying the divinity of Christ and his atonement and the authority of the Holy Scriptures. His numerous followers are styled *Hicksite Friends*.

Joseph Pease, a Quaker, was admitted to parliament on his affirmation 15 Feb. 1833  
At an annual assembly it was agreed to recommend that mixed marriages should be permitted, and that many of the peculiarities of the sect in speech and costume should be no longer insisted on.

**QUARANTINE**, the custom observed at Venice as early as 1127, whereby all merchants and others coming from the Levant were obliged to remain in the house of St. Lazarus, or the Lazaretto, forty days before they were admitted into the city. Various southern cities have now lazarettos; that of Venice is built in the water. In the times of plague, England and all other nations oblige those that come from the infected places to perform quarantine with their ships, &c., a longer or shorter time, as may be judged most safe. Quarantine acts were passed in 1753 and in 1825. The system was abolished in England by an act passed 1896, and the old quarantine men-of-war in the Solent were broken up. Quarantine established throughout Europe, in consequence of the bubonic plague at Bombay (*which see*), 16 Jan. 1897. Further regulated, 1842, 1848, and 1858. *Brewster Sessions* are regulated by the Licensing Act 1902.

**QUARTERLY REVIEW**, the organ of the Tory party. The publication was proposed to Mr. George Canning, and his support solicited by Mr. John Murray, the publisher, in a letter dated 25 Sept. 1807, in opposition to the opinions of the *Edinburgh Review*. Mr. Murray was assisted by Walter Scott, Robert Southey, John Gibson Lockhart (editor 1825-53), J. W. Croker, and other eminent persons. It first appeared Feb. 1809, with William Gifford, the celebrated translator of "Juvenal" as editor. He died 31 Dec. 1826.

**QUASI MODO**, a name given to *Low Sunday* (the first Sunday after Easter) from the commencement of a hymn sung on that day.

**QUATERNIONS**, an important mathematical method or calculus, invented by Sir Wm. Rowan Hamilton, about 1843.

It is based upon the separation of multiplication from addition, and its fundamental idea is mental transference or motion by what he termed vectors. He attributed to addition motion from a point; to multiplication about a point. Four numbers are generally involved, hence the name quaternion. Hamilton's

"Lectures on Quaternions," was published "Elements," 1866. Other works by professor and Tait, published since.

**QUATRE-BRAS** (Belgium). From June, 1815, two days before the battle of Waterloo, a battle was fought between the British army under the duke of Brunswick, the prince of Orange, and sir Thomas Picton, and the army under marshal Ney. The 42nd (Royal Highlanders) suffered severely in a French division by cuirassiers posted in behind growing corn. The duke of Brunswick killed.

QUIBERON BAY (W. France). A British force landed here, Sept. 1746, but was repulsed. In the bay admiral Hawke gained a complete victory over the French admiral Conflans, and thus defeated the projected invasion of Great Britain, 20 Nov. 1759. Quiberon was taken by some French regiments in the pay of England, 3 July, 1795; but on 21 July, through treachery, the French republicans, under Hoche, retook it by surprise, and many emigrants were executed. About 900 of the troops, and nearly 1500 royalist inhabitants who had joined the regiments in the pay of Great Britain, effected their embarkation on board the ships.

QUICKSILVER, in its liquid state, mercury. Its use in refining silver was discovered, 1540. There are mines of it in various parts, the chief of which are at Almaden, in Spain, and at Idria, in Illyria; the latter, discovered by accident in 1497, for several years yielded 1200 tons. A mine was discovered at Ceylon in 1797; and at New Almaden and other places in California. Quicksilver was congealed in winter at St. Petersburg, in 1759. It was congealed in England by a chemical process, without snow or ice, by Mr. Walker, in 1787. Corrosive sublimate, a deadly poison, is a combination of mercury and chlorine; see *Calomel*.

QUIETISM, the doctrine of Miguel Molinos, a Spaniard (1627-96), whose work, the "Spiritual Guide," published in 1675, was the foundation of a sect in France. He held that religion consisted in an internal silent meditation on the merits of Christ and the mercies of God. Madame de la Mothe-Guyon, a quietist, was imprisoned in the Bastille for her visions and prophecies, but released through the interest of Fénelon, archbishop of Cambrai, between whom and Bossuet, bishop of Meaux, arose a controversy, 1697. Quietism was finally condemned by pope Innocent XII. in 1699. See *Jansenists*, *Quakerism* and *Pietism*.

## RACES, one of the ancient games of Greece.

Horse-races were known in England in very early times. Fitz-Stephen, in the days of Henry II., mentions the delight taken by the citizens of London in the diversion. In James I.'s reign Croydon in the south, and Garterly in the north, were celebrated courses. Near York there were races, and the prize was a little golden bell, 1607. *Camden*. In the end of Charles I.'s reign, races were run at Hyde Park. Charles II. patronised them, and instead of bells, gave a silver bowl, or cup, value 100 guineas. William III. added to the plates (as did queen Anne), and founded an academy for riding.

At Ascot, begun by the duke of Cumberland, uncle to George III.; mentioned 1727.

The first racing calendar is said to have been published by John Cheney 1739.

[The earl of Derby began the Oaks, 1779; the Derby, 1780 (first won by Diomed).] See *Derby Day*.

*Flying Childers*, bred in 1715 by the duke of Devonshire, was allowed by sportsmen to have been the fleetest horse that ever ran at Newmarket, or that was ever bred in the world; he ran four miles in six minutes and forty-eight seconds, or at the rate of 35½ miles an hour, carrying nine stone two pounds. He died in 1741, aged 26 years.

At Doncaster, by col. St. Leger (the *St. Leger* stakes were founded in 1776, and so named in 1777) 1776.

*Eclipse* was the fleetest horse that ran in England since the time of *Childers*; he was never beaten, and died in February, 1789, aged 25 years. His heart weighed 14 lb., which accounted for his

wonderful spirit and courage. *Christie White's Hist. of the Turf*.

RADIATION, see *Heat*.

## RADICALS or "RADICAL REFORMERS,"

persons who professed to aim at procuring a thorough reformation in the government and policy of England, became prominent in 1816, when Hampden clubs were formed, of which sir Francis Burdett, lord Cochrane, major Cartwright, and William Cobbett were prominent members. Samuel Bamford's "Life of a Radical," published in 1842, gives much information; he died 13 April, 1872. Many radicals were severely punished, 1817-20. Wm. Harris's "History of the Radical Party," published early in 1885.—The "Radicals" in the United States were the party headed by Thaddeus Stevens, bitterly opposed to the policy of president Johnson, as too favourable to the subdued Southern States.

The *Radical Programme*, advocated by the rt. hon. Joseph Chamberlain, widely circulated, first appeared July 1885, in the *Fortnightly Review*; it included reform of the land laws, free education, increased local government, reform in taxation and finance, improvement of condition of agricultural labourers and of the poor, and religious equality and disestablishment of national churches.

Mr. C. C. Greville (*Journal*, 25 Aug. 1837) describes "Tory Radicals." Some politicians were so termed in 1885.

The National *Radical Union*, at its fourth anniversary at Birmingham, changed its name to National Liberal Union 24 April, 1889.

See *Liberals*.RADICLE, see *Compound*.RADIOBES, see under *Radium*.

**RADIOGRAPHS**, a name given to the photographs obtained by Röntgen rays, see *Photography*, 1896.

**RADIOMETER**, &c., a little instrument constructed by Mr. (knt. 1897) Wm. Crookes, F.R.S., 1873-6. Two little disk arms, mounted on a pivot and placed in an exhausted glass-bulb, revolve when placed in bright light. The motion was attributed to heat-absorption, 1877; see *Light*.

*Radiophone*. By this apparatus professor Bell, at Philadelphia, showed how a ray of strong light, acting on a selenium cell, conveyed sound 500 feet, Sept. 1884.

**RADIUM**. This new and extremely rare metal is found in combination with chlorine and bromine, as radium chloride and radium bromide. It is obtained in very minute quantities from pitchblende after the metal uranium has been extracted. The principle of radio-activity was discovered by M. Becquerel, in Paris, in 1896, from the study of uranium, and Mme. Sklodowska Curie's investigation of this metal, when taking up the subject of radio-activity as the thesis for her doctorate degree, led to the discovery of radium. The discovery of the new metal was communicated by M. Curie to the Academy of Sciences, Paris, in March, 1903, and on 19 June of the same year M. Curie gave a demonstration of this new substance at the Royal Institution, London. Investigations of the properties and phenomena exhibited by radium have also been carried on by M. Becquerel, prof. E. Rutherford, sir William Ramsay, Mr. Soddy, prof. J. J. Thompson, sir William Crookes, and others. Radium possesses the extraordinary property of continually producing heat without combustion and spontaneously producing electricity, and maintains its own temperature, 1° 5' Cent. above its surroundings. It gives off an emanation or gas which shines by its own light, resembling in appearance that of the glow-worm. This emanation, under the cold of liquid air, condenses and leaves behind

**RACK**, an engine of torture, for extracting a confession from criminals, mentioned by Demosthenes, *de Coronâ*, B.C. 330, and in later times an instrument of the Inquisition. Lord Coke states from tradition that the duke of Exeter, in the reign of Henry VI., erected a rack of torture 1447 (thence called the duke of Exeter's daughter), now seen in the Tower. In the case of Felton, who murdered the duke of Buckingham, the judges of England protested against the proposal of the privy council to put the assassin to the rack, as contrary to the laws, 1628; the use of the rack was abolished 1640. See *Ravallac* and *Torture*.

**RACQUETS** (Arabic *ra'hât*, "palm of the hand"). A game played in an open (now but seldom) or close court (60 ft. long, and 30 ft. wide and 40 ft. high, with high walls surrounding it, the floor being divided into two principal areas by the "short" line) with a bat resembling that used in tennis, and a small hard ball. 15 usually constitutes the game. Racquets first came into vogue during the early part of the 19th century, and Chas. Dickens refers to the game in "Pickwick" in connection with the Fleet prison, where insolvent debtors enlivened the monotony of their existence by playing this game against a single wall. In 1853, a racquet court was erected at Prince's Club, and since then courts have become common at the universities and public schools. On the sale of Prince's Club grounds in 1886, the Queen's Club, Kensington, became the headquarters of the game, and here the championship and the universities and public school matches take place. "Racquets" in the Badminton series by J. M. Heathcote, 1890.

*Champion Players of England*, Sir W. Hart Dyke, 1862; H. J. Gray, 1863; Wm. Gray, 1866; H. Fairs, 1876; Joseph Gray, 1878; P. Latham, 1887 to 1904; C. "Punch" Fairs, 1905; he became champion of the world in 1906.

**RADCLIFFE LIBRARY, OXFORD**, founded under the will of Dr. John Radcliffe, an eminent physician. He died 1 Nov. 1714, leaving 40,000*l.* to the university of Oxford for the founding a library, the first stone of which was laid 17 May, 1737, and the edifice was opened 13 April, 1749.—The **RADCLIFFE OBSERVATORY**, Oxford, founded by the exertions of Dr. Hornsby, Savilian professor of astronomy, about 1771, was completed in 1794. The publication of the observations was commenced in 1842, by Mr. Manuel J. Johnson, the director, appointed in 1839. Radcliffe Infirmary opened in 1770; see *Oxford*, 1893.

a rare gas, helium, an element existing in the sun. It is supposed that radium is an element breaking up, and in its dissolution giving out energy. Three kinds of rays are continually in a state of radiation, and are known as the alpha, beta, and gamma rays. The *alpha* rays consist of atoms of matter, each 1 per cent. of the weight of a radium atom, projected with an enormous velocity, but these can be stopped by a thin sheet of metal; they are the projectiles which are rendered visible on a chemical screen, as the zinc sulphide in sir William Crookes' ingenious spinthariscopes. The *beta* rays consist of flying or escaped electrons, atoms of atoms, many thousand times smaller than anything else known, and possess the power of penetrating most metals. The *gamma* rays, also very penetrating, are probably a variety of the X-rays. Radium has been detected in the deposit of the hot mineral waters of Bath and Buxton, pointing to its existence in considerable, but widely diffused, quantities in the interior of the earth. It is supposed that the element uranium is the parent of radium, and that lead is the last stage in the series of transformations. As a therapeutic agent, radium rays have been used in cases of cancer, lupus and other skin diseases, but with no very definite result: it appears, however, to have a bactericidal action in certain cases. Experiments made by M. Danyasz, Feb. 1903 *et seq.*, at the Pasteur Institute, on the action of radium on larvae, demonstrated the power of the rays to suspend or modify functional developments. Experiments on various low forms of life have also been made by M. Bohn, at the biological laboratories of the Sorbonne, with remarkable results. M. and Mme. Curie, the discoverers of radium, were the recipients of various honours in recognition of their eminent services to scientific research. In 1905 prof. John B. Burke, of the Cavendish laboratory, Cambridge, by the exposure of a solution of gelatine to the action of bromide of radium, produced a thin pellicle, which gradually increased in depth; on microscopic examination it was found to be composed of corpuscles, to which the name of *radiobes* has been given. It has not, however, been proved that spontaneous generation has been produced by the action of radium. M. Curie was killed in a street accident in Paris in April, 1906.

**RADSTADT**, Austria. Here Moreau and the French defeated the Austrians, 5 July, 1796.

**RAFFAELLE WARE**, see *Pottery*.

**RAGGED SCHOOLS**, free schools for out-cast destitute ragged children, set up in large towns. The instruction is based on the scriptures. John Pounds, a cobbler, of Portsmouth, who died in 1839, opened a school of this kind; and one was set up by Andrew Walker, in "Devil's Acre," Westminster, in 1839. *Knight*. They did not receive their name till 1844, when the "Ragged school union" was formed, principally by Mr. S. Starey and Mr. Wm. Locke (afterwards hon. secretary). The earl of Shaftesbury was chairman. In 1856 there were 150 Ragged school institutions. Sunday ragged schools reported in London in 1867, 226; in 1898, 231; day schools, in 1867, 204; in 1878, 58; week evening schools, in 1867, 207; in 1878, 147; 44 industrial schools in 1898. Ragged school buildings were exempted from rates, 1869. The day schools have now been superseded by those established by the school board and educational authorities; but the Sunday and night schools, mothers' meetings, &c., are still maintained in very great efficiency (1905). Dr. Guthrie, a founder

of ragged schools in Edinburgh, &c., died 1873. The earl of Shaftesbury, an ardent supporter of the movement, died 1 Oct. 1885; celebrated, 20 April, 1894. Annual meeting union was styled Shaftesbury society in May total members 127,087, 1902. Diamond held at Queen's-hall, princess Louise the prizes, 1 May, 1905. See *Shoeblack*.

**RAGMAN ROLL** (said to derive it from Ragimunde, a papal legate in Scotland) tains the records of the homage and Edward I., sworn to by the nobility and Scotland at Berwick in 1296. The origin given up to Robert Bruce, king of Scotland, when his son David was contracted in marriage to the princess Joanna of England.

**RAGUSA**, a city on the Adriatic, on the confines of Dalmatia, was taken by the Ven. 1171, but became an independent republic. It suffered much by an earthquake, 166 taken by the French in 1806, and given Austria in 1814.

**RAILWAY COMMISSIONERS**, *ways*, 1873 and 1880.

**RAILWAYS**. Short roads, in and about castle, laid down by Mr. Beaumont, so 1602, are thus mentioned in 1676:—"The of the carriage is by laying rails of timber colliery to the river, exactly straight and and bulky carts are made with four rollers those rails, whereby the carriage is so easy horse will draw down four or five chaldron and is an immense benefit to the coal mine Roger North. They were made of iron at haven, in 1738. See *Gauges*, *Tramways* electric railways see *Electricity*.

**REGENT'S PARK**, originally part of the grounds belonging to a palace of queen Elizabeth, near to the north end of Tottenham court-road, pulled down in 1791. Since 1600, the property was let to various persons, but the leases having expired it reverted to the crown; and in 1814 great improvements were commenced under the direction of Mr. Nash. The park consists of about 450 acres; within it are the gardens of the Zoological Society and the Royal Botanical Society. During a frost on 15 Jan. 1867, the rotten ice of one of the lakes gave way, and about 200 persons were immersed, of whom above 40 perished. Addition of 20 acres made to the public park, 1883.

Joseph Rumbold was murdered near York Gate, 24 May. Eight youths, George Galesley, 17, William Elvis, 16, Francis Cole, 18, Peter Lee, 17, William Joseph Graefe, 17, William Henshaw, 16, Charles Henry Govier, 16, and Michael Duling, 15, all described as labourers, were charged with the willful murder, 1 Aug.; Galesley was convicted; the rest acquitted of murder, 2 Aug.; they pleaded guilty to minor charges, and were sentenced to various terms of penal servitude, 4 Aug. The evidence disclosed the existence of local bands of young roughs carrying on internecine warfare. Joseph Rumbold was not the intended victim; Galesley reprieved, Aug. 1888.

**REGENT STREET**, London, W.; designed and executed by John Nash; authorised by act, 53 George III. 1813. The colonnades of the quadrant were removed in 1848.

Wills have been for a series of years kept and registered, in London, at Doctors' Commons; see *Wills*. The registering of shipping in the Thames was commenced, 1786; and throughout England, 1787; and several acts and amendments of acts have since followed for keeping and improving registers.

**REGISTERS, PAROCHIAL**, were established by Cromwell, lord Essex, by which the dates of births, marriages, and burials, became ascertainable, Sept. 1538. This measure was opposed by the people, who feared some new taxation. A stamp-tax was laid on registers in 1784. Laws for their better regulation were enacted in 1813 *et seq.* The great Registration act (introduced by lord John Russell), 6 & 7 Will. IV. c. 86, passed 17 Aug. 1836, see *Bills of Mortality, &c.*

The allowance to certain protestant dissenting ministers in Ireland was given up by them in 1857, in deference to the wishes of English dissenters.

**REGULATION OF PUBLIC WORSHIP**, see *Public Worship*.

**REGULATION OF THE FORCES ACT** passed 17 Aug. 1871. See *Army*.

**REICHENBACH** (Prussia). Here Duroc was killed during the conflicts between the French and the allies, 22 May, 1813; see *Bautzen*. Here was signed a subsidy treaty between Russia, Prussia, and England, whereby the last engaged to provide means for carrying on the war against Napoleon I. on certain conditions, 14, 15 June, 1813. Austria joined the alliance soon after.

**REICHSRATH**, the representative council of the empire of Austria, reconstituted by decree 5 March; met on 31 May, 1860. In May, 1861, the upper house consisted of 17 spiritual, 55 hereditary, and 39 peers. The lower house consisted of 136 elected deputies. No representatives came from Hungary, Transylvania, Venetia, the Banat, Slavonia, Croatia, and Istria. The Reichsrath was abolished by a rescript, 21 Sept. 1865, with the view of restoring autonomy to Hungary and other provinces. It again met 20 May, 1867. The Reichstag of Germany, the imperial parliament or diet, first met at Berlin, 21 Mar. 1871.

**REIGATE** (Surrey), sent two members to parliament in the reign of Edward I.; lost one by the Reform Act of 1832, and was wholly disfranchised for corruption by that of 1867. Population, 1881, 18,662; 1891, 22,646; 1901, 25,993.

**REIGN OF TERROR**. Maximilien Robespierre headed the populace in the Champ de Mars

in Paris, demanding the dethronement of the 17 July, 1791. He was triumphant in 1793 numbers of eminent men and citizens were sent during his sanguinary administration. M. Varennes denounced the tyranny of Robespierre the tribune, 27 July, 1794. The next day suffered death, with many of his companions see *France*. This has been termed the *Red T*. The reaction after the restoration of the Bour 1815, disgraced by many atrocious acts of cruelty, has been termed the *White Terror*. Jesuits were then conspicuous in the destruction of their adversaries.

**REIGNS OF SOVEREIGNS**. The average duration, according to Newton, is 19 years; according to Hales 22½ years; that of the sovereigns of England being 23½ years, and that of the 7½ years. Pius IX. was the first pope who reigned above 25 years, 1846-78.

**REISNER WORK**. The name applied to a kind of inlaid cabinet-work formed of woods stained in colour. So called from Reiser, a German workman, who lived in the reign of Louis XV. (1643-1715) of France.

**RELICS**, the trade in these became general in the 7th century, fragments of bones, &c., brought from Jerusalem. The sale of relics prohibited by pope Innocent III. 1198, without effect.

**RELIEF CHURCH**, a secession from the church of Scotland, founded by Thomas Gilly who was deposed from his ministry for opposing the doctrine of passive obedience to the law of the church of Scotland respecting the settlement of ministers, 23 May, 1752. The church was constituted as the "presbytery of relief," 22 1761. The Relief and Secession churches united as the United Presbyterian Church, 13 1847.

**RELIEF OF DISTRESS (IRELAND ACT)**, 43 & 44 Vict. c. 14, passed 2 Aug. 1880. Ireland, Dec. 1890. Society for the relief of distress founded, 1860.

**RELIGION**. "The feeling of reverence which men entertain towards a Supreme Being or the order of beings conceived by them as demanding reverence for the possession of superhuman powers over the destinies of man or the powers of nature more especially the recognition of God as an object of worship, love, and obedience." There are numerous classifications of religions; Hegel divides them into religions of nature, religion of spirituality, and the absolute or Christian religions. Professor Tiele's classification includes natural religions and ethical religions; the former comprehending animism, polytheism, anthropomorphism, &c.; the latter comprehending fucianism, Taoism, Brahminism, Buddhism, hammedanism, Judaism, and Christianity. The science of religion comprises the psychology, history of religions, and comparative religion. Hume may be said to have initiated the study of religion as a process of mind and the factors which condition and determine its development. "Natural History of Religion," 1759. During the 19th century the study of comparative religion taken up and has made great progress in Germany, France, and England by the investigations of philosophers and scholars like Von Hartmann, Pfeleiderer, Reville, Kuenen, Renouf, Max Müller, Herbert Spencer, D'Alviella, De la Saussure.

Tylor, Lubbock (lord Avebury), Rhys, Davids, Rawlinson, Lang, and others.

**REMISSION OF PENALTIES ACT**, see *Sunday*.

**REMONSTRANCE, THE GRAND**, drawn up by the house of commons, and presented to king Charles I., 1 Dec. 1641. It consisted of 206 articles, dwelt bitterly on all the king's illegal and oppressive acts, and was printed by order of the house.

**REMONSTRANTS**, see *Arminians*.

**RENAISSANCE**, a term applied to the revival of the study of classic literature and art in the 15th and 16th centuries, under the patronage of the Medici and others; see *Painters*, and *Sculptors*. Mr. John A. Symonds' "History of the Renaissance in Italy," with supplements, 7 vols., published 1875-86. He was born 1840 and died 19 April, 1893. "The Renaissance," vol. i. of the Cambridge Modern History, published Jan. 1903.

**RENDSBURG (Holstein)**, was taken by the imperialists in 1627; by the Swedes in 1643; and by the Prussians and confederate troops in 1848. The first diet of Schleswig and Holstein met here 3 April, 1848. It was re-occupied by the Danes in 1852, and taken by the Prussians after a serious conflict, 21 July, 1864.

**RENNES** (capital of Brittany, N. W. France). Here was established by Henry II., in 1553, the parliament so celebrated for its independence, especially in its struggle with the court, 1788-89. On 20 May, 1788, it declared infamous every one who should take part in the *cour plénière* then proposed, but afterwards suppressed. Here took place the re-trial of the Dreyfus case (which see) 1899. Population in 1901, 74,006.

**RENTS** said to have been first made payable in money, instead of in kind, about 1135. Numerous statutes have been enacted in various reigns to define the relations and regulate the dealings between landlord and tenant. 8 & 9 Vict. c. 106 (1845) regulates leases. By the act 8 Anne, 1709, no goods are removable from tenements under an execution until the rent shall have been paid to the landlord by the sheriff, 1709. The rental of England, including land, houses, and mines, was 6,000,000*l.*

about the year 1600, and twelve years' purchase the value of land. About 1690, the rental amounted to 14,000,000*l.*, and the land was worth eighteen years' purchase. *Davenant on the Revenues*. The rental of the United Kingdom was estimated during the nineteenth century at 127,000,000*l.*; Great anti-rent agitation in Ireland, 1879, *et seq.*; see *Land, Ireland*, and *Irish Land Act*, 1903.

**REPEAL OF THE UNION, IRELAND**. An Irish association was formed with this object under the auspices of Mr. O'Connell, in 1829. See *Home Rule and Ireland*.

A proclamation of the lord lieutenant prohibited the meetings of a society "leagued for the purpose of procuring a repeal of the union, under the name of the Irish Society for Legal and Legislative Relief, or the Anti-Union Society" 18 Oct. 1830

The commons, by a majority of 484, reject Mr. O'Connell's motion for repeal 27 April, 1834

A new association in 1841, 1842, and 1843 became more violent. Assemblies of the lower classes of the people were held in the last-named year, in various parts of Ireland, some of them amounting to 150,000 persons, and called "monster meetings."

A meeting to be held at Clontarf, on 8 Oct., 1843, was prevented by government; and Mr. O'Connell and his chief associates were brought to trial for political conspiracy, 15 Jan. 1844; and convicted 12 Feb.; but the sentence was reversed by the house of lords, 4 Sept.; see *Trials*.

The association for the repeal of the union continued for some time under the direction of Mr. John O'Connell, but was little regarded.

The total "repeal rent" is said to have amounted to 134,379*l.*

A fruitless attempt was made in Dublin to revive repeal agitation 4 Dec. 1860

See *Home Rule and Ireland* for the revival of the home rule movement and its subsequent development.

**REPLENISHER**, see *Electricity (Frictional)*.

**REPORTING**. The publication of the debates in parliament is forbidden as a breach of privilege, but was virtually conceded, after a severe struggle, in 1771.\* Reporters' galleries were erected in the houses of parliament after the fire of 1834. To the unfettered liberty of reporting we doubtless owe much of our freedom and good government; see under *Law*. By the verdict for the defendant in the case of *Wason v. The Times* (for libel) reports of parliamentary debates were decided to be privileged, Nov. 1868. For the attempted exclusion of reporters, see *Parliament*, 1875. A commons committee on reporting recommend continuance of Hansard's debates with improvement, May, 1879.

The publication of Hansard's parliamentary debates began 1803 and closed in 1888. Latterly a subsidy was granted. The publication of the debates was taken up by Messrs. Macrae, Curteis & Co., Feb. 1889; and continued by the Hansard Publishing Union, limited, 1889; the Union ordered to be wound up, 13 May. See *Trials*, 1892-93.

Mr. Thomas Curson Hansard, formerly editor of the "debates," aged 78, dies 12 Nov. 1891  
Reports of parliamentary debates now printed and published by private firms who tender for the work.

\* Very inaccurate reports of parliamentary debates were inserted in the *Gentleman's Magazine* and other periodicals in the middle of the last century. Miller, printer of the *London Evening Mail*, was arrested in the city of London, by order of the house of commons, for publishing the debates, but was discharged by the lord mayor, who for doing this was sent to the Tower, where he remained until the end of the session. No opposition was made to the publication of the debates in the next session, 1772.

**REPRESENTATION OF THE PEOPLE ACT FOR ENGLAND**, passed 15 Aug. 1867; for Ireland and Scotland, 13 July, 1868; a new act passed, 6 Dec. 1884. See *Reform*.

The *Representative*, a daily Tory paper, was started by Mr. John Murray, the bookseller, in opposition to the *Times*, in 1826. Although he was assisted by Mr. Benjamin Disraeli and other eminent persons, the project was unsuccessful; the first number appeared 25 Jan., the last . . . 29 July, 1826.

"**REPTILE BUREAUCRACY**," term applied in Germany to certain journalists writing for government pay, 1871, *et seq.*

**REPUBLICANS**, see *Democrats*. The name adopted by the Northern party in the United States, N.A., opposed to the democrats in the South. It is stated that the first delegate-nominating convention in the United States that adopted the name Republican party, was held in Strong, Franklin county, Maine, 7 Aug. 1854. Sir Charles Dilke, M.P. professed himself a republican at public meetings and was much applauded, Nov. 1871; but at some places his appearance led to riotous proceedings. His motion for returns respecting the expenditure of the civil list by queen Victoria was negatived in the house of commons (2—276), 19 March, 1872. A national republican conference of delegates was held at Sheffield, 1 Dec. 1872, when a national flag was adopted.

**REPUBLICS**, see *Athens, Rome, Genoa, Venice, France* (1792, 1848, 1870), *Spain* (1873), *Brazil* (1889), *Panama* (1903), and *America*.

**REQUIEM**, a solemn mass, sung for the dead, so called from the introit "Requiem Æternam," &c. Palestrina's Requiem was printed at Rome, 1591; Vittoria's at Madrid, 1605; Mozart's last work was a requiem, 1791.

**REREDOS**, the screen or decorated portion of the wall behind the altar in a church.

A highly sculptured reredos, designed by sir G. G. Scott, was erected in Exeter cathedral, by subscription . . . 1873

Prebendary Philipotts, the chancellor, and others who objected, brought their objections before the bishop's visitation court, on 7 Jan.; it was decided that the bishop had jurisdiction in the matter, and he ordered the reredos to be removed, 15 April, 1874. Dean Boyd appealed to the court of arches, and sir R. Phillimore reversed the previous decision . . . 6 Aug. 1874

Prebendary Philipotts appealed to the judicial committee of the privy council, who decided that the reredos should remain . . . 24 Feb. 1875

The magnificent reredos set up in St. Paul's Cathedral, London, was protested against as idolatrous by some of the London clergy, April, 1888. An action against the dean having been stopped by the bishop, the queen's bench division ordered the bishop to withdraw his veto upon the prosecution, 1 June, 1889. After further litigation, the house of lords sustained the bishop's veto . . . 20 July, 1891

**RESERVE FORCES**. In the summer of 1859, acts were passed to provide for the establishment of a military reserve force of men who had been in the service (not to exceed 20,000), and a volunteer reserve force of seamen not to exceed 30,000. These acts were consolidated and amended in 1867, 1882 and 1896. The reserve forces called out by proclamation, on account of possible war with Russia, 2 April, 1878. About 35,000 good soldiers appeared, and were commended. They were disbanded 31 Aug. 1878. Again called out on account of war in Egypt, 25 July, 1882, and prospect of war with

Russia, 27 March, 1885. Average of army 1888, 55,068; 1890, 56,082; 1893, 76,874; 78,057; 1904, 74,940. Important change made to meet exigencies during war it passed, 1 July, 1898. Reserve called out to the front during South African war, 18

**RESTORATION, THE**, of king Charles II. to the crown of England, after an interregnum of eleven years and four months, between 30 Jan. when Charles I. was beheaded, and 29 May when Charles II. entered London amidst the acclamations of the people. The annual form of oath with thanksgiving, then appointed, was to be disused by 22 Vict. c. 2, 25 March. See *France*, 1814, 1815.

**RESTORATION CAMPAIGN**, see *Zionists*.

**RETREAT OF THE TEN THOUSAND GREEKS**, who had joined the army of the king of Persia, in his revolt against his brother, Artabanus. The Greeks were victors, but Cyrus defeated and slain at the battle of Cunaxa. Artaxerxes having enticed the Greek leader, Mithridates, to his power and killed him, Xenophon was appointed the command of his countrymen. Under his leadership, from sudden attacks, he led them through rapid rivers, through vast deserts, over the mountains, till he reached the sea. The Greeks returned home after a march of 1155 parasangs (3465 miles), which was performed in 25 days, after the absence of fifteen months. The retreat has been immortalised by the account of its conductor, in his "Anabasis Cyri" (History of Cyrus).

\* Revised in relation to army, navy, and India.

The weekly instead of the quarterly publication of the public revenue and expenditure was begun by Mr. Robert Lowe, the chancellor of the exchequer, 16 Feb. 1870. By an act passed 31 July, 1868, revenue officers are permitted to vote for the election of members of parliament. Above 100 statutes relating to inland revenue fell into disuse 1 Jan. 1871.

The revenue friendly societies, and national debt act, 45 & 46 Vict., c. 72, passed 18 Aug. 1882. New revenue act passed, 1884.

**REVEREND**, an honorary appellation given to the clergy, since the middle of the 17th century.

In Tamworth parish register the minister is first styled "reverend," in 1657, occasionally afterwards; but regularly so after 1727. It first appears in the registry of All Hallows, Barking. 1732 The prefix on a family tombstone was refused to Mr. Keet, a Wesleyan preacher, by the bishop of Lincoln, but given by the archbishop of Canterbury. 1874

On trial, Mr. Walter G. F. Phillimore, the chancellor of Lincoln, decided against Mr. Keet, who gave notice of appeal, 3 June. Sir R. Phillimore gave a similar decision in the court of arches, 31 July. 1875 On appeal to the privy council these decisions were reversed. It was decided that there is no law or usage restricting the epithet to ministers of the Church of England; it is merely laudatory.

**REVIEWS.** The *Journal des Scavans*, published on 5 Jan. 1665, by Denis de Salo, under the name of Hédouville, was the parent of critical journals. It was soon imitated throughout Europe, and was itself translated into various languages. George III. spoke of this publication to Dr. Johnson, in the private interview with which he was honoured by his majesty, in the library of the queen's house, in Feb. 1767. *Boncell.* The *Bibliothèque Anglaise* came out in 1716-27; the *Revue Britannique*, founded 1825, ceased Dec. 1901. **REVISING BARRISTERS' COURTS**, to examine the lists of voters for members of parliament, were instituted by the Reform Act of 1832.

**REVISION**, see under *Bible*. Advocates of the revision of the French constitution, chiefly Bonapartists or Jeromists, termed *Revisionists*, Feb. 1884.

**REVIVALS** on the subject of religion arose in the United States in 1857. In the autumn of 1859, they began in Scotland, the north of Ireland (particularly Belfast), and England. Many meetings were held for prayers and preaching throughout the week, as well as on Sundays. The "*twelve days' mission*," a series of revival services, took place in many London churches during advent, 1869.

Mr. Moody, preacher (born 1837, died 22 Dec. 1899), and Mr. Sankey, singer, American Revivalists, visited many towns in the United Kingdom, 1874-5. Their meetings in London began at the Agricultural-hall, 9 March, about 25,000 present; at the Queen's theatre, Haymarket, 12 April-31 May; farewell meeting, 12 July, 1875. Moody and Sankey again in London, 6 Oct. 1881; 3 Nov. 1883-23 June, 1884. Revival in Wales, chiefly the result of the preaching of Evan Roberts, a young miner of N. Wales; decrease of crime and drunkenness reported as an outcome of the movement, which spread throughout Wales in 1904-5. The Torrey-Alexander mission opened at the Albert-hall, London, 4 Feb., and at Brixton, 8 April, 1905. See *Salvation Army*.

**REVOLUTIONARY CALENDAR**, see *French Revolution*, and *Calendar*.

**REVOLUTIONARY TRIBUNAL**, established at Paris, Aug. 1792.

Up to 27 July, 1794, when Robespierre was deposed, it had put to death 2774 persons, including queen Marie Antoinette, the princess Elizabeth, and a large number of nobility and gentry, male and female. The oldest victim was counsellor Dupin, aged 97; the youngest, Charles Dubost, aged 14. From 27 July to 15 Dec. 1794, only Robespierre and his accomplices (about 100) suffered by it.

beasts are actors and speakers, was first

written by Hinrich van Alkmar.

It has frequently translated.

Goethe's version in

literary German hexameters appeared.

Jacob Grimm has shown that the subject-

matter of this "Thier-sage" or "beast-fable" is very

**RHEIMS** (N. France). The principal church here, built before 406, rebuilt in the 12th century, is now very beautiful. The corpse of St. Remy, the archbishop, is preserved behind the high altar, in a magnificent shrine. The kings of France were crowned at Rheims; probably because Clovis, the founder of the French monarchy, when converted from paganism, was baptized in the cathedral in 496; the only kings not crowned here down to 1825, were Henry IV., Napoleon I., and Louis XVIII. Several ecclesiastical councils have been held here. The city was taken and retaken several times in the last months of the French war, 1814. University founded by cardinal Lorraine, 1547, suppressed about 1790. Strike of the workmen of Mr. Jonathan Holden, mill owner, a great benefactor to the town, May, 1890. **RHEOMETER**, see under *Electricity*.

**RHETORIC**. Rhetorical points and accents were invented by Aristophanes of Byzantium, 200 B.C. Rhetoric was first taught in Latin at Rome by Photius Gallus, about 87 B.C. He taught Cicero, who said "We are first to consider what is to be said; secondly, how; thirdly, in what words; and lastly, how it is to be ornamented." A regius professor of rhetoric was appointed in Edinburgh, 20 April, 1762, when Dr. Blair became first professor.

**RHINE** (Latin, *Rhenus*; German, *Rhein*; French, *Rhin*), a river, about 760 miles long, rising in Switzerland, receiving the Moselle, Main, Meuse, Neckar, and other rivers, terminating in many arms in Holland, and falling into the German ocean. On its banks are Constance, Basel, Strasbourg, Spire, Mannheim, Cologne, Düsseldorf, Utrecht, and Leyden. The possession of the banks of the Rhine has been the cause of many wars, and it was crossed by the French above twenty times in a century. In the beginning of the revolutionary war, Custine invaded Germany by crossing it in 1792; and at the close of the war in 1815, France retained the left bank, but lost it at the close of the Franco-Prussian war, 1870-1 (*which see*). A navigation treaty with other powers was signed by France, 17 Oct. 1868. A central committee for the navigation exists, formed by members for Alsace, Lorraine, Baden, Bavaria, Hesse, Holland, and Prussia. Very great damage (about 4,000,000*l.*) and loss of life, caused by the rising of the river through excessive rain, end of November and December, 1882; relieved by government grants.

Becker's German song "They shall not have it, the free German Rhine;" and Alfred de Musset's reply, in French, "We have had it, your German Rhine," appeared in 1841. Max Schneckenburger, author of "The Watch on the Rhine," died 1851. All were popular during the war, 1870-71.

**RHINOPLASTY**, an operation performed by dissecting a flap of skin from the forehead and placing it over the nose.

**RHODE ISLAND** (N. America), settled by Roger Williams about 1636, was taken in the war of independence by the British, 8 Dec. 1776; but was evacuated by them, 25 Oct. 1779. Capitals,

Providence and Newport. Population in 1880, 276,531; 1890, 345,506; 1900, 428,556; see *United States*.

**RHODES**, an island on the coast of Asia Minor, is said to have been peopled from Crete, as early as 916 B.C. The Rhodians were great navigators, and institutors of a maritime code afterwards adopted by the Romans. The city was built about 408 and flourished 300-200 B.C.; see *Colossus*. Rhodes, long an ally of the Romans, was taken by the emperor Vespasian, A.D. 71. It was held by the Knights Hospitallers from 1309 to 1522, when it was conquered by the Turks, who still retain it. The knights retired to Malta (*which see*). Rhodes suffered severely by an earthquake on 22 April, 1863.

**RHODESIA**, the name given (1895) to the territories subject to the S. Africa company (after the rt. hon. Cecil Rhodes, "the great empire builder") born at Bishop's Stortford, 5 July, 1853; (died 26 March, 1902), comprising an area of 750,000 sq. miles; chief towns, Bulawayo (capital of Matabeleland) and Salisbury. Rhodesia is divided into two parts: *Northern Rhodesia*, first opened to British influence by the late Dr. Livingstone, subdivided into North-Eastern and North-Western Rhodesia (called also Barotseland) and still occupied by native tribes living under their own chiefs. The headquarters of the administrator of N.-E. Rhodesia are at Fort Jameson, and of the administrator of N.-W. Rhodesia at Kalomo. *Southern Rhodesia* is governed by an executive council, composed of the administrator of S. Rhodesia and 4 members appointed by the British South Africa company, with the approval of the secretary of state for the colonies, and by a legislative council consisting of the administrator, the resident commissioner, and 14 other members, 7 of whom are appointed by the British S. Africa co. and 7 elected by the registered voters of Mashonaland and Matabeleland. The seat of government is at Salisbury, the capital of Mashonaland. Native affairs are administered, under the administrator, by a chief native commissioner in each province. About 1900 miles of railway are now (1905) open for traffic. Population (white) of S. Rhodesia, census 1904, 12,506, native, enumerated, 1905, 594,500. Revenue, 1905 (31 March), 453,173*l.*; expenditure, 590,139*l.* See *Zambesi and Mashonaland*, 1894.

His step-sister Constance Kent (aged sixteen), and the nurse Elizabeth Gough (the first suspected), were discharged for want of evidence. The coroner was severely blamed for charging the jury improperly, but the court of queen's bench, in Jan. 1861, refused to issue a writ for a new inquiry. Constance Kent, on 25 April, 1865, before sir Thomas Henry at Bow-street, and at her trial at Salisbury, on 21 July following, confessed herself to be guilty of the murder. Her punishment was commuted to penal servitude for life. Let out on ticket-of-leave, 18 July, 1885. Road is near Frome, Somerset.

Loudon M'Adam's roads were introduced about 1818. Wooden pavements were tried with partial success in the streets of London: at Whitehall in 1839, and in other streets in 1840; asphalt pavement soon after; wood paving came into general use in the latter part of the 19th century. The duke of Buckingham was sent with a fleet and army to relieve it; but the citizens declined to admit him. He attacked the isle of Rhé, near Rochelle, and failed, 22 July, 1627. ROMAN ROADS IN ENGLAND. Our historians maintain, but are mistaken, that there were but four of these roads. *Cumden*. "The Romans," says Isidore, "made roads almost all over the world, to have their marches in a straight line, and to employ the people;" and criminals were frequently condemned to work at such roads, as we learn from Suetonius, in his life of Caligula. They were commenced and completed at various periods, between the 2nd and 4th centuries, and the Roman

soldiery were employed in making them, that tivity might not give them an opportunity to disturbances. *Bede*.

Röntgen while experimenting with a Crooke's vacuum tube, electrically excited, and enveloped in a black covering, observed that some rays proceeding from the tube passed through the black paper and affected a fluorescent screen at a distance of two yards, 8 Oct. 1895. See *Vacuum*.

The continued researches proved that many substances opaque to ordinary light were transparent to these rays, as flesh, wood, &c.; the shadows of such objects thrown on a screen can be photographed; the interior of a dead monkey was photographed with great distinctness, *Lancet*, March, 1896.

The movements of the bones in living animals were exhibited by these rays by means of a cinematograph, in 1897 *et seq.* These rays have the power of dis-electrifying electrified bodies.

The rays are much utilized in surgery; 418 St. Thomas's hospital were reported in 1899 successful in military surgery in 1898 *et seq.*

The Röntgen society founded, prof. Silvanus P. son, president, June; first meeting in London, 1897 (see *Radiographs*).

Experiments by dr. Heineke in Leipzig show rays exert a harmful effect on the internal of the body, reported, 9 Dec. 1903.

N-rays, "a supposed novel series of rad whose properties comprise ability to pass i aluminium, wood, and other substances, a brightening of an electric spark while ben fluorescent and without photographic action," to be discovered by prof. Blondlot, of Nancy, course of his researches on röntgen rays; B Leconte of 50,000 francs awarded to prof. B for his discovery by the Academy of Sciences.

ROSE'S ACT, 33 Geo. III. c. 54 (1793) brought benefit societies under the control of government.

ROSES, WARS OF THE, between the Lancastrians (who chose the red rose as their emblem) and the Yorkists (who chose the white rose), 1455-1485. It is stated that in the Wars of the Roses there perished 12 princes of the blood, 200 nobles, and 100,000 gentry and common people. The union of the roses was effected in the marriage of Henry VII. with the princess Elizabeth, daughter of Edward IV. 1486.

Richard II., who succeeded his grandfather Edward III. in 1377, was deposed and succeeded in 1399 by his cousin Henry IV. (son of John of Gaunt, duke of Lancaster, the fourth son of Edward III.), in prejudice to the right of Roger Mortimer (grandson of Lionel, duke of Clarence, Edward's third son), who was declared presumptive heir to the throne in . . . 1385

Roger's grandson, Richard duke of York, first openly claimed the crown in . . . 1449  
Attempts at compromise failed, and the war began in . . . 1455

The Lancastrians were defeated at St. Albans; the protector Somerset was slain; a truce was made, and Richard was declared successor to Henry VI. 23 May, "

The war was renewed, and the Yorkists defeated the Lancastrians at Bloreheath . . . 23 Sept. 1459  
The Yorkists eventually dispersed, and the duke was attainted.

He defeated his opponents at Northampton, took Henry prisoner, and was declared heir to the crown; but fell into an ambushade near Wakefield, and was put to death . . . 31 Dec. 1460

His son (Edward) continued the struggle; was installed as king . . . 4 March, 1461  
Defeated the Lancastrians at Towton . . . 29 March, "  
Was deposed by Warwick, who restored Henry VI. Sept. 1470

Edward defeated the Lancastrians at Barnet, 14 April, and finally at Tewkesbury . . . 4 May, 1471  
The struggle ended with the defeat and death of Richard III. at Bosworth . . . 22 Aug. 1485

ROSETTA (in Egypt), taken by the French in 1798; and by the British and Turks, 19 April, 1801. The Turks repulsed the British here, 22 April, 1807. Near Rosetta was fought the battle of the Nile, 1 Aug. 1798; see *Nile*. Mehemet Ali rendered great service to his country by constructing a canal between Rosetta and Alexandria.

The *Rosetta Stone*, discovered by the French in 1799, was brought from Rosetta in a French vessel, from whence it was taken by Mr. Wm. R. Hamilton, who deposited it in the British Museum. In 1847, Mr. Letronne published the text and a translation of the Greek inscription. It is a piece of black basalt, about 3 ft. long and 24 in. wide, with an inscription in three languages, viz. hieroglyphics, modified hieroglyphics (demotic or endorhial), and Greek, setting forth the praises of Ptolemy Epiphanes (about 266 B.C.). It was studied by Dr. T. Young and especially by J. F. Champollion,

whose works were published 1814-1845. Champollion's method was adopted by Rosellini, and extended by Lepsius, Bunsen, Birch, Brugsch, and others. Champollion discovered that the hieroglyphs represented sounds by an initial letter, and after studying the "Ritual of the dead," published a grammar and dictionary.

**ROSICRUCIANS**, a sect of mystical philosophers who appeared in Germany in the 14th century. It is asserted that their founder was a noble German monk named Christian Rosenkreutz, born 1378, who travelled in Arabia, Egypt, Africa, and Spain; returned to Germany and founded the fraternity of the Rosy Cross, and died aged 102. The *Fama Fraternitatis* and the *Confessio Rosæ Crucis*, 1615, the latter attributed to Johann Valentin Andreae and others, are important works. They swore fidelity, promised secrecy, and wrote hieroglyphically, and affirmed that the ancient philosophers of Egypt, the Chaldeans, Magi of Persia, and Gymnosophists of the Indies, taught the same doctrine.

Mr. Arthur E. Waite's elaborate work "The Real History of the Rosicrucians" published in 1887.

Having had dealings with the landgrave of Hesse, that prince entrusted him with his treasure (said to have been 250,000*l.*) in 1806, when the French held his country. **ROUND-HEADS.** In the civil war which began in 1642, the adherents of Charles I. were called Cavaliers, and the friends of the parliament Round-heads. The term, it is said, arose from those persons who had a round bowl or dish put upon their heads, and their hair cut to the edge of the bowl; *see Cavaliers*.

Among the profess been Johnson, Gibbon, Goldsmith, Macaula Hallam. Turner, the painter, gave funda academy for the award of a medal trienn landscape-painting, which was awarded to O. Lupton in 1857. A commission of inqu the affairs of the academy, appointed in 18 commended various changes in July, 1865, were carried into effect. The hundredth ann of the foundation of the academy was cel 10 Dec. 1868. The Royal Academy held a exhibition in Burlington-house, Piccadilly, 1869. An act of parliament to this effect was passed . . . . . 12 Aug. 1889.

**ROYAL HUMANE SOCIETY** (London), see *Humane Society*.

**ROYAL INSTITUTION OF GREAT BRITAIN**, the earliest of the kind in London, was founded 9 March, 1799, by count Rumford, sir Joseph Banks, earl Spencer and Morton, and several other noblemen and gentlemen. It received the immediate patronage of George III., and was incorporated 13 Jan. 1800, by royal charter, as "The Royal Institution of Great Britain, for the diffusing knowledge, and facilitating the general introduction of useful mechanical inventions and improvements, and for teaching, by courses of philosophical lectures and experiments, the application of science to the common purposes of life." It was enlarged and extended by an act of parliament in 1810; the original plan, as drawn up by count Rumford, in 1799, having been considerably modified. The members are elected by ballot, and pay ten guineas on admission, and five guineas annually, or a composition of sixty guineas. "The Royal Institution, its Founder, and its first Professors," by Dr. Bence Jones, hon. sec., published 1871.

The **HOUSE** (in Albemarle-street, Piccadilly) was purchased in June, 1799, and the present front was added by subscription in 1818. The Lecture theatre was erected in 1800-1, under the superintendence of Mr. T. Webster.

The **LABORATORY** established in 1800; was rebuilt, with the modern improvements, 1872.

The **LIBRARY** was commenced in 1803, by the munificent subscriptions of the proprietors of the institution. It now comprises about 60,000 volumes. Classified catalogues (by W. Harris) were published in 1809 and 1821; new ones (by B. Vincent) in 1857 and 1882.

The **MUSEUM** contains original philosophical apparatus of Young, Cavendish, Davy, Faraday, and De la Rue. The first **LECTURE** was delivered 4 March, 1800, by Dr. Garnett, he being the first professor of natural philosophy and chemistry.

In Aug. he was succeeded by Dr. Thomas Young, so celebrated for his researches in optics, resulting in the discovery of the interference of light, and the establishment of the theory of undulation. His "Lectures on Natural Philosophy and the Mechanical Arts," first published in 1807, are still considered a text-book of physical science. His works on antiquarian literature (hieroglyphic inscriptions, &c.) are highly esteemed.

In Feb. 1801, Mr. (afterwards sir Humphry) Davy was engaged as assistant lecturer and director of the laboratory, and on 31 May, 1802, he was appointed professor of chemistry. His lectures were eminently successful, and his discoveries in chemistry and electricity have immortalised his name, and conferred honour on the institution. By him the alkaline metals potassium and sodium, were discovered in 1807; the nature of chlorine was determined in 1810, and the safety-lamp invented in 1815.

William Thomas Brande succeeded sir Humphry Davy as professor of chemistry in 1813, and held that office till his resignation in 1852, since which time, till his death (Feb. 1866), he was hon. professor. From 1816 to 1850 he delivered, in the laboratory of this institution, his celebrated chemical lectures to students.

In 1813 Michael Faraday (born 22 Sept. 1791), on the recommendation of sir H. Davy, was engaged as assistant in the laboratory, and in 1825 as its director; in 1827 he became one of the permanent lecturers of the institution. In 1820 he commenced those researches in electricity and magnetism which form an era in the history of science. In 1823-4 he discovered the condensability of chlorine and other gases; in 1831 he obtained electricity from the magnet; in 1845 he exhibited the two-fold magnetism of matter, comprehending all known substances, the magnetism of gases, flame, &c.; in 1850 he published his researches on atmospheric magnetism; died, 25 Aug. 1867.

John Tyndall, F.R.S., professor of natural philosophy, July, 1853, hon. professor, 9 May, 1887; died 4 Dec. 1893; eminent for his researches on magnetism, heat, glaciers, &c.; bequeathed 1,000*l.* to the Royal Institution, received Jan. 1898.

Lord Rayleigh, F.R.S., professor of natural philosophy, 9 May, 1887; is eminent for his researches on sound, light, &c.

Edward Frankland, F.R.S. (after sir), in chemistry 1863-8, eminent for his discovery of organic chemistry; he died, 9 Aug. 1899.

James Dewar, F.R.S. (born 20 Sept. 1842), in chemistry, 9 April, and director of the institution, 7 May, 1877; eminent for his discoveries in the liquefaction and solidification at high temperatures, air, oxygen, hydrogen, &c.

In 1804, sir J. St. Aubyn and other gentlemen formed a school of mines at this institution plan, although warmly supported by the men withdrawn for want of encouragement by the government and by mining proprietors.

The **WEEKLY EVENING MEETINGS**, on the Friday and Saturday evenings, as now arranged, commenced in 1804; of which abstracts have been printed (see *seq.*) are given at these meetings by the institution and other eminent scientific men.

ROYAL SOCIETY (London). In 1645 several learned men met in London to discuss philosophical questions and report experiments; the *Novum Organon* of Bacon, published in 1620, having given great impulse to such pursuits. Some of them (Drs. Wilkins, Wallis, &c.), about 1648-9, removed to Oxford, and with Dr. (afterwards bishop) Seth Ward, the hon. Robert Boyle, Dr. (afterwards sir) W. Petty, and several doctors of divinity and physic, frequently assembled in the apartments of Dr. Wilkins, in Wadham college, Oxford. They formed what has been called the Philosophical Society of Oxford, which only lasted till 1690. The members were, about 1658, called to various parts of the kingdom, on account of their respective professions; and the majority coming to London, constantly attended the lectures at Gresham college, and met occasionally till the death of Oliver Cromwell, 3 Sept. 1658; *see Societies, and Scientific Papers*. "Record of Royal Soc." issued 1897.

The society was organised in 1660, and constituted by Charles II. a body politic and corporate, by the appellation of "The President, Council, and Fellowship of the Royal Society of London, for improving Natural Knowledge," 22 April, 1662.

Henry Oldenburg, the first secretary, an eminent philosopher, a native of Bremen, a friend of Milton, Boyle, Wilkins, Wallis, and Petty, died Sept. 1677.

Evelyn records the first anniversary meeting, St. Andrew's-day, 30 Nov. 1663.

The *Philosophical Transactions* begin 6 March, 1664-5.

In 1668 Newton invented his reflecting telescope (now in the possession of the society), and on 28 April, 1686, presented to the society the MS. of his *Principia*, which the council ordered to be printed. This was done under the superintendence and at the expense of Halley the astronomer, at that time clerk to the society.

The society met for some years at Gresham College, and afterwards at Arundel House (1666), where it came into possession of a valuable library, presented by Mr. Howard, grandson of its collector, the earl of Arundel. After various changes the fellows returned to Gresham College, where they remained till their removal to Crane-court, in a house purchased by themselves, 8 Nov. 1710.

The Croonian lecture was founded in 1701; the Bakerian lecture by Henry Baker, 1774.

The first Copley medal was awarded to Stephen Gray in 1731; the royal medal to John Daiton, 1826; the Rumford medal (instituted in 1797) to count Rumford himself in 1800.

The society remove to apartments granted them in Somerset-house, 1780; to apartments in Burlington-house, Piccadilly, 1857.

Parliament votes annually 4000*l.* to the Royal Society for scientific purposes; raised to 5,000*l.* in 1895.

Regulations made by which only fifteen fellows are to be annually elected, who pay ten pounds on admission, and four pounds annually, or a composition of sixty pounds, March, 1847. In consequence, the number of fellows was reduced from 839 in 1847, to 626 in 1866; to 567 in 1875; to 552 in 1877; to 523 in 1888; 511 in 1893; 450 in 1905.

The entrance fee abolished, and the annual payment reduced to 3*l.*, announced, Nov. 1878.

The "Royal Society Scientific Fund" was founded in imitation of the "Literary Fund" in 1859; *see Scientific Fund*.

The Davy medal (*which see*) first awarded, Nov. 1877.

The Darwin medal (*see Development*) first awarded, 1890. The Croonian lecture given by prof. Virchow, of Berlin, 16 March, 1893.

Sir Wm. Mackinnon bequeaths over 16,000*l.* to the society, announced Dec. 1897.

The "Hughes" medal for original discovery in physical science, particularly electricity and magnetism (from a bequest by prof. David Edw. Hughes), first awarded to Joseph John Thomson, Nov. 1902.

The Royal Society entertains, at a banquet at the hotel Cecil, delegates to the triennial conference of the International Association of Academies, 24 May, 1904. Anonymous donor presents 1,000*l.* to the society for the advancement of science, Nov. 1904.
